

JASWANTH

Senior Data Analyst

+1 (216) 457-2310 | vj.chowdary@outlook.com |

<https://www.linkedin.com/in/jaswanthveeramachaneni/>

Microsoft Certified: Power BI Data Analyst Associate

PROFESSIONAL SUMMARY

Results-driven **Senior Data Analyst** with **6 years of experience** delivering actionable insights from complex **healthcare, financial, and operational datasets**. Expert in **Power BI, Tableau, Looker, SQL, Python (Pandas, NumPy, scikit-learn), PySpark, Databricks, Azure, AWS, Snowflake, MongoDB, and Salesforce CRM**. Proven success in **claims analytics, population health, HEDIS/CMS Stars, predictive modeling, and reporting automation**. Skilled in **ETL design, data integration, dimensional modeling, and audit-ready reporting** ensuring regulatory compliance and data governance standards. Strong background in **financial analytics** including **budget forecasting, grant utilization, and revenue cycle optimization**. Collaborative partner with cross-functional teams to drive **operational efficiency**, optimize **resource allocation**, and enable **data-driven decision-making**.

CORE COMPETENCIES

- **Programming & Data:** Python, SQL, R, DAX, MATLAB, PL/SQL, Spark SQL (Databricks), Data Mappings
- **Databases:** MySQL, MS SQL Server, PostgreSQL, Snowflake, Amazon RDS, MongoDB, MS Access
- **Visualization & BI Tools:** Power BI, Tableau, Looker, Advanced Excel
- **Frameworks & Tools:** Flask, Azure Databricks, Apache Airflow, SAS, SSIS, Spark, Jenkins (CI/CD)
- **Cloud Platforms:** AWS (S3, Glue, Redshift, Athena, EMR, Lambda), Azure (Data Factory, Synapse Analytics)
- **Financial Analytics:** Revenue Cycle Optimization, Grant Utilization, Budget Forecasting, Cost-Benefit Analysis, Expenditure Tracking, Audit & Compliance Reporting
- **Healthcare Analytics:** Medicare Part D, Stars Reporting, Healthcare Claims Analysis, EHR/EMR Data Integration, Population Health, HEDIS/CMS Ratings, Quality Metrics, Patient Outcomes Analytics
- **Business & Communication Skills:** Stakeholder Communication, Client Presentations, Cross-Functional Collaboration, SOP Development, Audit-Ready Documentation, Regulatory & Compliance Alignment

PROFESSIONAL EXPERIENCE

Senior Data Analyst

Great River Clinic/Vass – Blytheville, AR | *Jan 2025 – Present*

Responsibilities:

- Developed 50+ interactive **Power BI dashboards** integrating **EHR/EMR data**, providing executives with insights that improved **patient satisfaction scores by 15%**, reduced **readmission rates by 8%**, and enhanced overall care quality monitoring.

- Built and optimized 20+ advanced **SQL stored procedures** processing over **5 million ICD-10 and CPT coded records**, achieving 99.9% accuracy in **Medicare/Medicaid claims reporting** and ensuring full **HIPAA compliance**.
- Leveraged **Databricks Spark SQL** to analyze **10M+ Medicare Part D and Medicaid claims**, identifying reimbursement inefficiencies that led to a **12% improvement in payment accuracy** and detection of potential **fraud cases worth \$500K+**.
- Applied **predictive modeling** to **population health datasets** covering 500K+ beneficiaries, improving **HEDIS measure performance by 10%**, increasing **medication adherence rates by 7%**, and contributing to a higher **CMS Star Rating**.
- Integrated **Salesforce CRM** with **Databricks and Power BI** to consolidate **50K+ patient outreach interactions** and **provider performance metrics**, enabling real-time monitoring of **preventive screenings** and improving audit trail accuracy by 35%.
- Partnered with 5+ cross-functional teams including clinicians, compliance officers, and IT staff to deliver **audit-ready analytics** that passed **100% of CMS and state healthcare inspections**.
- Designed financial **Power BI dashboards** to monitor **\$10M+ in annual grant utilization, budget forecasting, and revenue cycle performance**, improving leadership's ability to allocate funds effectively and reducing budget variance by 9%.
- Engineered **SQL-driven reconciliations** across **\$3M+ in donor contributions, \$5M in government grants, and \$2M in pharmacy expenditures**, producing 99.9% accurate **financial reports** that consistently passed external audits.
- Conducted **ROI and cost-benefit analysis** in **Databricks Spark SQL**, linking clinical outcomes with **financial KPIs**, resulting in a **15% increase in reimbursement efficiency** and better alignment of funding with patient services.
- Implemented **ETL automation pipelines** that reduced manual report preparation time by 35% and shortened ad hoc financial request turnaround by 40%, saving approximately **200 staff hours annually** and improving **grant compliance tracking**.
- Applied advanced **Excel (PivotTables, VLOOKUP, nested formulas)** with **SQL** to reconcile 10+ disparate data sources, ensuring accuracy across **\$7M in claims revenue, pharmacy costs, and provider reimbursements**, strengthening forecast reliability.
- Automated **Salesforce workflows** to track **\$5M+ in donor contributions and grant allocations**, reducing manual updates by 40% and ensuring complete **audit readiness for external funding agencies**.

Graduate Data Analyst

Cleveland State University – Cleveland, OH | *Oct 2023 – Jan 2025*

Responsibilities:

- Engineered **ETL workflows** using **Python (Pandas), Apache Airflow, and Azure Data Factory**, integrating **EHR/EMR and claims datasets**, improving **data ingestion accuracy by 60%** and supporting **population health research**.
- Performed advanced **SQL analyses** on over **1M patient records**, identifying trends that improved **patient retention by 15%** and enhanced **chronic disease management initiatives**.
- Developed interactive **dashboards** in **Looker and Tableau**, consolidating data from **Azure Synapse and Snowflake**, enabling real-time tracking of **population health metrics and quality program performance**, reducing reporting delays by 40%.
- Built **PySpark pipelines** on **Azure Databricks**, automating **clinical data transformations** while ensuring **HIPAA compliance** and supporting **Medicare and managed care reporting**.

- Applied **dimensional modeling** and **normalization/denormalization techniques** to structure **healthcare datasets**, improving **reporting accuracy** and scalability for **population health analytics**.
- Collaborated with **clinicians, IT staff, and compliance teams** to validate **Medicare** and **managed care datasets** for over 500K members, enhancing **reporting accuracy** and supporting **audit readiness**.
- Designed **ETL workflows** for **financial datasets**, including **departmental budgets, grant allocations, and research funding**, increasing **data ingestion reliability** by 60%.
- Executed **SQL analyses** on over **1M financial records**, identifying **budget trends**, optimizing **fund allocation**, and **forecasting accuracy** by 15%.
- Built **dashboards** in **Looker** and **Tableau** for **financial KPIs, revenue cycle monitoring, and grant utilization**, reducing reporting turnaround by 40%.
- Developed **PySpark pipelines** for **financial data transformations and reconciliations**, ensuring **GAAP compliance** and **audit readiness**.
- Applied **dimensional modeling** and **normalization** to **financial datasets**, improving **reporting accuracy** and supporting **grant compliance** and **budget monitoring**.
- Produced **technical documentation** and **data mappings**, aligning **financial reporting standards** with **departmental and grant requirements** to strengthen **regulatory compliance** and **data governance**.

Data Analyst,

Sri Chandra NMR Aquatech - Andhra Pradesh, India | Jul 2021 – Jul 2023

Responsibilities:

- Built **predictive models** with **Python (scikit-learn)** and **AWS Lambda**, improving **patient supply forecasting accuracy** by 30% and optimizing **medical equipment delivery** for over 50 hospital units.
- Automated **ETL workflows** using **SQL, Apache Airflow, and PostgreSQL on AWS**, processing **100K+ healthcare records** monthly, ensuring **data quality** and supporting **hospital inventory management**.
- Developed **Power BI dashboards** integrating **Snowflake** and **MongoDB**, enabling real-time monitoring of **population health metrics** and **clinical supply performance** for 10+ departments.
- Implemented **anomaly detection algorithms**, reducing **medical supply routing errors** by 20% and enhancing overall **operational efficiency**.
- Applied **statistical learning** and **machine learning algorithms** to optimize **hospital resource allocation**, reducing operational risks in critical supply chains.
- Designed **Salesforce CRM dashboards** to monitor **purchase orders, invoicing, and service requests**, providing executives with a unified view of **financial operations** across multiple projects.
- Developed automated **Salesforce reports and workflows**, streamlining **financial pipeline tracking** and improving **client response times** by 25%.
- Built scalable **data pipelines** with **Amazon EMR** and **Amazon Redshift** for **data warehousing** and **financial analytics**, enabling accurate **budgeting and expenditure tracking** across \$2M+ in monthly transactions.
- Conducted **SQL analyses** and predictive modeling to optimize **inventory costs**, monitor **shipment revenue**, and identify financial discrepancies, improving **forecasting accuracy** by 15%.
- Collaborated with cross-functional teams to translate **business and financial requirements** into **analytics solutions**, leveraging **statistical analysis** and **predictive modeling** to support **budgeting, expense planning, and financial decision-making**.

Data Analyst

Daksha Technologies – Telangana, India | Jul 2019 – Jun 2021

Responsibilities:

- Developed large-scale **data pipelines** using **Python (Pandas, NumPy)** on **AWS Lambda**, improving **financial record accuracy** across 250K+ transactions and supporting scalable reporting.
- Constructed optimized **SQL queries** with **CTEs**, **window functions**, and **nested subqueries** on **MySQL**, enhancing performance of **financial reporting systems**.
- Built interactive **Power BI dashboards** with **DAX calculations** and **custom visuals**, delivering real-time insights on **financial KPIs**, **revenue tracking**, and **budget utilization**.
- Documented, scheduled, and maintained recurring **ETL workflows** using **Apache Airflow** and **AWS Glue**, reducing manual reporting effort by 40% and ensuring timely **access to financial datasets**.
- Developed advanced **SQL scripts** and optimized **ETL pipelines** to support **expense tracking**, **invoicing accuracy**, and **revenue cycle monitoring**.
- Implemented **Salesforce CRM reporting** and automated **data extracts** into **AWS pipelines**, reducing reporting delays by 30% and improving **financial process transparency**.
- Conducted **data profiling**, **validation**, and **cleansing** using **SQL** and **Python (Pandas, NumPy)**, ensuring **high-quality financial data integrity** across multiple systems.
- Collaborated with cross-functional teams to translate **business and financial requirements** into **BI and analytics solutions**, supporting **budget planning**, **forecasting**, and **strategic financial decision-making**.

PROJECTS

- **NHL Team & Arena Business DBMS** – Full-stack app using Python, SQL, Azure Blob Storage; enforced TDD with Pytest.
- **AI & Strategic Marketing in Ride-Hailing** – Game theory-based pricing models in Python/R; interactive Power BI dashboards.
- **Social Media Engagement Analytics** – Cloud-based ETL pipelines integrating social media APIs with Azure Data Factory, AWS Glue, and Looker.

EDUCATION

- **M.S., Information Systems** – Cleveland State University, USA (2024)
- **B.Tech., Computer Science & Engineering** – JNTUK, India (2019)

CERTIFICATION

- Microsoft Certified: Power BI Data Analyst Associate (<https://tinyurl.com/yfj7yz2b>)
