WORK EXPERIENCES

Jade Business Services

New Jersey, USA

Junior Data Engineer

Aug 2023- Present

- Engineered high-performance data pipelines with Azure Data Factory and Databricks, improving ingestion times by 40% and enabling real-time access for analytics.
- Developed and implemented data models following Star and Snowflake schemas in Azure Synapse Analytics, improving query efficiency by 30% and data accessibility for Business Intelligence.
- Automated ETL processes with Azure Data Factory, enabling seamless extraction, transformation, and loading of data into Azure SQL Database and Azure Cosmos DB, improving operational data accuracy by 60%.
- Integrated Kafka-based real-time streaming solutions for capturing live event data, improving monitoring capabilities, and minimizing latency by 50% in customer applications.
- Optimized Spark jobs for data transformation, leading to significant reductions in processing times by 45% for large datasets stored in Azure Data Lake.
- Orchestrated workflows using Apache Airflow, reducing smooth execution of batch jobs by 25% and timely data delivery for stakeholders, supporting better decision-making with fresh data.

Data Engineer Intern

Feb 2023 - May 2023

- Constructed an end-to-end ETL pipeline using AWS Glue and Lambda for processing large-scale transactional data from S3 to Redshift, improving data throughput by 35% integrating Airflow for orchestration.
- Engineered a real-time data streaming solution using Kafka to capture and process click stream data, enhancing customer experience by reducing response speed by 40% in high traffic scenarios.
- Refined data ingestion pipelines from external APIs to AWS Redshift using AWS Glue, ensuring accurate and timely data availability for reporting and reducing manual data processing efforts by 70%.
- Implemented data wrangling and cleaning procedures in PySpark to process large datasets in Hadoop and Spark, reducing data preparation time by 60% for analytics teams.
- Collaborated with data science teams to build machine learning models using Tensor Flow and Pytorch, accelerating the model training process by leveraging S3 and Elasticsearch for distributed storage and search optimization.

Align Technology

New York, USA

Data Analyst Intern

May 2022 - Aug 2022

- Created interactive Power BI dashboards visualizing operational KPIs sourced from SQL Server and MySQL, accelerating decision-making time by 25%.
- Performed data cleaning and transformation on 5M+ records using Pandas and NumPy, automating workflows and improving financial reporting accuracy by 15% for stakeholders.
- Automated report generation with Jupyter Notebook and Looker, reducing manual effort by 15 hours/week and improving data access efficiency by 30%.
- Applied Exploratory Data Analysis (EDA) techniques with Python to uncover critical insights on sales trends, improving revenue by 12%.
- Leveraged Azure SQL Database to store and manage large datasets, achieving a 40% improvement in query performance through index tuning and enhancing report generation speed and overall system efficiency.

Adani

India

Data Analyst

Aug 2020 - Jul 2021

- Conducted data analysis on customer data using SQL and Python, identifying trends that improved customer retention strategies by 10 % and helped streamline marketing efforts, increasing campaign efficiency by 15%.
- Streamlined financial reporting by designing and implementing dashboards in Power BI, saving the finance department over 15 hours per month in manual reporting tasks.
- Built data cleaning and wrangling pipelines using Pandas and NumPy, preparing data for machine learning models and enhancing predictive accuracy by 15%.
- Executed in-depth analysis of sales data and created reports using SQL Server, helping senior management make data-driven decisions to improve sales strategies by 12%.

TECHNICAL SKILLS

- Programming Languages:** Python, SQL, PySpark, R, C++, Java, HTML.
- Data Warehousing Platforms:** Redshift, Azure Synapse Analytics, DynamoDB, Big Query, SQL Data Warehouse
- Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Stat models, Plotly, Scipy, Keras, Tensor Flow, Pytorch.
- Processing and Orchestration:** Airflow, Kafka, Lambda, S3, Glue, Elasticsearch, Snowflake.
- Cloud Platforms:** AWS (S3, Redshift, RDS, Lambda, Glue), Azure (Data Lake, Synapse, SQL Database), GCP (Big Query)
- Databases:** Relational (MYSQL, PostgreSQL, Oracle, SQL Server), NoSQL (MongoDB)
- Big Data Technologies:** Hadoop, Spark
- Analytics & Business Intelligence:** Tableau, Power BI, Looker, Jupyter Notebook, Jira
- ETL Tools:** Azure Data Factory, AWS Glue
- Agile Methodologies:** Scrum, Kanban

CERTIFICATIONS

- Microsoft Certified Azure Data Engineer Associate
- Microsoft Certified Azure Administrator Associate

EDUCATION

New York University, Tandon School of Engineering

New York, USA

MS Computer Engineering; GPA: 3.72/4

May 2023

Courses: Machine Learning, Probability and Stochastic process, Big Data, Deep Learning, Database management systems.

Vellore Institute of Technology

Vellore, IN

B. Tech Electronics and Communications; GPA: 8.84/10

Jun 2021

Courses: Neural Networks, Statistics, Linear Algebra, Object-Oriented Programming, Probability Theory, and Random Process.
