

SUMMARY

Business Analyst with 4 years of experience specializing in ERP migrations across finance, healthcare, and technology sectors, including AS/400 to Microsoft Dynamics 365. Proficient with Python, SQL, Tableau, Dynamics 365 ERP, Veeva Commercial Cloud, and Salesforce CRM. Skilled in project management using MS Project, MS Excel, MS SharePoint, Jira, and Confluence. Demonstrates success in leading compliance-driven system integrations and testing, effectively enhancing operational efficiency and stakeholder engagement through strategic leadership and data analysis.

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall
Language: Python, SQL
Documentation: FRD, BRD, SRS
Project Management Tools: MS Project, MS Excel, MS SharePoint
Visualization Tools: Tableau, Power BI
Software: Salesforce CRM, Dynamics 365 ERP, Confluence, Azure DevOps, Git, Logistics Systems
Analysis Skills: Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
Tracking/Other Skills: Jira, Microsoft Visio, HP Quality Center, JAD, Rational ClearQuest, RTM, UAT
Soft Skills: Time management, Leadership, Problem-solving, Negotiation, Documentation and Presentation
Operating System: Windows, Linux

EDUCATION

Master of Science in Computer Science Kent State University, OH, USA	Dec 2023
Bachelor of Engineering in Information Technology Gujarat Technological University, Ahmedabad, India	Aug 2020

EXPERIENCE

Bristol-Myers Squibb, (Remote) | May 2024 - Current | Business Process Analyst III

- Analyzed business requirements to support the migration from AS/400 ERP to Microsoft Dynamics 365, creating workflow diagrams in Visio to document processes and align with project deliverables in pharmaceutical manufacturing.
- Directed Supply Chain Management (SCM) activities, including sales order processing, inventory management, and transportation management, ensuring compliance with temperature-sensitive inventory control.
- Designed and executed data migration strategies, including cleansing, mapping, and validation, to transfer data from mainframe systems to D365, ensuring compliance with FDA regulations and cGMP guidelines, resulting in a 95% data integrity rate post-migration.
- Collaborated with third-party vendors and utilized Veeva Commercial Cloud (including Veeva CRM and PromoMats) to create and validate Functional Design Documents (FDDs), ensuring seamless system enhancements for pharma supply chain workflows.
- Led System Integration Testing (SIT) and User Acceptance Testing (UAT) by developing detailed test cases, managing test execution, and validating systems against GxP standards.
- Streamlined the Order-to-Cash (O2C) process, integrating APIs to optimize order entry, invoicing, and ERP functions; conducted Fit/Gap analysis to resolve discrepancies in system capabilities related to clinical trials logistics and pharmaceutical distribution, enhancing process efficiency by 40%.
- Enhanced ERP integrations, implemented robust batch tracking, and ensured accurate regulatory compliance reporting, addressing key operational requirements in pharmaceutical manufacturing.

JPMorgan Chase & Co., OH | July 2023 – May 2024 | Business Analyst

- Refined and documented business requirements in JIRA, creating user stories, prioritizing backlog items, and ensuring alignment with project objectives and Agile methodologies.
- Optimized payment processing workflows and client onboarding procedures by creating detailed process maps in Visio, reducing operational bottlenecks and improving process efficiency.
- Conducted advanced data analysis with SQL, SAS, and Excel to identify transaction trends, streamline reconciliation processes, and strengthen fraud detection systems, improving accuracy and reducing errors by 20%.
- Prepared and managed Functional Requirement Documents (FRDs), using Confluence to document system requirements and facilitate stakeholder reviews for successful system enhancement delivery.
- Led User Acceptance Testing (UAT) by designing test cases in the HP Quality Center (QC), coordinating execution, and validating deliverables against predefined business requirements.
- Developed Power BI reports to track KPIs and provide actionable insights while automating data workflows in Alteryx to reduce manual intervention and improve processing efficiency by 30%.
- Leveraged Actimize and MANTAS to monitor suspicious activities, ensuring AML and KYC compliance and improving the accuracy of regulations.

Infinite Infolab, India | March 2019 – June 2021 | Business Analyst

- Implemented Microsoft Dynamics 365 ERP to streamline business processes, enhance enterprise resource planning, and improve operational efficiency by 30%, leveraging Advanced Excel to analyze and present data.
- Conducted advanced data analysis using Python, SQL, Tableau, and Advanced Excel, enabling a 25% improvement in decision-making speed through the delivery of more accurate, timely KPI insights.
- Applied Azure DevOps and Git to improve project coordination, boosting workflow efficiency and reducing cycle times while maintaining comprehensive FRD and BRD documentation for business requirements.
- Designed and implemented advanced logistics systems, achieving a 15% reduction in delivery times and a 10% decrease in overall logistics costs while maintaining detailed KPI tracking for continuous improvement.
- Directed impact and gap analyses, UAT sessions, and risk assessments—reducing project discrepancies by 20%, cutting risks by 25%, and improving stakeholder understanding through clear documentation and communication.
- Improved documentation quality and stakeholder engagement by 40%, accelerating project approvals, and demonstrated leadership and negotiation skills to foster team cohesion and boost efficiency by 20%.
