

Sri Divya Vadapalli

Java Full Stack Developer

+1(806)302-5342 | sridivayvadapalli1905@gmail.com | <https://www.linkedin.com/in/sridivyajava/>

PROFESSIONAL SUMMARY

- **Java Full Stack Developer** with 5 years of experience designing, developing, and deploying scalable enterprise applications using **Java/J2EE, Spring Framework** (Boot, MVC, Security, Cloud), and modern frontend technologies
- Strong expertise in building **RESTful and microservices architectures** using **Spring Boot, Hibernate, JPA**, and integration with **SOAP/REST APIs**
- Proficient in frontend frameworks including **Angular, React.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap**, and **Redux** for responsive and cross-browser UIs
- Skilled in **UI/UX design**, performance optimization, and accessibility (**WCAG/ARIA standards**) for seamless user experiences
- Hands-on experience in **backend development** with **Java, Spring Core, Microservices, Hibernate, JPA, JDBC**, and message brokers (**Kafka, RabbitMQ, ActiveMQ**) for real-time processing
- Expertise in **database design and development** with **Oracle, MySQL, PostgreSQL, MongoDB**, and **Cassandra**, including query optimization and stored procedures
- Skilled in **DevOps and CI/CD** using **Jenkins, Docker, Kubernetes, Git/GitHub/GitLab, Maven**, and **Gradle** to automate build, test, and deployment pipelines
- Solid knowledge of **cloud platforms (AWS, Azure)** for deploying full-stack applications using **EC2, S3, Lambda, API Gateway, RDS**, and Kubernetes clusters
- Proficient in **unit and integration testing** with **JUnit, Mockito, Selenium, Jest, Cypress, Playwright**, and **Postman** to ensure application quality
- Experienced with **Agile/Scrum methodologies**, collaborating with cross-functional teams in sprint planning, standups, and retrospectives
- Knowledgeable in **security best practices**, including authentication & authorization (**OAuth2, JWT, OpenID Connect**), data encryption, and **OWASP guidelines**
- Adept at **CI/CD automation, monitoring, and logging** using **GitHub Actions, Jenkins, Prometheus, Grafana**, and the **ELK stack** for reliable deployments

TECHNICAL SKILLS

- **Backend:** Java, J2EE, Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate, JPA, Microservices, RESTful APIs, SOAP, Kafka, RabbitMQ
- **Frontend:** Angular, React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Material UI
- **Databases:** Oracle, MySQL, PostgreSQL, MongoDB, Cassandra
- **DevOps / Tools:** Git/GitHub/GitLab, Jenkins, Maven, Gradle, Docker, Kubernetes, JIRA
- **Cloud Platforms:** AWS (EC2, S3, Lambda, RDS, API Gateway), Azure
- **Testing Tools:** JUnit, Mockito, Selenium, Postman, Jasmine, Karma
- **Other:** Agile/Scrum, Design Patterns, CI/CD, Performance Tuning

PROFESSIONAL EXPERIENCE

Cardinal Health

Oct 2023 – Till Date

Java Full Stack Developer

Dublin, OH

- Involved in all phases of the SDLC, including requirement gathering, design, analysis, and code development
- Designed and developed complex web pages using **HTML5, CSS3, JavaScript, jQuery, AngularJS, React.js, Bootstrap, and TypeScript**
- Managed state and data flow using **Redux Toolkit, React Query, Vuex, NgRx**, and integrated with **REST, GraphQL, and WebSocket APIs**

- Built robust backend systems with **Spring Boot, Hibernate, JPA, REST APIs, RabbitMQ, Kafka**, and **Spring JMS** for real-time messaging
- Developed **Spring WebFlux reactive applications** for asynchronous, non-blocking operations
- Worked with **NoSQL databases** like MongoDB, Cassandra, Redis, optimizing data storage and retrieval per project requirements
- Configured **CI/CD pipelines using Jenkins, GitLab CI**, and deployed scalable **Docker containers with Kubernetes**, including load balancing and namespace management; gained exposure to **Azure cloud services** for deployment and infrastructure management
- Ensured application security compliance with industry standards (**OWASP, CWE, CWSS, CVE, CVSS**)
- Worked with **Camunda** for workflow and process automation
- Conducted unit testing with **JUnit and Mockito** and end-to-end testing using **Selenium**

Environment: Java (Spring Boot, Spring WebFlux, Hibernate, JPA, Spring JMS), React.js, AngularJS, HTML5, CSS3, JavaScript, TypeScript, Redux Toolkit, Vuex, NgRx, MongoDB, Cassandra, Redis, Jenkins, GitLab CI, Docker, Kubernetes, Azure, Camunda, Selenium, JUnit, Mockito, Agile/Scrum

Wells Fargo

Jan 2021 – June 2023

Java Full Stack Developer

India

- Designed and implemented applications using **Spring Boot, Spring MVC, Spring IOC, Spring AOP, Spring Transactions, Spring Batch, Hibernate, and Grails**
- Worked with **Agile (Scrum), Waterfall, RUP, and XP** methodologies throughout the software development lifecycle
- Developed **RESTful APIs** for real-time request/response handling, including authentication for payment-related data
- Developed **backend services** using **Java (Spring Boot)** and **Node.js/Express.js**
- Wrote **Terraform scripts for AWS** to create, modify, and manage infrastructure resources
- Applied **dependency injection** and other Spring MVC features to integrate Java components efficiently
- Conducted **unit testing** using **JUnit** and **Mockito**
- Designed and managed **relational (MySQL)** and **NoSQL (MongoDB)** databases, ensuring data integrity and performance optimization
- Built and deployed applications using **ANT, Maven**, and automated CI/CD pipelines with **Jenkins**
- Implemented **ELK stack** for log management and analysis
- Established **CI/CD pipelines** using **Docker, Kubernetes, Jenkins, and Ansible** for automated deployments
- Integrated **Kafka**, and **Spring JMS** for message-based communication in RESTful APIs

Environment: Java (Spring Boot, Spring MVC, Spring AOP, Spring Batch), Hibernate, Grails, Node.js/Express.js, MySQL, MongoDB, Terraform (AWS), ANT, Maven, Jenkins, Docker, Kubernetes, Ansible, ELK Stack, Kafka, Agile/Scrum, Waterfall, RUP, XP

Arrixon Tech

July 2020 – Dec 2020

Software Developer

Hyderabad, India

- Developed and maintained **Java applications** using **Spring Boot** and core Java technologies
- Assisted in creating **frontend components** with **React.js** and **Angular**
- Worked with **SQL (MySQL, PostgreSQL, Oracle)** and **NoSQL (MongoDB, Redis)** databases for data management
- Participated in **Agile/Scrum processes**, including sprint planning and daily standups
- Contributed to **CI/CD pipelines** and collaborated using **Git** for version control
- Assisted in **unit and integration testing** with **JUnit** and **Mockito**
- Gained hands-on experience with **AWS** and **Docker** for deployment and containerization

Environment: Java (Spring Boot), React.js, Angular, MySQL, PostgreSQL, Oracle, MongoDB, Redis, Git, CI/CD, AWS, Docker, Agile/Scrum

EDUCATION

Texas Tech University

Aug 2023 – May 2025

Master of Science in Computer Science

Lubbock, TX
