

Jaya Surya Kanubuddi
Sr. Azure Data Engineer
E-mail: jayasuryakanubuddi22@gmail.com
Contact: +1 (414) 429-5900

PROFESSIONAL SUMMARY:

- **Over 4.5+ Years** of experience in the IT industry and **Microsoft Azure Cloud Services** as a Data Engineer, leveraging advanced technical expertise and modern business practices.
- Skilled in the implementation, development, and integration of cloud platforms, as well as **Data Analysis, Modeling, and Coding** across various business domains.
- Proficient in **Azure Data Engineering**, with experience in designing and implementing end-to-end data pipelines, **ETL Processes**, and **Data Transformation Workflows** using tools such as **Azure Data Factory, Azure Synapse Analytics, Azure Data Lake, Azure Databricks, Azure Logic Apps, Azure Key Vault**, and **Azure SQL Database**.
- Expertise in **Data Integration, Migration, and Transformation**, handling diverse data sources, implementing **Data Governance**, and ensuring scalability and performance optimization of data solutions.
- Strong ability to interact with **Business Users** to convert business requirements into **Technical Specifications**.
- Experienced in building **Azure Data Factory** components, including **Integration Runtimes, Linked Services, Pipelines, Datasets**, and **Activities**.
- Designed and developed **Data Ingestion** and **Processing Pipelines** using **Azure Data Factory**.
- Skilled in developing **Spark Applications** with **PySpark** and **Spark-SQL** in **Azure Databricks** for data extraction, transformation, and aggregation.
- Proficient in using **Azure Synapse** for orchestrating ETL processes, integrating with **Azure Data Lake**, and optimizing performance for large-scale data processing and reporting.
- Experience in monitoring and optimizing performance to ensure efficient **Data Ingestion** and **Processing**.
- Strong background in implementing **CI/CD Pipelines** with **Azure DevOps**, deploying resources such as **Azure Data Factory** and **Databricks Notebooks**.
- Proficient in automating build, test, and release processes using **Azure Repos, Git**, and **Azure Pipelines**.
- Experienced in **Agile Methodologies**, including **Azure Boards**, for iterative development, sprint planning, task prioritization, and continuous improvement.
- Skilled in programming languages such as **Python** and **SQL**, including the development of **Stored Procedures**.
- Proficient in designing and managing **Azure SQL Database** for storing structured data, including **tables, views, stored procedures**, and implementing efficient **data models, dimensions**, and **facts** for analytics.
- Proficient in integrating **Azure Logic Apps** with **Azure Databricks** to trigger email alerts based on the success or failure of data processing tasks, improving workflow visibility and incident response.
- Experienced in using **Azure Key Vault** to securely manage and store sensitive information such as connection strings, passwords, and encryption keys.
- Expertise in the complete project lifecycle development, from **Requirement Gathering** and **Solution Design** to **Coding, Testing**, and **Deployment**.
- Proficient in using **Git** for **Source Code Management, Version Control**, and team collaboration, ensuring code integrity and streamlined workflows.
- Experienced in leveraging **Git** for **Branching Strategies, Pull Requests**, and resolving **Merge Conflicts** efficiently.
- Good in collaborating with **teams** to gather requirements, share progress, and ensure smooth communication throughout the project lifecycle.

TECHNICAL SKILLS:

- **Microsoft Azure Cloud Services:** Azure Data Factory, Azure Synapse Analytics, Azure Databricks, Azure SQL Database, Azure Data Lake, Azure Logic Apps, Azure Key Vault, Azure Blob Storage, Power BI, Azure Data Explorer, Azure DevOps CI/CD, Visual Studio Code and SQL Server
- **Deployment:** Azure DevOps
- **Languages:** SQL, PySpark and Python.

CERTIFICATIONS:

- Microsoft Certified: Microsoft Azure Data Engineer (DP - 203)

EDUCATION SUMMARY:

- **Masters** in Computer Science and Information Systems from Concordia University Wisconsin.
- **Bachelor of Technology** in Electrical and Electronics Engineering from Vishnu Institute of Technology.

PROFESSIONAL EXPERIENCE:

KPMG, India

Client: Shell India Markets Private Limited

Sep 2021 – Aug 2023

Role: Sr. Azure Data Engineer

Responsibilities:

- Worked as a **Developer** on projects involving various **Azure Services**, including **Azure DevOps, Azure Data Factory, Azure Databricks, ADLS Gen1 & Gen2, Azure Blob Storage, Azure SQL DB, Azure Synapse, Azure Logic Apps**, and **Azure Key Vault**.
- Extensive experience in **end-to-end Azure development**, from design to deployment.
- Skilled in processing large datasets across structured and semi-structured data formats, supporting system application architecture.
- Capable of analyzing business rules, collaborating with stakeholders, and performing source-to-target data mapping and design reviews.
- Familiar with **data architecture** concepts, including **data ingestion, data processing**, and **data modeling** design and implementation.
- Hands-on experience in designing and implementing **ETL workflows** for data transformation and integration.
- Proficient in writing **SQL** and **PySpark** queries for data analysis and meeting business requirements.
- Experience in generating **Power BI reports** to visualize and present data insights.
- Worked with **Azure Data Factory** for data ingestion from multiple sources like **Azure Blob Storage, SharePoint Online, ZEMA, Markets, APIs**, and **NAS Drives** into **ADLS Gen1 & Gen2**.
- Utilized **Azure Databricks** and **PySpark** to perform data transformations at various stages (staging, enriched, and curated levels).
- Developed **Databricks Notebooks** to complete user stories, ensuring efficient data processing.
- Implemented scheduled and event-based triggers in **Azure Data Factory** to automate data workflows.
- Experienced in both **Waterfall** and **Agile** methodologies, contributing to team success in project delivery.
- Proficient in **Version Control** using **Azure Repos, GitHub**, and **Visual Studio Code**, ensuring smooth collaboration and code management.
- Skilled in raising **Pull Requests (PRs)**, deploying code to different environments, and troubleshooting issues related to build and release failures.

Cognizant Technology Solutions, India

Client: GlaxoSmithKline

Jan 2019 - Aug 2021

Role: Azure Data Engineer

Responsibilities:

- Involved in the end-to-end process, including requirement analysis, solution design, development, and thorough unit testing to ensure robust and reliable data pipelines.
- Worked with various data loading techniques including **Historical**, **Daily Incremental**, and **Monthly Incremental** data loads, ensuring data accuracy and consistency across all stages of the pipeline.
- Automated the movement of data from diverse external sources, such as **Azure Blob Storage**, **SharePoint**, and **NAS Drives**, to **ADLS Gen1 & Gen2** using **Azure Data Factory** pipelines. Utilized both **Scheduled** and **Event-based triggers** to efficiently manage data workflows and ensure timely data ingestion.
- Leveraged the **PySpark** framework to perform complex data transformations and processing for **semi-structured** and **unstructured data**. Managed the data through multiple layers such as **Staging**, **Enriched**, **Curated**, and **Consolidated** to ensure data quality, integrity, and accessibility for downstream consumption.
- Transformed and maintained both **daily refresh** and **historical data** in **Azure SQL Database** and **Azure Synapse SQL Pool** for seamless integration with UI tools like **Power BI**, enabling real-time and historical reporting, dashboards, and data visualizations.
