PROFESSIONAL SUMMARY

Data Analyst with 3 + years of global experience transforming complex datasets into business insights that drive operational and strategic improvements. Skilled in **SQL, Python, Power BI, and Tableau** for building automated data pipelines, dashboards, and predictive models that enhance decision-making and KPI visibility. Proven ability to reduce reporting time by 60 %, improve forecasting accuracy by 25 %, and automate manual workflows to save 25 + hours monthly. Adept at collaborating with cross-functional stakeholders to develop data-driven solutions that improve efficiency, scalability, and business performance.

PROFESSIONAL EXPERIENCE

Data Analyst | Rishi Inc | United States | Mar 2024 – Present

- Developed and automated **Power BI dashboards** tracking key financial and operational KPIs, cutting manual reporting time by **45%** and improving real-time visibility for stakeholders.
- Designed and maintained **SQL pipelines** integrating data from Salesforce, ERP, and internal systems, increasing reporting accuracy by **30%**.
- Built **Python-based ETL scripts** for data cleaning, transformation, and validation, improving efficiency of data refresh processes by **35%**.
- Conducted **ad-hoc analysis** to support leadership decisions on performance optimization and cost reduction initiatives.
- Collaborated cross-functionally with finance, supply chain, and operations teams to define metrics, validate results, and present findings through clear visual stories.
- Implemented data quality checks and documentation practices ensuring data consistency across reporting layers.

Data Analyst | Pioneer Auto World Pvt Ltd | Guntur, India | Aug 2021 – Dec 2022

- Designed and maintained **SQL and Excel-based pipelines** consolidating 40K+ sales, service, and inventory records across 3 branches, reducing daily data prep time by **60%**.
- Built **automated dashboards** in Tableau and Google Sheets to monitor KPIs such as technician efficiency and service throughput, increasing visibility into branch performance by **40%**.
- Applied **time-series forecasting** to predict parts demand and service volume, improving staffing and inventory accuracy by **25%**.
- Developed Excel-based **reorder models** that reduced emergency procurements by **35%** and maintained optimal stock levels across all branches.
- Automated monthly reporting through **SQL scripts and macros**, reducing report preparation time from 3 hours to 20 minutes and improving accuracy by **98%**.
- Delivered data-driven insights on procurement and service cycles, contributing to **\$28K in quarterly cost savings**.
- Partnered with operations managers to standardize **12 key KPIs**, improving consistency and reliability of performance tracking across locations.
- Introduced **ad-hoc SQL and Tableau reporting** that accelerated leadership decision-making during supply shortages, cutting response time by **20%**.

Data Analyst Intern | Pioneer Auto World Pvt Ltd | Guntur, India | Jun 2019 – Jul 2021

- Collected, cleaned, and validated multi-branch service and sales data in Excel and Google Sheets, ensuring accuracy and readiness for analysis.
- Built **pivot-table dashboards** and visual reports that helped managers track technician performance and identify bottlenecks in service operations.
- Applied advanced Excel functions (**VLOOKUP, IF**) to automate spare-parts tracking, reducing manual data errors by **20%**.
- Queried service demand patterns using **SQL**, improving staffing allocation during peak periods.
- Contributed to **preventive-maintenance analyses** that increased on-time service completion by **15%**.
- Created **Excel-based escalation triggers** to monitor overdue service requests, cutting delays by **18%** within three months.
- Documented data-handling procedures and assisted senior analysts with onboarding materials, speeding up new-intern training by **30%**.

PROJECTS

Off-task Behaviors in the Classroom (Machine Learning, Computer Vision, Python, Pandas, Matplotlib, Flask, Tableau) | [GitHub](#)

- Analyzed 27K + behavioral records using EDA and trained models (Random Forest, SVM, Gradient Boosting) to predict off-task behaviors.
- Built a real-time **Flask web app** with Tableau dashboards, improving engagement-monitoring accuracy by **20 %**.
- Tuned model hyperparameters to improve F1-score by **12 %** and supported early-intervention strategies for educators.

Baltimore Crime Analysis (Geospatial Data Analysis, Data Visualization, Python, Tableau, Reporting Automation) | [GitHub](#)

- Analyzed 1M+ emergency call records to identify geographic and temporal crime trends.
- Built interactive dashboards showing trends by time and location, contributing to a 15% improvement in public safety resource allocation.
- Automated weekly crime reports using Python scripts reduced manual report generation time by 90%.

Predicting F1 Lap Times Using FastF1 and ML (Python, FastF1, scikit-learn, pandas, matplotlib) | [GitHub](#)

- Built a **regression model** to predict Formula 1 lap times using telemetry data with engineered features (AvgSpeed, Throttle).
- Achieved **93% R² score** and **0.42 MAE**, with visualization of feature importance and prediction accuracy.
- Enabled **multi-driver, multi-session analysis**, reducing analysis turnaround time from 30 minutes to **under 5 minutes per session**.

SKILLS

- Programming & Analytics:** SQL, Python, R, Advanced Excel
- Data Visualization:** Power BI, Tableau, Google Sheets, Plotly, Matplotlib, Seaborn
- Data Engineering & Automation:** ETL Pipelines, dbt, Apache Airflow, Pandas, NumPy, Reporting Automation
- Database Management:** SQL Server, MySQL, PostgreSQL, Oracle, Snowflake
- Statistical Modeling:** Regression, Forecasting, Time Series, A/B Testing, Hypothesis Testing
- Cloud & Platforms:** AWS (S3, Redshift, Lambda), Google Cloud Platform
- Tools & Collaboration:** Git, Docker, Jira, Flask, FastAPI, VS Code, ERP Systems (SAP, NetSuite)

EDUCATION

Master of Science in Information Systems

University of Maryland, Baltimore County (UMBC), Baltimore, MD

Relevant Coursework: Data Analytics, Information Systems Design, Machine Learning, Big Data Analytics

Bachelor of Technology in Automobile Engineering

Hindustan Institute of Technology and Science, Chennai, India
