SUMMARY

Quality Analyst with over 5 years of experience in Manual and Automation testing across Enterprise, Fintech, and Retail applications. Skilled in Selenium, Postman and SQL with a proven record of reducing critical defects by 10%, improving regression efficiency by 35%, and ensuring 99%+ data accuracy. Experienced in Agile/Scrum, delivering high-quality, compliant, and scalable software solutions through effective test planning, defect management, and cross-browser testing.

EDUCATION

Master of Science in Information Systems and Security
University of the Cumberland, Williamsburg, Kentucky

GPA: 3.72/4

June 2023 - August 2024

TECHNICAL SKILLS

Testing & QA: Manual Testing, Automation Testing, Regression Testing, UAT, Database Testing, Functional Testing, Cross-Browser Testing

Programming Languages & Tools: Java, Python, SQL, HTML, CSS, Jira, Azure DevOps, SharePoint

Data Analysis & Reporting: Power BI, Excel (Pivot Tables, VLOOKUP, Macros), Data Cleaning & Validation, Statistical Reporting

Methodologies: Agile/Scrum, Waterfall

Soft Skills: Documentation, Requirement Gathering & Analysis, Problem-Solving, Attention to Detail, Analytical Thinking

WORK EXPERIENCE

Software Engineer QA - Intern, Amiti Consulting Corporation - Virginia, United States

July 2025 - Present

- Designed and executed QA test suites focused on access control and authentication, uncovering 5+ high-priority defects early and reducing security gaps before release.
- Validated encryption, transmission protocols, and failover workflows during testing, ensuring 100% compliance with security standards and cutting recovery simulation time by 20%.
- Partnered with DevOps and infrastructure teams to expand network-aware testing coverage by 30% and document QA evidence, enabling faster audit sign-offs with zero blockers.

Data Security Analyst - Intern, OriginTek Solutions - North Carolina, United States

Dec 2024 - July 2025

- Documented 10+ security processes and compliance workflows, making procedures clearer and cutting junior analyst onboarding time by 25%.
- Supported SIEM log analysis and vulnerability scans, helping detect 15+ suspicious activities and 20+ system misconfigurations that were remediated to strengthen security posture.
- Contributed to incident response drills and cross-team reviews, improving report accuracy by 15% and boosting response time by 30% during simulated security events.

Quality Analyst, Technovert Solutions (TEZO) - Hyderabad, India.

May 2018 - Jul 2022

- Managed QA for 15+ large-scale projects, combining manual and automated testing to cut post-release defects by 30% and deliver more reliable releases.
- Automated 250+ regression scenarios using Selenium (Java/Python), reducing regression cycles from 5 days to 1.5 days and increasing coverage to 60% in just 4 months.
- Designed and ran 1,000+ test cases in Azure DevOps with 98% requirement coverage, and validated 200+ REST APIs to improve data accuracy to over 99%.
- Streamlined regression testing by cleaning up redundant cases and adding smoke tests in Jenkins CI/CD, trimming execution time by 35% and speeding up build validation.
- Mentored 4 junior QA engineers and flagged 15+ requirement gaps during client discussions, which boosted team productivity by 20% and helped avoid costly rework.

ACADEMIC PROJECTS

Retail Inventory Optimization - Graduate Project

- Analyzed retail sales trends and prepared demand forecasts to optimize inventory management, reducing stockouts and excess inventory while improving profitability.
- Built an automated data integration process with SQL and Python, improving accuracy and consistency across sales systems, and validated results with end-to-end manual testing to meet compliance standards.
- Executed data cleaning and preparation for retail datasets, significantly reducing errors and delivering reliable inputs for inventory optimization models.
- Developed and ran detailed test cases using test management tools, ensuring application resiliency, seamless data integration, and alignment with business requirements.

Power BI Case Studies

- Completed 15 end-to-end Power BI case studies across multiple domains, applying ETL, data modeling, DAX, RFM analysis, and Row-Level Security to deliver interactive dashboards that enhanced reporting accuracy and business decision-making.

CERTIFICATIONS

ISTQB Certified Foundation Level Tester - ISTQB
Microsoft Certified Power BI Data Analyst Associate - Microsoft
