## Summary

Java Software Developer with 3 years of experience architecting scalable, cloud-based microservices using Spring Boot and RESTful APIs. Proven track record in optimizing application performance for high availability and low latency. Experienced in full stack development, incorporating responsive front-end frameworks, and hands-on with Golang for microservices. Focused on delivering secure, end-to-end solutions that drive customer satisfaction.

## Education

**University of Houston**  
*Master of Science, Computer and Systems Engineering*

- GPA:** 3.733 CGPA
- Coursework:** Software Engineering, OOPS, Data Structures, DBMT, Computer Architecture, Analysis of Algorithms

**Jan 2023 - Dec 2024**

## Experience

**Reality AI Lab**  
*Software Developer*

- Engineered mission-critical Java Spring Boot microservices for the AI Teaching Companion platform, integrating advanced algorithms with Google Gemini's LLM API to enhance system response time by 40%.
- Architected full-stack solutions combining a JavaScript/React frontend with robust Java backend services for Marvel AI and Sky AI educational initiatives, delivering intuitive analytics dashboards and dynamic career pathway visualization tools.
- Developed Java-based AI integration services that connected machine learning models with educational repositories, enabling intelligent content categorization and automated skill assessment while maintaining 90% code coverage.

**Mar 2025 - Present**  
*San Francisco, CA*

**Huro AI Inc.**  
*Full Stack Engineer*

- Managed the full AI pipeline to overcome language barriers and developed a Multimodal Language Model, enhancing cross-language communication.
- Implemented and fine-tuned large language models (LLMs) for automated documentation generation and AI orchestration pipelines using LangChain and RAG techniques, improving data retrieval accuracy by 40% and reducing query response times by 60%.

**Jan 2025 - Feb 2025**  
*Austin, Texas*

**Computational Biomedicine Lab, University of Houston**  
*Research Assistant - Software Developer*

- Developed computer vision applications and WPF solutions using OpenCV, MVVM, and C#.NET, implementing automated testing frameworks that achieved 95% coverage, reduced image processing time by 40%, and decreased production defects by 30% through comprehensive NUnit testing.
- Engineered an analytics software suite that transformed raw data into actionable insights using custom statistical models, improving forecast accuracy by 72% with a minimal 5% margin of error to support confident business decision-making.
- Designed scalable solutions utilizing C#, C++, Golang, and Python along with Docker containerization and cloud platforms (AWS, Azure), enhancing system performance and reliability while reducing downtime.
- Conducted comprehensive testing and functional analysis of software, achieving a 40% increase in usability.

**Sep 2023 - Mar 2024**  
*Houston, Texas*

**Tide Platform Private Limited**  
*Software Development Engineer I*

- Established a cloud environment by analyzing four API options and programming a MongoDB API portal, which improved data query response times by 10 times and increased access speeds by 35%.
- Deployed a centralized logging environment (ELK, Filebeat, CloudWatch, S3) to aggregate log data from Docker containers and AWS resources, enhancing system monitoring and troubleshooting capabilities.
- Developed scalable and high-performance Java applications using Spring Boot, Hibernate, and AngularJS, creating robust backend systems, RESTful APIs, and responsive web interfaces that improved user experience and system reliability.
- Utilized tools such as Postman, Docker, AWS, and IntelliJ to implement and connect to RESTful APIs within a microservices architecture, optimizing system integration and operational efficiency.

**Jan 2022 - Dec 2022**  
*Hyderabad, India*

## Projects

**Railway Management System**  
*Python Microservices Architect*

- Successfully developed a robust and scalable end-to-end web application for a Railway Management System, addressing 90% of the requirements with a 10% error rate. Leveraged cutting-edge technologies including HTML, CSS, JavaScript, Flask, Python, and SQLAlchemy to create user-friendly interfaces, RESTful APIs, and efficient data management solutions.
- Utilized React.js and Web3.js for frontend integration with blockchain functionalities

**Mar 2024 - Apr 2024**

## Disaster Management Platform

Sep 2023 - Feb 2024

### AI-SERVE

- Architected a Java-based disaster prediction system using Spring Boot 2.7, processing 500GB daily weather data with 99.95% uptime across multiple AWS zones, reducing prediction latency from 2.5s to 800ms.
- Implemented distributed caching with Redis and database sharding in PostgreSQL for geospatial queries, resulting in 60% faster API response times and successful processing of 1M+ weather predictions with 95% accuracy.
- Developed custom Spring Boot starters for ML model integration and REST APIs with circuit breakers (Resilience4j), achieving zero data loss through automated failover and comprehensive testing coverage using JUnit 5/Mockito.

## Credit Card Fraud Detection Using Machine Learning

Apr 2021

### Machine Learning

- Constructed an innovative fraud detection method for credit card transactions, leveraging machine learning algorithms; analyzed customer transaction history and extracted behavioral patterns to detect anomalies and prevent fraud, resulting in a 25% reduction in fraudulent transactions.

## Technical Skills

---

- **Languages:** Python, Java, SQL, Node.js, Latex, C#, Machine Learning Algorithms, JavaScript, HTML/CSS, PowerShell, Bash Scripting, Golang
- **Frameworks & Technologies:** Spring Framework, Spring Boot, Spring MVC, Spring Data JPA, Angular JS, React JS, RESTful API Development, .NET 6/Core, WPF, MVVM (Model-View-ViewModel), Prism, OpenCV/EMGU.CV, Docker, Kubernetes, AWS, Git, Maven, Microservices
- **Tools, Databases & Cloud:** MySQL, Oracle, NoSQL, MongoDB, AWS, CI/CD, Git, JUnit, Log4j, Agile Methodologies, SDLC, DevOps Practices
- **Blockchain & Web3:** Solidity, Smart Contracts, Web3 Integration, DeFi Protocols, NFT Development, Blockchain Networks
- **OS:** Unix/Linux, Windows, Web

## Certification

---

- **Udemy:** The complete Java Course ; Java Designs Patterns Solid Design Principles ; Master Microservices with Spring boot and Spring Cloud ; C# .NET Core 7 with MS SQL.

## Honors & Certifications

---

- **Tide Platform Pvt Ltd:** Achieved top 10 globally in Tide AI Hackathon and won Gold and Bronze Badges in Tide's Networks Software and Platform.
