

BHARGAVI REDDY

Email id: bhargavipailla25@gmail.com

Contact no: +1 (469) 861-9121

Location: United States

PROFESSIONAL SUMMARY:

- Around 5+ years of experience in **Web Application Design, Development, Testing, Deployment, Maintenance**, and Production Support using **Java** and **J2EE** technologies.
 - Strong experience in developing **enterprise-level backend** and **full stack applications** using **Java, Spring Boot, Spring MVC, Microservices Architecture, RESTful Web Services, React JS, SQL**, and **Cloud Platforms (AWS)**.
 - Hands-on experience across all phases of **Software Development Life Cycle (SDLC)** including **Requirement Analysis, System Design, Development, Unit Testing, Integration Testing, Deployment**, and **Post-Production Support**.
 - Extensive experience in building **Spring Boot-based Microservices**, implementing **REST APIs**, handling **Backend Business Logic, Validation, Exception Handling, Logging**, and **Service Integrations**.
 - Strong experience working with **Relational Databases** such as **PostgreSQL, MySQL**, and **Oracle**, including **SQL Optimization** and **Performance Tuning**.
 - Hands-on experience working in **Agile / Scrum methodologies** and collaborating with **cross-functional** teams including **QA, DevOps**, and **Business stakeholders**.
 - Experience supporting applications in **Banking, Finance**, and **IT domains** across the **United States and India**.
-

CORE COMPETENCIES

- Full Stack Application Development (Frontend + Backend)
- Java / J2EE Enterprise Application Development

- Spring Boot & Microservices Architecture
- REST API Design & Integration
- React JS UI Development
- SQL & Relational Database Design
- Application Security & Authentication
- AWS Cloud Deployment & Monitoring
- CI/CD & DevOps Practices
- Agile / Scrum Methodologies

TECHNICAL SKILLS

- **Programming Languages:**Java (8 / 11 / 17), J2EE, SQL
- **Frontend Technologies:**React JS, JavaScript, HTML5, CSS3
- **Backend & Frameworks:**Spring Boot, Spring MVC, Spring Data JPA, Hibernate, RESTful Web Services, Microservices Architecture, Spring Security, OAuth2, JWT
- **Databases:**PostgreSQL, MySQL, Oracle
- **Cloud & DevOps:**Amazon Web Services (AWS) – EC2, RDS, S3, Lambda, API Gateway, CloudWatch, Docker, Jenkins, GitHub Actions, CI/CD
- **Testing & Tools:**JUnit, Mockito, Maven
- **Methodologies:**Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

CLIENT: Citi Bank, United States

ROLE: Senior Software Engineer

Duration: Jan 2024 – Present

- Designed, developed, and maintained **enterprise banking applications** using **Java**, **Spring Boot**, and **Microservices Architecture**, supporting **customer onboarding**, **transaction processing**, **risk assessment**, and **regulatory reporting systems**.
 - Developed **RESTful APIs** using **Spring Boot** to expose **customer profiles**, **account details**, **transaction history**, **risk indicators**, and **compliance-related data**, and integrated these APIs with **React JS** frontend applications.
 - Implemented **backend business logic**, **validation rules**, **exception handling**, **logging**, and **transaction management**, ensuring data consistency across **frontend and backend layers**.
 - Built and enhanced **React JS user interfaces** using **JavaScript**, **HTML5**, and **CSS3** for **internal banking dashboards**, **risk monitoring tools**, and **operational portals**, improving usability and performance.
 - Designed **API contracts**, **request/response models**, and **service integration patterns** to support communication between **frontend applications** and **distributed backend services**.
 - Worked extensively with **PostgreSQL** and **Oracle databases**, writing **complex SQL queries**, optimizing **query performance**, and supporting **high-volume transactional data**.
 - Implemented **Spring Security**, **OAuth2**, and **JWT** for **authentication**, **authorization**, and **role-based access control (RBAC)** across application layers.
 - Deployed applications on **AWS (EC2, RDS, S3, Lambda, API Gateway)** and monitored system health using **CloudWatch**.
 - Supported **production releases**, participated in **on-call rotations**, performed **incident resolution**, and conducted **root cause analysis** in a **high-availability banking environment**.
 - Collaborated closely with **QA**, **DevOps**, **UI/UX**, and **business teams** during **functional testing**, **UAT cycles**, and **regulatory validations**.
 - Actively participated in **Agile ceremonies** including **sprint planning**, **daily stand-ups**, **backlog grooming**, **sprint reviews**, and **retrospectives**.
-

CLIENT: Vanguard, United States

ROLE: Java Full Stack Engineer

Duration: Dec 2022 – Dec 2023

- Developed and enhanced **financial and investment management applications** using **Java**, **Spring Boot**, and **React JS**, supporting **portfolio management**, **account balances**, and **client reporting systems**.

- Designed and implemented **RESTful APIs** to support **investment transactions, fund performance, historical analytics, and client-facing dashboards**, integrating seamlessly with **React-based frontends**.
 - Implemented **backend business logic, validation, logging, and exception handling**, ensuring accuracy in **finance and investment workflows**.
 - Refactored **legacy monolithic applications** into **Spring Boot-based microservices**, improving **scalability, maintainability, and deployment efficiency**.
 - Built **React JS components** for **investment dashboards, internal portals, and reporting screens**, handling **API consumption, data rendering, and error handling**.
 - Worked extensively with **SQL, PostgreSQL, and Oracle databases** to support **financial reporting, reconciliation, and batch processing**.
 - Supported **AWS deployments**, monitored **production systems**, and resolved **performance, availability, and data-related issues**.
 - Collaborated with **business analysts, QA teams, and product owners** to support **functional testing, regression testing, and User Acceptance Testing (UAT)**.
 - Developed **unit and integration test cases** using **JUnit and Mockito** to improve code quality and system stability.
 - Participated in **Agile/Scrum ceremonies** including **sprint planning, daily stand-ups, retrospectives, and release planning**.
-

CLIENT: Cognizant Technology Solutions, India

ROLE: Software Engineer

Duration: Jan 2020 – Jul 2022

- Involved in the **design, development, and maintenance of Java backend applications** for **banking, finance, and enterprise clients** using **Spring Framework and Hibernate ORM**.
- Developed **RESTful Web Services** to support **business workflows, system integrations, and data processing requirements**, and integrated them with **web-based UI screens**.
- Implemented **backend business logic, data access layers, and integration components**, ensuring reliable interaction between **frontend interfaces and backend systems**.
- Worked extensively with **SQL and relational databases** to support **reporting, reconciliation, and operational processes**.

- Developed **batch jobs**, **scheduled processes**, and **automation workflows** to reduce **manual effort** and improve **operational efficiency**.
 - Built and maintained **basic UI components** using **HTML**, **CSS**, and **JavaScript** for **internal tools** and **reporting applications**.
 - Supported **production environments**, resolved **defects**, implemented **enhancements**, and collaborated with **onsite and offshore teams**.
 - Participated in **Agile development practices** including **daily stand-ups**, **sprint planning**, and **retrospectives**.
-

EDUCATION DETAILS:

Master of Science in Information Systems
University of Texas at Arlington, USA

Bachelor of Technology in Electronics and Communication Engineering
CVR College of Engineering, India
