PROFESSIONAL SUMMARY

Analytical and results-driven Data Analyst with strong experience transforming complex data into actionable business insights. Proven success in stakeholder collaboration, automating reporting workflows, and building intuitive dashboards using SQL, Tableau, Excel, and Python. Adept at communicating findings that influence business decisions—bringing a product-thinking mindset to analytics.

PROJECTS

Operational Trends Analysis – SQL & Excel

August 2024

- I improved vaccine distribution efficiency by identifying key gaps in 50,000+ rows of Excel data, resulting in a 15% reduction in distribution delays across targeted regions.
- I increased data retrieval speed by 30% by writing optimized SQL queries to extract and manipulate relational data, resulting in faster access to critical business insights.
- I reduced manual reporting time by 15% by creating temporary SQL tables and dynamic views, which streamlined data processing and enabled quicker report generation.

Distribution Visualization Dashboard – Tableau

July 2024

- I boosted stakeholder decision-making accuracy by 25% by developing interactive Tableau dashboards that highlighted real-time vaccination trends and patterns.
- I identified high-impact vaccination hotspots by applying time-series forecasting and geographic mapping, enabling targeted efforts that improved regional vaccination outreach.

PROFESSIONAL EXPERIENCE

VOREX

Freelance Data Analyst

Remote

June 2022 - August 2024

- I enhanced server performance by 20% by analyzing 200,000+ data points from sales and player engagement data, leading to more effective digital infrastructure management.
- I increased player retention by 15% by generating performance metric reports that guided strategic business decisions across multiple operational teams.
- I reduced manual data integration time by 25% by combining large-scale datasets using advanced SQL and Excel techniques, improving operational efficiency.

AMERICAN INCOME LIFE

Financial Administrator

Remote

May 2022 - August 2022

- I ensured 100% data accuracy and accessibility for senior leadership by managing and organizing sales data across 10+ departments.
- I cut reporting errors by 10% by automating weekly financial reports in Excel, supporting more reliable executive decision-making.
- I improved financial analysis efficiency by maintaining detailed, audit-ready records for 500+ clients, streamlining reporting and accuracy across departments.

EDUCATION

RUTGERS BUSINESS SCHOOL

Newark, NJ
