California Polytechnic State University, San Luis Obispo *M.S. in Business Analytics*

Expected: June 2025

- Coursework: Machine Learning, Database Management, Data Analytics, Econometrics, Finance Analytics

Vellore Institute of Technology, Vellore *B.Tech in Mechanical Engineering*

July 2018 – Aug 2022

- Coursework: Statistical Modeling, Probability, Linear Algebra and Calculus, Supply Chain, Lean Management, Blockchain

EXPERIENCE

Business Analyst | *F5*

Jan 2025 – Mar 2025

- Optimized data processing by 20% for analytics by efficiently handling millions of records using Polars and SQL, which improved data workflow efficiency and ensured accurate large-scale data analysis.
- Built a churn prediction tool to help non-technical teams identify at-risk customers and understand key influencing factors, enabling 72% accurate predictions and more effective client conversations.
- Enhanced project efficiency and code quality by collaborating effectively with the team of 4 and maintained version control with GitHub, leading to streamlined project management and seamless development workflows.
- Delivered real-time decision-making and improved trend identification by creating interactive Tableau dashboards for advanced data exploration, providing actionable insights and optimizing business strategy.

Data Analyst | *CalPoly - Office of Writing and Learning*

Nov 2024 – Present

- Built a scalable pipeline to categorize over 8,000+ student writing artifacts per academic quarter, integrating machine learning models to evaluate writing requirements while improving file parsing, text extraction.
- Supported a cross-campus work group of faculty from 6 colleges, facilitating collaborative efforts to redefine assessment criteria by introducing linguistic-based metrics to evaluate lower-division student writing performance.
- Developed and refined a Canvas download extension using Python and Selenium, automating retrieval of 50,000+ student submissions, reducing manual download time retrieval time by over 80% through API parameter tuning and wildcard search techniques.

Product Manager | *Anu Merton*

Feb 2023 – Aug 2023

- Elevated CTR & banner effectiveness by 50%, using Google Analytics data, by conducting performance analyses, identifying key user trends, & implementing data-informed optimizations to boost campaign ROI.
- Improved UI/UX through enhanced accessibility and stakeholder satisfaction, by leading website redesigns that applied modern UI principles, gathering and analyzing user requirements, and adhering to industry best practices.
- Increased brand consistency through higher engagement and retention rates by designing marketing assets including lookbooks and email templates that strengthened visual appeal and unified messaging across platforms.
- Boosted sales by 15% through detailed campaign-specific product performance tracking by launching Pinterest marketing initiatives, implementing tracking systems, and refining strategies based on product usage data.

PROJECTS & CERTIFICATES

EcoSort - Won the Public Choice Award, PolyHack 2025

Jan 2025

- Developed an innovative smart trash can using image recognition technology to automate segregation of waste and recyclables, improving waste management efficiency and promoting sustainable disposal practices.

Retail Sales Forecasting Using Facebook Prophet

Feb 2025

- Achieved 93% prediction accuracy in daily sales forecasting by building an end-to-end time series pipeline using Facebook Prophet, with steps including data cleaning, holiday feature engineering, and model development
- Automated cross-validation and hyperparameter tuning to optimize forecasting performance across multiple product categories, resulting in a reduced MAPE from 6.3% to 4.9%.

AWS Certified Cloud Practitioner

Mar 2025

- Gained expertise in cloud infrastructure, security, and scalable data storage solutions within the AWS ecosystem.

TECHNICAL SKILLS

Languages: Python, SQL, R.

Tools: Tableau, Power BI, Git, PowerPoint, Figma, Outlook, Excel, Google Workspace, MS Office 365, Google Analytics.

Skills: Data Analysis, Problem Solving, Big Data, Data Visualization, SQL, NoSQL, Critical Thinking, Machine Learning.
