

Sahithi Jakkireddy

- jakkireddysahithi@gmail.com - jakkireddysahithi - +19173623486

TECHNICAL SKILLS

Programming Languages & Libraries: C/C++, C#, Angular, Java, Python, NumPy, Pandas, PySpark, REST/SOAP API, Predictive Analytics, Machine Learning (Scikit-learn, XGBoost, Naive Bayes, ARIMA), GenAI, Agentic AI, Matplotlib, Seaborn

Databases & Cloud Platforms: MySQL, PostgreSQL, Oracle, SQL Server Management System, Snowflake, Azure, Databricks, Data Lakes, BigQuery, Salesforce, AWS[S3, EC2, RedShift], Data Warehouses, Data Lake

Data Modeling: Power BI (DAX, Power Query, Row-Level Security), Tableau, Looker, Alterx, KPI Dashboard Design, Reporting Automation, Advanced Excel, Power Automator

Tools & Methodologies: Github, CI/CD, Microsoft Fabric, Apache Airflow, Kafka (Event Streaming, CDC & SCD)

Soft Skills: Collaboration, Communication, Problem-Solving, Adaptability, Attention to Detail, Time Management, Leadership, Analytical Thinking, Stakeholder Management, Documentation, Strategic Planning

PROFESSIONAL WORK EXPERIENCE

Data Engineer - Marriott Vacations Worldwide

05/2025 - Present

- Specializing in data engineering, analytics, and machine learning, Designed and optimized ETL/ELT pipelines[Incremental and Full Load], integrating data from various SaaS Platforms, real-time workflows, and scalable data platforms using Python, SQL, PySpark in Microsoft Fabric. Improved pipeline performance by 40% and enhanced report efficiency by 35%, delivering reliable, high-quality data for product, growth, and financial insights.
- Implemented CI/CD pipelines in Microsoft Fabric for automated deployment and testing of data workflows and ML models, improving reliability and reducing manual deployment effort by 50%.
- Engineered and deployed scalable ML models (XGBoost, Naive Bayes, ARIMA) integrated with Microsoft Fabric and Azure pipelines to forecast key business metrics, boosting predictive accuracy and operational efficiency by 30%.
- Developed and deployed advanced Power BI dashboards and semantic modeling for KPI visualization, A/B testing analysis, and event tracking, supporting executive decision-making and reducing manual reporting by 30%. Collaborated with stakeholders to define requirements, optimize schema and database design, and enforce best practices for scalable, reliable, and observable data pipelines.

Technical Analyst/Data Analyst - University of Missouri-Kansas City

04/2024 - 05/2025

- Performed data analysis on library and digital resource usage using Advance Excel using Power Query, maintaining 100% data accuracy and improving reporting efficiency by 30%.
- Managed metadata and cataloging workflows in Confluence and library systems, streamlining data accessibility and improving operational efficiency by 25%.
- Implemented process improvements and automation in data handling and data transformation, cutting data preparation time by 40% and enhancing workflow reliability.
- Developed interactive dashboards and reports in **Power BI**, visualizing circulation trends and resource utilization to support data-driven decisions, reducing manual reporting effort by 44%.

Success Engineer - Salesforce

08/2022 - 12/2023

- Software Developer with 2 years of experience in Salesforce development and administration, skilled in Agile practices and whiteboard sessions. Conducted training, presentations, and Knowledge Transfer Sessions (KTS), mentoring junior team members to enhance performance. Diagnosed and resolved complex production issues[Splunk, Kibana] for 10,000+ users, improving system stability and ensuring seamless deployment of new features.
- Developed, deployed and troubleshooted Chat Bots across multiple messaging channels based on client requirements, automating 60% of customer interactions, increasing engagement by 25%, and deployed on multiple messaging channels
- Developed custom Salesforce solutions using Apex, triggers, Visualforce, Lightning Components, and other tools, implementing features such as custom objects, fields, record types, validation rules, workflow automation, and reports to meet client-specific requirements—improving process efficiency by 35%
- Created interactive Tableau and Salesforce dashboards by fetching data using Mulesoft, providing actionable insights for business users and management, improving KPI tracking and decision-making efficiency.

Software Engineer Intern - Cognizant

01/2021 - 08/2021

- Engineered solutions in **Java, SQL,C and PL/SQL**, improving task efficiency by 30% and completing 15+ hands-on mini projects. Led group case studies and presented actionable solutions to senior managers, accelerating insights delivery by 40%. Processed and analyzed 500+ data points per project, enhancing project turnaround time by 20%.
- Enhanced technical competencies through structured workshops, increasing problem-solving accuracy by 25% across 10+ modules.

PROJECTS

- **Snowflake Healthcare Analytics Dashboard** Designed and deployed a Snowflake data warehouse integrating patient and resource datasets, with real-time data streaming via Kafka. Automated ETL workflows in Alteryx, cutting manual processing by 50%, and developed SQL transformations to forecast demand and calculate readmission rates with high accuracy. Built interactive Tableau dashboards to monitor ICU/bed occupancy and readmission risk, improving operational efficiency.
- **FinBot, A Chatbot :** Developed an enterprise-level chatbot to automate routine operational queries and capture structured and semi-structured business data (e.g., transaction updates, process status, KPI submissions). Leveraged Python and Pandas to clean and analyze data, applying ML models to identify trends, patterns, and actionable insights. Built real-time dashboards to support business performance, customer acquisition, and stakeholder decision-making, reducing manual query handling by 35% and improving team efficiency, data accuracy, and reporting speed.
- **Continuous Integration / Continuous Deployment Corporate pipeline,**Utilized AWS EC2 and S3 for hosting and deployment, enhancing application scalability and performance.Integrated Docker and Kubernetes for containerized deployment and management.Developed Jenkins pipelines for continuous integration and delivery, automating build, testing, and deployment processes.Configured Kubernetes clusters to manage resources and ensure efficient software delivery.
- **Sales Performance Analysis Dashboard,**Extracted and transformed sales data from multiple databases using SQL, and built visualizations in Power BI and ReactJS to track KPIs such as revenue growth, profit margins, and product performance. Analyzed spatial datasets and APIs to identify high-performing regions, optimizing regional inventory planning and improving marketing strategy effectiveness. Delivered actionable insights that forecasted increased regional sales by 25% and forecasted inventory turnover by 30%, and reduced overstock by 20%, enhancing overall operational efficiency. Utilized Python, R, and Scikit-learn for predictive analytics and data modeling to support data-driven decision-making.PowerBI,ReactJS,Python,R,Scikit-learn.

CERTIFICATIONS

Salesforce Certified AI Associate	Salesforce Certified Administrator
Salesforce Certified Service Cloud Consultant	AWS Certified Cloud Practitioner Link

ACHIEVEMENTS

- **Top 3 in SCB GBS Hackthon** by Standard Chattered Bank
- **Sparkling Star and Learning Paladin** certificate of appreciation in "ReCogNurize" challenge by Cognizant.
- **Customer Hero Accolite for resolving highly escalated issue on time preventing financial loss of 10 Million.**
- **3 star at leetcode.**

EDUCATION

University Of Missouri-Kansas City <i>Masters in Computer Science</i>	USA
Bhoj Reddy Engineering College For Women <i>Bachelors in Information Technology</i>	India

COURSEWORK

Data Structures & Algorithms, Data Science & Statistical Learning,Full Stack Development, Big Data Management,Cyber Security, Advance Software Engineering, Knowledge Graphs, Vector Databases, Emerging AI Tools Research
