EDUCATION

University of Florida

Bachelor of Science in Computer Science - GPA: 3.3

Gainesville, FL

Jun. 2021 – Dec. 2025

EXPERIENCE

Undergraduate Machine Learning Research Assistant

Aug. 2025 – Present

University of Florida

Gainesville, Florida

- Trained classification models on resume and GPA data using scikit-learn to predict internship outcomes
- Built pipelines to extract and transform resume features into structured, model-ready inputs
- Conducted exploratory data analysis and statistical testing to identify factors correlated with hiring decisions
- Cleaned and visualized data using pandas, matplotlib, and seaborn to support analysis

Software Engineering Intern

May 2025 – Aug. 2025

Frag AI

Tampa, Florida

- Developed computer vision video clipping software that saved creators an average of 60+ hours a month
- Built a UI in React to handle interactions across 3 distributed servers using states and hooks.
- Integrated backend with Stripe, Clerk, and AWS to support secure payments and authentication for 1500+ users
- Deployed servers with AWS ECS + Fargate and served 200K+ media assets via S3 and CloudFront
- Created FastAPI webhooks and WebSockets for real-time video processing and instant user feedback

Software Engineering in Test Intern

Jan. 2025 – Apr. 2025

Pilot

Austin, Texas

- Developed and executed 75+ test plans and test scripts to ensure software quality and uphold site security
- Conducted functional, regression, and exploratory testing between releases, identifying bugs and usability issues
- Logged 45+ software defects using JIRA and Notion to ensure timely resolution and improved product stability
- Reviewed business requirements and collaborated with the developer and customer teams to resolve edge cases

Data Annotator for Software Development

Dec. 2024 – Present

Data Annotation Tech

Remote Freelancing

- Designed detailed rubrics to train LLMs on software tasks across Python, Java, JavaScript, SQL, and C++
- Built internal web apps with React and Vite, used for testing model behavior and constraint adherence
- Improved LLM code reliability by systematically identifying alignment failures in training outputs
- Benchmarked AI agents on ML and research tasks, developing metrics to quantify performance and reliability

PROJECTS

E-Market | Django, Flask, Bootstrap, PostgreSQL, AWS, OpenAI

Nov. 2024 – Dec. 2024

- Built a Django E-commerce app with Bootstrap and JavaScript for streamlined orders, tracking, and management
- Integrated Stripe Payments to enable secure and accurate transactions across 500+ regions in the U.S
- Created an interactive blog web application using Flask, JavaScript, HTML, and CSS, enhancing user engagement
- Implemented an AI assistant to guide users with site navigation and provide problem-solving support

AidLink | Next.js, Tailwind, TypeScript, Node.js, Vercel, PostgreSQL, AI/ML

Oct. 2024

- Secured first place at the 2024 UF/IBM AI Days Hackathon, standing out among 250+ participants
- Created a Next.js app with IBM Watson AI to create a disaster response system
- Engineered a phone prompt using IBM Watson AI, Twilio, and Geo-location API to streamline request creation
- Integrated Google Maps with a Heatmap feature to visualize and identify areas with high volumes of requests

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL, JavaScript, TypeScript, HTML/CSS, MATLAB, Shell, Bash

Frameworks: Flask, Django, Next.js, Tensorflow, PyTorch, Express, Celery

Developer Tools: Docker, AWS, PostgreSQL, NoSQL, Redis, Vite, Ollama

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, React, Tailwind, LangChain

Concepts: APIs, Git, Full Stack, Backend, Frontend, CI/CD, Agile, Cloud, RAG, Machine Learning, Data Science

ADDITIONAL INFORMATION

Awards: 2024 UF/IBM AI Days Hackathon 1st Place Winner
