

JAY THAKKAR | Software Developer |

| +1 (857) 707-5490 | Jaythakkar3619@gmail.com |

SUMMARY

Software Developer with 3+ years of experience in Python, JavaScript, C, C++, and Java. Expertise in building robust applications using frameworks like Django, React.js, and libraries such as NumPy. Skilled in cloud technologies, including AWS and Azure. Seeking a Software Development Engineer role to apply skills in front-end and back-end development and collaborate on innovative projects..

WORK EXPERIENCE

Tungsten Automation | Software Developer

May-2024 to Nov-2024

- Software Developer with 7 months of experience designing and developing high-performance applications. Proficient in Java, Python, JavaScript, and C#, with expertise in full-stack development using React, Angular, Node.js, and Spring Boot.
- Successfully optimized a high-traffic financial web application, boosting component performance by 30% and user satisfaction by 25%, while achieving 95% test coverage. Integrated Redux for efficient state management across 15+ React components, reducing bugs by 20%.
- Strong background in full-stack development, including front-end technologies like React, Angular, and back-end frameworks such as Node.js and Spring Boot. Skilled in agile methodologies, and collaborating in cross-functional teams to deliver robust solutions.

Junior Software Developer, Zion Technology, India

October 2020 - July2022

- I designed and deployed an Automated Credit Risk Assessment System using Python and Sci kit-learn, boosting loan processing efficiency by 25% and mitigating risk exposure. I developed RESTful APIs with Django, enabling seamless integration between the risk system and front-end applications for real-time decision-making. Deployed the solution in a cloud environment, cutting loan approval times by 60%.
- I contributed to web development using PHP and JavaScript, integrating APIs, and performing testing and debugging to ensure functionality and system performance.
- I also engineered an AI-powered customer support chatbot for an e-commerce platform, utilizing NLP and Python to reduce query response times by 50% and increase customer by 30%. Built a scalable Azure cloud infrastructure, lowering operational costs by 40%.

SKILLS

Programming: Python, C++, Java, JavaScript, SQL.

Web Development Front-End: React, Angular, Vue.js, HTML5, CSS3, Bootstrap, jQuery

Back-End: Node.js, Express.js, Django, Flask, Spring Boot.

Database management: Relational Databases: MySQL, Postgre SQL, Microsoft SQL Server

NoSQL Databases: MongoDB, Cassandra, Firebase

Cloud Services: AWS, Azure.

Data Engineering: Data modeling (ERDs) and Data Processing (Hadoop & Kafka). (through academic coursework)

Soft Skills: Problem-Solving, Communication, Collaboration, Time Management, Critical Thinking, Mentorship.

EDUCATION

University of Massachusetts Boston

Sep 2022 – May 2024

Master of Science in Information Technology

Gujarat Technological University (GTU)

July 2017- May 2021

Bachelor of Engineering in Computer Engineering

AWS Certified Cloud Practitioner

December2024
