

JAYAKESHAV REDDY | SOFTWARE ENGINEER

Location: TX | Phone: +1 (281) 748-6357 | Email: Keshavreddy776@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Highly skilled **Python developer/Software Engineer** with over **4** years of experience in web development and diverse domains, specializing in building dynamic, responsive user interfaces and optimizing performance for high-traffic websites.
- Proficient in multiple technologies including **Python, JavaScript, Java, Go, MySQL, HTML, CSS, Bootstrap, PostgreSQL, and SEO**, offering versatile development capabilities.
- Expertise in **ReactJS** for developing optimized, high-performing websites and implementing **Redux** for effective state management, ensuring robust and scalable front-end applications.
- Strong background in **API** development and **microservices**, including **RESTful APIs, JWT-based authentication**, and secure session management, enhancing user data security and efficiency.
- Extensive experience in database management, including preparing **DDL, complex SQL queries**, stored procedures, and functions, ensuring efficient and reliable database operations.
- Adept at error handling, logging, and deployment using tools like **Splunk, AWS, and CI/CD pipelines with Jenkins**, ensuring high availability and reliability of web applications.
- Proven track record in **agile methodologies**, actively participating in **SCRUM** meetings and sprint planning to deliver high-quality software solutions.
- Hands-on experience with cloud technologies such as **AWS** and **PCF**, including managing resources and deploying applications to enhance scalability and performance.
- Innovative in applying **machine learning techniques**, including model development with **Scikit-Learn and TensorFlow**, to enhance data processing capabilities within applications.

TECHNICAL SKILLS

Languages:	Java, GoLang, Python, SQL
Web Technologies:	JavaScript, HTML5, XML, CSS3, JSON, REST, ReactJS, Bootstrap, Redux
Frameworks & Libraries:	Splunk, Dynatrace, Swagger, Django, Flask, SQLAlchemy, Jinja2, Pandas, Matplotlib, Scikit-Learn, TensorFlow, Spring (MVC, Boot, Core, Security, AOP, etc.), Hibernate, Log4j
Cloud:	AWS (elastic beanstalk, EC2, RDS, route 53, S3, SES, CodeArtifact, SQS), PCF (pivotal cloud foundry)
Databases:	Oracle, MySQL, MS SQL Server, PostgreSQL, Mongo DB
IDEs & Tools:	GIT, GitHub, Docker, Kubernetes, Kafka, Eclipse, IntelliJ, NetBeans, Postman, Visual Studio, Spring Tool Suite (STS), Jenkins, Spinnaker, Gunicorn, WebLogic, Maven, Flask-WTF, Apache Tomcat, Apache Kafka
Design Patterns:	MVC, Singleton, Prototype, Session Façade, Front Controller, Factory, Abstract Factory, Business Delegate, Service Locator, and Data Access Object

PROFESSIONAL EXPERIENCE

Cybersoft Technologies, PrimeroEdge, TX

Jan 2023 - Present

Python Developer

- Utilized **Python** to develop and maintain a suite of data processing and automation scripts, streamlining workflows and increasing data processing speed by **30%**.
- Spearheaded the development of highly interactive single-page applications (**SPA**) using **ReactJS**, ensuring seamless user navigation and dynamic content updates.
- Developed and deployed a robust claims processing feature leveraging **Django**, handling exports, batch imports, and automated reporting, improving process efficiency by **20%**.
- Engineered a **Python-based API** integrated with **Amazon SQS** to manage bulk email notifications, such as balance and eligibility updates, achieving a **95%** reduction in manual notification handling.
- Built scalable microservices architecture using **Django** and **SQLAlchemy** for payment processing, streamlining transaction recording, and real-time balance updates via **RESTful APIs**.
- Designed and implemented a performance dashboard using Dynatrace to monitor and optimize application performance, resulting in a **30% reduction** in downtime.
- Collaborated in **Agile SCRUM** teams, managing bi-weekly sprint deliveries and adapting to frequently changing project requirements.
- Collaborated on a hybrid architecture using Golang for high-concurrency tasks and Python for machine learning model integration, improving overall system scalability and predictive analytics accuracy by 20%.
- Enhanced real-time logging and monitoring by developing custom **Python scripts for log aggregation** and integrating with **Splunk** for analytics, leading to a **15%** increase in system reliability.
- Automated **CI/CD** pipelines using **Jenkins** and **Spinnaker**, streamlining the build, test, and deployment process by **40%**.
- Deployed and maintained applications on **AWS infrastructure**, utilizing services like **AWS CodeArtifact** for efficient artifact management and storage.
- Developed and integrated machine learning models using **Scikit-Learn** and **TensorFlow** for predictive analytics, improving data accuracy by **20%**.
- Implemented advanced data preprocessing and feature engineering techniques for better model performance, deploying models via **Django APIs** to provide real-time predictions within applications.

Environment: Python, JavaScript, Django, ReactJS, SQLAlchemy, MySQL, Amazon SQS, Scikit-Learn, TensorFlow, Pandas, Matplotlib, Log4j, Splunk, Dynatrace Jenkins, Spinnaker, AWS (CodeArtifact, SQS, other AWS services), Agile (SCRUM), RESTful APIs, SCRUM meetings, bi-weekly sprint deliveries.

Citius Infotech, India

Dec 2019 - July 2021

Software Engineer

- Designed and developed a scalable Inventory Management System using **Java** and **Spring Boot**, handling 1000+ stock management operations, order fulfillment, and reports per day while adhering to industry best practices and design patterns.
- Engineered **RESTful APIs** with Spring **MVC** and **Spring Data JPA** to enable seamless communication between the **front-end** and **back-end** systems, supporting **CRUD** operations for efficient data manipulation.
- Developed and maintained **Microservices** based on **RESTful API** architecture, leveraging **Spring Boot** and **Spring MVC** frameworks.
- Designed and implemented business components using **Spring Boot**, **Spring Dependency Injection (Core)**, **Spring AOP**, and **Spring Annotations** to ensure modular and scalable application architecture.
- Utilized **Spring AOP** and **JDBC** module features for efficient data persistence to **PostgreSQL** databases, enhancing application performance and reliability.
- Implemented **Spring Security** for robust authentication and authorization, protecting the system from unauthorized access and ensuring data confidentiality and integrity, preventing **1,000+ unauthorized** access attempts.
- Implemented **HTTP** methods to retrieve **data** from **REST APIs** and dynamically update pages, improving user interaction and data accessibility.
- Engineered highly scalable and fault-tolerant **Microservices** using **auto-scaling** techniques and disaster recovery strategies.
- Implemented application-level persistence using **Hibernate** within the **Spring** framework, ensuring robust data management and integrity.
- Leveraged **Java 1.8 features** including **Lambda** expressions, advanced for-each loops, and Streams to optimize code readability and performance.
- Configured connection pools and established efficient connections with **PostgreSQL** databases, developing stored procedures and optimized **SQL** queries for **data manipulation** and **retrieval**.
- Utilized **GIT** for version control, managed logs using **Log4J**, and orchestrated project dependencies with **Maven** by developing and maintaining **pom.xml** configurations.

Environment: Agile, Java 8, JSP, JSON, XML, JDBC, Spring IOC, JWT, Spring Boot, RESTful, PCF, PostgreSQL, Tomcat.

Sage Softtech, India

Jan 2019 - Nov 2019

Software Engineer

- Migrated from **legacy frameworks** to **Flask architecture** using **Flask**, **Jinja2**, and **Python modules**, developing a services-based architecture **with SQLAlchemy ORM** and **Flask Framework**.
- Designed and implemented controller classes, business logic, and data access layers using **Flask** ensuring modular and scalable application design.
- Integrated **Flask** Dependency Injection across different application layers and migrated the persistence layer to **SQLAlchemy** for enhanced database operations.
- Developed **PL/pgSQL** in the data access layer to meet project requirements, optimizing data retrieval and manipulation processes.
- Utilized frameworks **like PyTest** and unit tests for implementing **Test Driven Development (TDD)** and **Behavior Development (BDD)**, ensuring high code quality and reliability.
- Implemented Flask views and templates integration in the presentation tier and utilized Jinja2 to design the application layout.
- Leveraged **JavaScript** extensively to create interactive, speedy, and functional user interfaces, enhancing user experience.
- Developed **Flask forms and views** to control application flow and employed **Flask-WTF** and **JavaScript** validation framework for form validation and data integrity.
- Used Flask and **SQLAlchemy** modules as Object-Relational Mapping tools for efficient back-end operations over **SQL** databases.
- Wrote **PyTest test cases** and conducted unit and integration testing to ensure robust functionality and performance of applications, and configured projects on the **Gunicorn** application server for seamless deployment and operation of enterprise applications.
- Developed and integrated **machine learning** models using **Scikit-Learn** and **TensorFlow** for predictive analytics, enhancing the application's data processing capabilities, and implemented data preprocessing and feature engineering techniques to improve model performance.
- Conducted exploratory data analysis (EDA) using **Pandas** and **Matplotlib** to derive actionable insights, and developed and deployed **machine learning models** with **Flask APIs** for real-time predictions and application integration.

Environment: Python, JavaScript, Flask, Django, Jinja2, Flask-WTF, SQLAlchemy, PostgreSQL (PL/pgSQL), PyTest, unit tests, HTML, CSS, Gunicorn, Scikit-Learn, TensorFlow, Pandas, Matplotlib, (TDD), (BDD), Code reviews, team collaboration.

EDUCATION

Master of Science - Engineering Data Science
University of Houston, TX, USA

Dec 2022
