

Java Full Stack Developer

Name: Janani Gopi

Ph.no: +1 (512)-924-4100

LinkedIn Id: www.linkedin.com/in/jananigopi

Email id: jananigopi0301@gmail.com

PROFESSIONAL SUMMARY

- Proficient **Java Full Stack Developer** with 3 years of experience, skilled in **Spring, Spring IOC, Spring Security, Hibernate ORM**.
- Great understanding of core concepts like **Object-Oriented Programming (OOP), Aspect-Oriented Programming (AOP), Functional Programming (FP)** with versions like **Java 17/18/19/20/21**.
- Developed high-performance **RESTful APIs** and **SOAP APIs** for enterprise-level, high-traffic applications.
- Front-end expertise with technologies including **React 18+, Angular 17+, HTML5, CSS3, Bootstrap, JavaScript (ES6+), Material UI, jQuery, AJAX, SASS/SCSS, Tailwind CSS**.
- Skilled in **TypeScript** and various JavaScript build tools like **Vite, Webpack**, and other bundlers on the client side.
- Strong backend development skills in **Java, Node.js/Express.js, Python, Golang**, with experience in **PL/SQL**, building scalable systems with precision.
- Extensive experience in **Spring Framework** modules such as **Spring MVC, JDBC, JTA, Spring Boot, Spring Microservices, Spring REST, Spring Eureka, Netflix OSS**.
- Proficient in database design and architecture with **Oracle, MS SQL, MySQL, PostgreSQL**, and NoSQL databases such as **MongoDB, Firebase, DynamoDB, Cassandra**.
- Proficient in project management and documentation tools like **JIRA, Confluence, Swagger, Grafana, JSDoc**.
- Extensive experience with cloud platforms including **AWS (EC2, ECR, ECS, IAM, EKS, RDS, Lambda, S3, CloudWatch, SQS, Route 53, SNS, CloudFront), Azure, and GCP**.
- Skilled in managing messaging systems with tools like **Apache Kafka, ActiveMQ, RabbitMQ, Spring JMS**.
- Implemented security protocols like **LDAP, OAuth 2.0, Spring Security, JWT** for token-based authentication.
- Managed **Kubernetes** for scalable container deployments, using **Terraform** for infrastructure as code.
- Expertise in **GraphQL, GraphDB, Solr** for efficient queries, complex data relationships, and high-performance search functionality.
- Experience using **gRPC** and **Java RMI** for distributed communication and remote method execution.
- Proficient in developing and executing test cases with **JUnit, Mockito, Jasmine, Karma, Jest, Enzyme, Selenium, Cucumber**.
- Skilled in version control using **Git-based tools (GitHub, GitLab, Bitbucket)**, with proficiency in building automation using **Maven, Gradle**.

TECHNICAL SKILLS

Backend Technologies	Core Java, Java 17/21 EJB, gRPC
Frontend Technologies	HTML5, CSS3, XSLT, SAX, DOM, JavaScript, XPath, AJAX, jQuery, Angular 17+, React JS, Bootstrap, Typescript, Tiles
Methodologies	Agile, Waterfall, TDD, Scrum
Frameworks	Spring, Spring MVC, Spring Boot, Spring Data, Spring Batch, Spring cloud, Hibernate
Messaging Services	Kafka, Rabbit MQ, IBM MQ, JMS
Databases/Tools	Oracle (11g/10g/9i), NoSQL (Cassandra, Firebase), SQL Server, DB2, MySQL, PostgreSQL
Design/Version Control	UML, CVS, SVN, VSS, GIT, Bitbucket
Project Management	JIRA, Rally
Build & Configuration Tools	Ant, Maven, Jenkins, NPM, PNPM, Vite
Testing Tools	Junit, Mockito, Jasmine, Karma, Protractor
Cloud / DevOps Tools	AWS (EC2, RDS, S3, Lambda), Azure, GCP, PCF, Kubernetes, Docker, Docker Swarm, Hadoop, Splunk

PROFESSIONAL EXPERIENCE

Client: Cigna, RI

Jan 2024 -Present

Role: Java Full Stack Developer

Responsibilities:

- Implementing advanced optimization techniques in Angular with Typescript, resulting in improvement of web application speed and responsiveness.
- Built a new front-end from scratch using **HTML5, CSS3, JavaScript, jQuery, Bootstrap, AngularJS**, and **GraphJS**.
- Developed **microservices** architecture using **Spring Boot**, enabling the development of independently deployable and scalable services, enhancing agility and flexibility in software development.
- Utilized **Spring Core** Annotations, **Spring MVC** for REST APIs, and Spring Boot for Microservices development.
- Analyzes design and determines coding, programming, and integration activities based on general objectives and overall architecture of product or solution using **Java 17+**.
- Utilized **NgRx** and **RxJS** for state management, aligning with **Agile** and **Kanban** methodologies for rapid, responsive development.
- Involved in Analysis, Design and Development of the project. Designed and developed web-based software using Java Server pages (**JSP**) framework, **Spring MVC** Framework, and **Spring Web Flow**.
- Developed application service components and configured beans using **Spring IoC**, creation of **Hibernate** mapping files and generation of **database schema**.
- Migrated from Spring MVC to **Microservice** architecture. Used **JUnit** for testing the web application.
- Managed **AWS EC2** for scalable web applications and **S3** for secure storage, integrating **AWS Lambda** with API Gateway for serverless **Python** and **Node.js** scripts.
- Executed integration tests with **JUnit** and **Mockito**, verifying the interactions between different modules and ensuring seamless integration.
- Implemented **Swagger** for API documentation, generating interactive and comprehensive documentation for **RESTful** APIs, enhancing API usability and developer experience.
- Configured advanced monitoring and logging systems using **ELK Stack (Elasticsearch, Logstash, Kibana)**, Prometheus enabling proactive issue detection and resolution in financial operations.
- Understanding authentication and authorization mechanisms, including **OAuth 2.0** and **JWT**.

Client: Shreeji Infosoft Pvt. Ltd. India

May 2022 - July 2023

Role: Java Developer

Responsibilities:

- Involved in various phases of Software Development Life Cycle (**SDLC**) of the application like requirement gathering, Design Analysis, and Code development.
- Developed the end-to-end design, development, and testing of web applications using a modern tech stack: **HTML5, CSS3, Bootstrap, SCSS, SASS, Node.js** with **EJS** template engines.
- Used Java Messaging Services (**JMS**) for reliable and asynchronous exchange of information reports as JMS XML messages.
- Employed Spring core annotations for dependency injection, Inversion of Control (IOC), and Spring MVC components
- Implemented the business layer using Hibernate with Spring DAO, developing mapping files and POJO Java classes.
- Worked with REST Api's using **Postman Tool** and Automating the Test cases of API using Java and SoapUI.
- Migrated Java based API to Mule based API by implementing the API logic in Mule ESB.
- Implemented logger for debugging and testing purpose using **Log4J**.
- Involved in creating tables and writing stored procedures using **PL/SQL**.
- Involved in deploying **Servlets, JSP's** in Web Sphere application and in code versioning using SVN.

EDUCATION

Master of Science in Information Systems

University of Mary Hardin Baylor | Aug 2023 – May 2025

Bachelor of Technology in Computer Science

Siddhartha Institute of Science and Technology | Aug 2019 – May 2023
