SUMMARY

Data Engineer with around 5 years of experience designing and managing scalable data pipelines, databases, and real-time analytics for healthcare, insurance, and e-commerce sectors. Proficient in Hadoop, Kafka, Spark, AWS, and BI tools, ensuring high data accuracy, availability, and compliance with regulations like HIPAA and GDPR. Delivered actionable insights through advanced ETL processes, machine learning models, and data visualizations, driving performance improvements and cost savings. Adept at collaborating across teams to scale data platforms, enhance system reliability, and support data-driven decision-making.

EDUCATION

Master of Science in Computer Science

Campbellsville University

August 2021 – October 2023

Campbellsville, KY

Bachelor of Technology in Computer Science Engineering

Hyderabad Institute of Technology and Management

August 2016 - September 2019

Hyderabad, India

PROFESSIONAL EXPERIENCE

MetLife

Data Engineer

New York, USA

September 2022 – Present

- Led Hadoop cluster management for over 10TB of healthcare and insurance data and maintained Cassandra databases with millions of patient records, ensuring 99.9% availability and 99.99% data consistency.
- Deployed healthcare systems on AWS, managing 50+ EC2 instances and 100TB S3 storage, while implementing encryption and access controls to comply with HIPAA and GDPR.
- Designed real-time data pipelines using Kafka and Spark Streaming, processing over 1 million IoT data points daily and enhancing patient outcome insights by 25%.
- Created ETL processes for 20+ healthcare sources (EMR systems, wearables), ensuring 99.95% data accuracy and seamless HL7/FHIR integration across hospital systems.
- Integrated BI tools with Hadoop for 100+ decision-makers, developing KPI dashboards that boosted hospital performance and patient care outcomes by 20%.
- Developed an Elasticsearch-based logging solution, automated Logstash ingestion, and created Kibana dashboards for real-time monitoring of system performance and patient data.

Sigma InfoSolutions

Data Engineer

Bangalore, India

December 2018 – July 2021

- Utilized TextractOCR, Spark on EMR, S3, Apache Airflow, and Dagster with CI/CD via CodePipeline and CodeBuild, boosting deployment efficiency by 40% and increasing data throughput by 50%.
- Developed a near-real-time pipeline using Confluent Kafka, Debezium, and AWS MSK to ingest 100M rows daily, enabling an effective fraud detection system and achieving over \$200K in monthly cost savings.
- Leveraged Spark on EMR and NLP on SageMaker to revamp Medicare and Medicaid data pipelines, creating a denormalized DynamoDB store that improved query response times by 25%.
- Partnered with diverse teams to enhance a reliable data platform, successfully scaling data ingestion from 10M to 250M rows per day through scalable processing solutions.
- Developed and optimized SQL queries for Presto and AWS Athena, reducing execution times by 30% and enabling faster access to insights for data-driven decisions.
- Implemented AWS Glue Data Quality, achieving a 95% accuracy rate in data validation and cleansing processes, thereby enhancing overall data quality and governance.
- Implemented data-driven initiatives for an e-commerce client, focused on revenue optimization and user conversion enhancement through optimized product listings accuracy within the Product Catalog using SQL, NLP.
- Automated processes through Apache Airflow orchestration and leveraged Amazon SageMaker for model training and deployment of NLP models.
- Conducted real-time data analysis by integrating with data sources via Connectors (API), BigQuery, Google Analytics, and DAX, and crafted compelling data visualizations using Power BI to drive actionable insights and support data-driven decision-making.

TECHNICAL SKILLS

Methodologies

Software Development Life Cycle (SDLC), Agile/ Scrum, Waterfall

Language & Databases

Python, SQL, R, SCALA, MySQL, MS SQL Server

Python Packages

Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, SeaBorn, PyTorch, ggplot2, Plotly

Data Analytics Skills

Data Manipulation, Data Cleaning, Data Visualization, Exploratory Data Analysis, Data Analysis

Data Components

HDFS, Hue, MapReduce, PIG, Hive, HCatalog, HBase, Sqoop, Impala, Zookeeper, Flume, Kafka, Yarn, Cloudera Manager, Kerberos, Pyspark Airflow, Kafka Snowflake, NIFI
AWS, AZURE(Databricks), NLP, A/B Testing, Hypothesis testing, ETL, Hadoop, Spark, Big Query, Apache Airflow, Google Analytics

Tools

Tableau, Power BI, QlikSense, QlikView, Advanced Excel, Visual Studio, Jupyter Notebook, Git, GitHub, Windows, macOS
