

Objective:

Passionate and results-driven Software Developer pursuing an MS in Computer Science at Kennesaw State University, with expertise in Python, Java, and JavaScript. Experienced in building scalable backend systems using Django REST Framework, FastAPI, and Java-based solutions, with a strong foundation in SQL, MongoDB, Redis, and cloud computing. Skilled in developing high-performance applications, optimizing data retrieval, and deploying cloud-based solutions.

Academics:

Kennesaw State University	Marietta, GA
Master of Science in Computer Science (<i>Scholarship Recipient</i>)	Jan 2024 – May 2025
CGPA: 4.0/4.0	

Skills

Programming Languages: Python, Java, C
Front-End Technologies: HTML, CSS, JavaScript, ReactJS
Back-End Technologies: Django, Flask, Rest API, Fast API
IDE: VS code, PyCharm
Database: SQL, MongoDB, PostgreSQL, Redis
Data Analysis: Power BI
Cloud: AWS (EC2, S3, RDS)
Operating Systems: Windows, Linux, MacOS
Software Development Principles: Agile, Object-Oriented Programming (OOP)

Experience:

Backend Developer Intern Avrut Solution	<i>[Jan 2023 – Dec 2024]</i>
--	------------------------------

- Developed scalable backend APIs using **Django REST Framework, FastAPI, MySQL, MongoDB, Redis, and WebSockets**.
- Engineered high-performance trading and E-commerce APIs, optimizing **search, pagination, and payment integration**.
- **Built real-time notifications, two-way chat, and Slack automation** using **AsyncIOScheduler** and **Slack BOT Tokens**.
- **Optimized data caching**, transferring **millions of AWS records to Redis** within minutes.
- **Deployed and maintained high-availability applications** on **AWS EC2 Ubuntu instances**.

Projects:

Fircy FastAPI-Redis AWS API FAST API

- Designed **high-speed data caching** with **FastAPI and Redis**, migrating millions of AWS records via **Riot query** for fast retrieval.
- **Reduced query execution time by 80%** by implementing Riot queries and FastAPI's async capabilities.
- Deployed an **AWS Lambda function** with **reCAPTCHA verification** and hosted the project on **AWS EC2 Ubuntu** for scalability.

Dematade Trade Backend API | Django REST Framework

- Built **scalable trading APIs** with **Django REST Framework, MySQL, and WebSockets** for core modules like **Trade Log, Broker, and Order History**.
- **Reduced query execution time by 40%** through optimized indexing and ORM query improvements.
- Optimized **bulk login, search, and pagination APIs** for better performance and concurrent authentication.

Avrut Solution Backend API | FAST API

- Developed a **FastAPI backend** with **MongoDB and WebSockets** for team collaboration, handling users, projects, tasks, and schedules.
- **Reduced response time by 35%** by implementing async I/O operations for real-time notifications and chat.
- Implemented **real-time notifications, two-way chat, and Slack automation** using **AsyncIOScheduler and Slack BOT Tokens**.
