

JAMES WAN

Master of Science in Computer Science

jimmywwan@yahoo.com // (240) 413-9664 // US Citizen

Objective: Seeking a Software Engineering position

RELEVANT EXPERIENCE

5/6/2024 – 8/6/2024

Frontend Developer, Intern, GBCS Group, Calgary, Canada

- Worked on applications and website, including development, enhancements, debugging and testing using React and NextJS for the code and applications.
- Worked in a team environment, ensured deliverables are on track with both independent tasks and collaboration with teammates.

PROFESSIONAL EXPERIENCE

3/31/2025 - 5/23/2025

IBM z/TPF Assembler Developer, Trainee, GenSpark, Atlanta, Georgia

- Learned about the history, components, and concepts of IBM z/TPF.
- Used instructions and operations in examples and exercises.
- Learned syntaxes of programs and macros.

5/6/2024 – 8/6/2024

Frontend Developer, Intern, GBCS Group, Calgary, Canada

- Worked on applications and website, including development, enhancements, debugging and testing using React and NextJS for the code and applications.
- Worked in a team environment, ensured deliverables are on track with both independent tasks and collaboration with teammates.

6/20/2023 – 8/18/2023

Digital Marketing, Intern, GAO Tek USA, New York, USA

- Created product pages and videos about the company's products.
- Answered questions about the company's products.

4/29/2018 – 5/27/2018

Business Marketing, Intern, Community Center Shanghai, China

- Internship took place while I was in an international school in Shanghai. My father was on a 3-yr international leadership assignment there with his company.
- Created online brochures, guides, and forms for events and activities on websites.
- Attended conference meetings to plan for weekly schedules and tasks.

EDUCATION

Aug., 2023 – Dec., 2024

Computer Science (MS), East Carolina University, Greenville, NC

Highlight of coursework: Machine Learning, Digital Image Analysis, Design and Analysis of Algorithms, Software Testing, Big Data Analytics and Management, Cloud Computing, Data Mining, Software Requirements Engineering, Data Visualization and Communication.
GPA: 3.5

Aug., 2019 – May, 2023

Computer Science (BS), University of Delaware, Newark, DE

Highlight of coursework: Machine Organization and Assembly Language, Data Structures, Automata Theory, Computer Science I & II, Analytic Geometry & Calculus I, II, and III, Statistical Methods, Discrete Mathematics I, Database Systems, Ordinary Differential Equations, Operating Systems, Computer Architecture, Engineering Mathematics, Parallel Computing, Computer Applications, Senior Design Project I and II (Electric-Viz)

Sep., 2016 – Jun., 2019 Concordia International School, Shanghai, China

Sep., 2015 – Jun., 2016 Fayetteville-Manlius High School, Manlius, NY, USA

Sep., 2011 – Jun., 2015 Eagle Hill Middle School, Manlius, NY, USA

ADDITIONAL INFORMATION / INTERESTS

- My interests, coursework, and projects in Computer Science helped me develop skills and gain experience. I am seeking a position to apply my knowledge and experience in delivering results for the organization. I am a team player and risk taker and always look for constant feedbacks and improvements.
- Born and raised in the States. Spent 3 years in Shanghai (High School) while my father was an expat there. I can read and speak Mandarin (Level 3). Also took Spanish classes in middle and high schools (Level 2).
- I enjoy singing, choir, chorale, and mini plays. I also had karate training for about 8 years.

SKILLS

- Python, Java, C, C++, C#, JavaScript, HTML, CSS, Cypher, TypeScript, R, RStudio, React.js, Hadoop, Apache Spark, Apache Spark SQL, MATLAB, Next.js, and Rust.
- Shell scripting in Linux and Unix, applying and analyzing algorithms, unit testing, databases, and data visualizations.
- Object Oriented Programming and debugging.
- Python libraries: Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow, PyTorch, and PyTorch Lightning.
- Email, Google Drive, Google Docs, Google Slides, and Google Sheets
- Stakeholders, requirements (functional, non-functional, SRS), user stories, use cases, and use case diagrams
- Experience with OpenAI (ChatGPT)
- Agile methodology and SDLC
- Google Cloud, Docker, and VertexAI for cloud services
- SQL, MongoDB, and PostgreSQL for databases
- Microsoft Word, PowerPoint, Excel, Outlook, Teams, Zoom, GitHub, Visual Studio Code, Node.js, Android Studio, Neo4j, Tableau, Eclipse IDE, and Oracle.
- Experience with social media: Facebook, Messenger
