

Jaswanth Majji
majjijaswanth@gmail.com | +1-314-393-5687 | Data Analyst |

Professional Summary:

Results-driven **Data Analyst** with **4** years of experience delivering data-driven insights, business intelligence solutions, and predictive modeling for operational excellence and revenue growth. Proven track record of leveraging **SQL, Python, Tableau, and Power BI** to transform complex datasets into actionable strategies. Adept at collaborating with cross-functional teams, automating reporting workflows, and optimizing data processes to enhance decision-making efficiency. Experienced in **forecasting, KPI tracking, and performance analytics** for both corporate and startup environments, with a focus on improving profitability, customer engagement, and operational performance

Technical Tools

SQL, Tableau, Power BI, Excel (Advanced), Google Analytics, Python (Pandas, NumPy), MATLAB, AutoCAD, Microsoft PowerPoint

Core Skills

- **Data Analytics & Predictive Modelling** – Advanced statistical techniques, trend analysis, and forecasting
- **SQL & Database Management** – Query optimization, ETL processes, and data cleaning
- **Business Intelligence Tools** – Tableau, Power BI, Looker for interactive dashboards and reporting
- **Data Visualization & Storytelling** – Converting raw data into actionable insights for stakeholders
- **Python for Data Analysis** – Pandas, NumPy, and basic machine learning workflows
- **Automated Reporting & Workflow Optimization** – Excel (PivotTables, Macros, VLOOKUP), KPI automation
- **Financial & Operational Modelling** – Revenue growth analysis and cost reduction strategies
- **Web & Digital Analytics** – Google Analytics and e-commerce performance insights
- **Cross-Functional Collaboration & Communication** – Partnering with leadership and diverse teams to implement strategic initiatives
- **Problem-Solving & Strategic Planning** – Translating analytical findings into impactful business decisions

Professional Experience

Graduate Data Analyst (Academic & Project Work)

Saint Louis University — St. Louis, MO

Aug 2024 – May 2025

Responsibilities:

- Built Tableau and Power BI dashboards to track revenue trends, consultant activity, and sales performance, enabling data-driven decisions.
- Designed SQL queries to extract, clean, and analyze large customer and transaction datasets for predictive and financial modeling.
- Conducted predictive modeling and statistical analysis to forecast sales and program effectiveness, improving planning accuracy.
- Automated recurring KPI and financial reports in Excel, reducing reporting cycle time by 40%.
- Implemented customer segmentation analysis using transaction history to tailor marketing campaigns, which improved conversion rates and repeat purchases.

- Introduced A/B testing frameworks for promotions and product displays, allowing data-backed decisions that maximized sales impact.
- Developed real-time sales tracking systems to monitor daily performance, enabling faster corrective actions for underperforming products.
- Standardized data quality protocols and validation checks, improving data integrity and reducing reporting discrepancies.
- Leveraged Google Analytics to study website traffic and optimize the pharmacy's online storefront, increasing digital engagement.

MJR Pharmacy (Startup) — India

Mar 2020 – Aug 2023

Responsibilities:

- Conducted market and competitor analysis to identify pricing opportunities and improve product positioning, increasing market share in the local region.
- Created data pipelines for consolidating sales, customer feedback, and inventory data, improving reporting accuracy and reducing manual errors.
- Applied statistical analysis to evaluate promotional effectiveness and customer buying patterns, leading to optimized discount strategies and increased ROI.
- Monitored key operational metrics and recommended process improvements, resulting in a 15% reduction in operational costs.
- Delivered data-driven insights to leadership during strategic planning meetings, directly influencing expansion and product diversification decisions.
- Trained team members on data visualization tools (Power BI, Excel) to foster a culture of analytics-driven decision-making within the organization.

Education

M.S. Information Technology — *Saint Louis University, USA*

Aug 2023 – May 2025 | GPA: 3.85/4.00

Relevant Coursework: Data Analytics, Business Intelligence, Database Systems, Predictive Modeling, Financial Modeling, Information Systems Strategy

B.Sc. Mathematics, Computer Science, Statistics — *Osmania University, India*

2017 – 2020 | CGPA: 8.29/10
