

JAIPRIYA GUNASEKAR

DATA ENGINEER

(949) 396-1599 | jaigunasekar97@gmail.com | Columbus, OH

PROFESSIONAL SUMMARY

Data Engineer with 5+ years of experience in designing, building, and optimizing scalable data pipelines for enterprise-grade analytics. Proven track record of end-to-end ETL/ELT development, data warehouse modernization, and real-time data processing using Python, SQL, PySpark, and cloud-native tools (AWS, Azure, GCP). Adept at performance tuning, data manipulation, data extraction, data governance, and orchestrating workflows (Airflow, CI/CD) to ensure high-quality, actionable insights. Strong collaborator with cross-functional teams, translating complex business requirements into efficient data models and interactive dashboards (Power BI, Tableau). Passionate about automation, Big Data best practices, and enabling data-driven decision-making on a scale.

EDUCATION

Masters in Data Science

GPA – 3.6

University at Buffalo, The State University of New York

Jan 2024

Bachelors in Computer Science

GPA - 3.83

Anna University, Chennai, India

May 2020

WORK EXPERIENCE

Data Engineer | Principal Financial Group, NJ - USA

Sep'23 – Present

- Developed and optimized ETL pipelines in Azure Data Factory and Azure Databricks (PySpark) that improved data processing speed by 35%, reducing data delivery SLAs from 24 to 16 hours.
- Automated data ingestion from over 10+ financial sources, improving data availability for analytics by 40%.
- Engineered data warehouse solutions and data processing systems in Azure Synapse Analytics, leading to a 50% reduction in query latency through partitioning and distribution strategies.
- Improved ETL job reliability by 60% by implementing monitoring, alerting, and retry mechanisms using Azure Data Factory triggers and Azure Functions.
- Reduced manual reporting efforts by 70% through the creation of self-serve Power BI dashboards linked to real-time Redshift views.
- Streamlined cloud storage costs by 20% by implementing Azure Blob lifecycle management policies and archival strategies.
- Enhanced SQL query performance by 30% through optimization techniques such as indexing, query refactoring, and schema tuning.
- Ensured data integrity and compliance with security standards through CI/CD (Jenkins), Git version control for infrastructure automation.

Data Engineer | WebCode IT, Chennai - India

Jan'19 – Jul'22

- Collaborated with Agile teams to maintain data warehouse models using dimensional modeling (Star Schema, Snowflake Schema).
- Built ETL workflows with Talend and Informatica that processed over 2 TB of data daily, improving data consolidation times by 45% across AWS S3 and Redshift environments.
- Migrated legacy data systems to a cloud-based architecture using AWS Glue, S3, and EMR, cutting infrastructure costs by 25%.
- Streamlined data ingestion using Apache NiFi, Python, and AWS Lambda, resulting in a 60% increase in data freshness across reporting systems.
- Increased ETL pipeline throughput by 50% by leveraging Apache Spark and optimizing batch sizes and resource utilization.
- Achieved a 90% reduction in data quality issues by implementing validation rules, data profiling, and automated reconciliation scripts.
- Designed Power BI dashboards that reduced manual monthly reporting time by 80%, improving executive decision-making cycles.
- Integrate the architecture of distribution systems to enhance data flow and minimize latency across BI platforms.
- Collaborated with stakeholders to re-architect the data model, reducing redundant storage by 35% and improving data lineage tracking.

TECHNICAL SKILLS

Methodology & Compliance: SDLC, Agile, Scrum, Kanban, Waterfall

Programming Languages: Python (Pandas, NumPy, Matplotlib), R Language, SQL

Databases & Data Warehousing: SQL Server, PostgreSQL, MySQL, Oracle, MongoDB

Cloud Platforms & Infrastructure: AWS (S3, Redshift, Glue, Lambda, EMR, EC2, Route53), Azure (Data Factory, Databricks, Blob Storage, Azure Data Lake, Azure Synapse), GCP (BigQuery)

Big Data Technologies: Apache Spark (PySpark, Spark SQL), Apache Kafka, Apache Airflow, Apache Hive, Apache NiFi, Hadoop (HDFS, YARN, MapReduce)

ETL / ELT & Data Pipelines: Talend, Informatica, SFTP, Data Quality, Latency Reduction, Performance Optimization

Data Modeling & Architecture: Dimensional Modeling, Star Schema, OLAP, Relational, Modeling

DevOps & Infrastructure: CI/CD (Jenkins), Version Control (Git, GitHub), Infrastructure as Code (CloudFormation)

Data Visualization & Analytics: Tableau, Power BI, Advance Excel

Soft Skills: Verbal & Written Communication, Customer Service Orientation, High Attention to Detail, Team Collaboration

CERTIFICATION

[AWS Certified Cloud Practitioner](#)

[Google Data Analytics Professional Certificate](#)

[Microsoft Certified: Azure Data Fundamentals](#)
