

James Morimoto

2908 Hawk Ln SE, Olympia, WA 98501 | 360-561-9711 | James.Morimoto72@gmail.com

Objective

IT professional with skills utilizing Visual Studio to develop web applications using HTML, CSS, JavaScript, Node.js, and jQuery. Experience with the software development lifecycle and comfortable communicating with all personnel. The type of opportunity I'm looking for now is one that embraces innovative and collaborative thinking as a vehicle to improve business results.

Education

Bachelor of Science | Completed August 23, 2022 | University of Washington

- Major: Computer Science
- Minor: Mathematics

Skills

- Experience with PowerShell, Java, JavaScript, JSON, jQuery, Node.js, SQL, Scala, HTML, CSS, C, C#, ASP.NET.
- Experience developing and maintaining Web Forms and MVC applications.
- Experience using Team Foundation Server.
- Experience using a repository for source control with GitHub.
- Experience using Azure Devops to build and deploy applications.
- Experience with documentation and explanations of a code base.
- Great understanding of Excel, Word, and PowerPoint.
- Experience with Azure and Google Cloud Platform for hosting virtual machines or websites.
- Experience with using jQuery to pull data from an API and then display that to a web page.
- Experience with using Node.js to develop microservices within a single API and have those microservices available under different endpoints.
- Familiar with using JavaScript libraries (React).
- Experience using Agile methodologies during the development life cycle.
- Experience writing Unit Tests in C#.
- Salesforce CRM Administration, testing, and deployment.

WASHINGTON OFFICE OF SUPERINTENDENT OF PUBLIC INSTRUCTION | OCTOBER 2022 – PRESENT

- IT Application Developer::
 - o Performed front and back end maintenance to ASP.NET applications.
 - o Created new reports using C# and ASPX that are used by hundreds of school districts in Washington State.
 - o Redesigned and updated an application that is used by parents of Washington State school students.

- o Used SQL to generate queries, transformed the data using C# and displayed the data using RadGrids to dynamically display and update the data on postbacks.
- o Upgraded applications to Domain Driven Design.
- o Transitioned Web applications from Team Foundation Server to Azure DevOps.
- o Created SQL stored procedures and tables to efficiently house and update hundreds of thousands of records.
- o Applied and tested software updates to ensure system compliance and security.

ALLIANCE ENTERPRISES, INC. | JUNE 2019 – OCTOBER 2020

- Technical Intern:
 - o Played an integral role in the migration from Team Foundation Server to Azure DevOps.
 - o Created automation, system security and filter rules within Salesforce CRM.
 - o Salesforce CRM administration.
 - o Assisted with the automation of monthly reports by using PowerShell to export data to an Excel spreadsheet.
 - o Used PowerShell to create Web and SQL servers on Azure that would be used to store customer data.
 - o Created DSC (Desired State Configurations) scripts to enforce specific configurations on all Web and SQL servers.
 - o Used Azure DevOps to build and deploy a PowerShell module to some Virtual Machines within the internal network.
 - o Made use of Power BI to graph and analyze data.
