EDUCATION

California State University, Long Beach

Jan 2023 – Dec 2024

Master of Science in Computer Science

B V Raju Institute of Technology

Jun 2017 – Jul 2021

Bachelor of Technology in Computer Science Engineering

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, SQL, Python, C++

Frameworks/Libraries: Spring Boot, Spring MVC, ReactJS, Node.js, Express.js, RESTful APIs, JUnit

Cloud and DevOps: Jenkins, Bitbucket, Ansible, Git, Docker, Kubernetes, AWS (EC2, S3, RDS, CloudWatch), CI/CD, JMeter

Databases: MySQL, PostgreSQL, MS SQL Server

Practices: Agile/Scrum, SDLC, Unit Testing, Code Reviews, Change Management, Documentation

Domain/Other: Financial Systems, Secure Application Design, Data Provisioning/ETL, Jira

PROFESSIONAL EXPERIENCE

Full Stack Developer

Dec 2024 – Present

Lincoln Financial

United States – Remote

- Developed scalable financial apps using **Java (Spring Boot)**, **ReactJS**, and **MySQL**; support 50K+ secure user transactions.
- Design and optimize **RESTful Web Services** for financial data flows; reduce API latency via SQL tuning and request caching.
- Own **CI/CD pipelines** using **Jenkins**, **Bitbucket**, and **AWS**; automate build/test/deploy under enterprise change controls.
- Partner with product/business teams to **refine user stories**, estimate work, and ship reliably in **Agile** sprints.
- Support platform upgrades, maintenance, and incident triage; strengthen observability with CloudWatch metrics, and alerts.

Student Assistant

May 2024 – Dec 2024

California State University, Long Beach

Long Beach, CA

- Managed Career Center database using **SQL** for 50K+ records; maintained **99%+** data accuracy and integrity.
- Automated validation and reporting with Python scripts; **reduced** manual effort by **40%**.
- Built dashboards and web tools (HTML/CSS/JS) to visualize insights and support data-driven decisions.

Software Engineer

Jun 2021 – Dec 2022

Infor

Hyderabad, India

- Built multi-tier apps using Java, Spring, ReactJS, and REST APIs for 100+ clients; delivered reusable components.
- Optimized data provisioning models in MySQL for large-scale analytics; enhanced query performance through indexing.
- Implemented **CI/CD** via **Jenkins** & **Bitbucket**; cut release cycle time by **40%** and increased deployment consistency.
- Led **change management**, platform upgrades, and requirement changes in cross-functional **Agile** teams.
- Improved resiliency with AWS DR patterns (S3 replication, RDS read replicas) and proactive monitoring.

Software Developer Intern

Apr 2020 – May 2021

Wipro

Hyderabad, India

- Contributed to internal enterprise apps using **Java**, **JSP/Servlets**, and **SQL**; improved UI workflows and reliability.
- Debugged, tested, and documented software application to ensure functionality, performance, and maintainability.
- Automated build and deployment workflows, accelerating release cycles and improving delivery consistency.

PROJECTS

- Malaria Detection Using CNN and VAEs** - Built a hybrid CNN and Variational Autoencoder (VAE) model to classify malaria cells with 99.2% accuracy. Enhanced performance through synthetic data augmentation, improving model robustness.
- BVRIT College Website Improvement** - Redesigned the BVRIT website to enhance accessibility and navigation for users; improved page load speed by 50%, leading to a 25% reduction in bounce rates.
- AI Chatbot using React, Node.js, and OpenAI API** — Designed and deployed a full-stack chatbot enabling real-time AI responses through OpenAI API integration.

LEADERSHIP & AWARDS

- Co-founded CBB, coding club of BVRIT; delivered workshops on Data Structures and Programming for 200+ students.
- Star Performer Award (Infor) for contributions to product development and cross-team collaboration.
