## SUMMARY

Data Analyst and Analytics Engineer with **3+ years** delivering cloud-scale analytics end-to-end—from ingestion and transformation to **KPI** standardization, experimentation, & executive reporting. **AWS Certified** Solutions Architect & **Microsoft Certified** Power BI Data Analyst with hands-on expertise in **SQL, Python, PySpark, Snowflake, Databricks**, and **Alteryx** across **AWS** and **Azure**. Recent experience using AI-assisted analytics and automation to accelerate trend detection, anomaly identification, and decision-ready insights across **multi-million-row datasets**.

## EXPERIENCE

### Data Analyst | McKinsey & Company | USA

*February 2025 – Current*

- Built & maintained **analytics-ready datasets** in **Snowflake & Databricks** using **SQL, Python**, and **PySpark**, processing **20M+ rows per refresh** for cloud-scale analytics.
- Developed **ETL/ELT pipelines** for ingestion, cleansing, validation, and transformation across **15+ multi-source datasets**, reducing refresh failures by **~30%**.
- Designed and analyzed **A/B tests** to evaluate feature and operational changes, measuring lift, statistical significance, and KPI impact.
- Built **statistical baselines** and **lightweight anomaly checks** in Python to surface KPI deviations early and improve confidence in executive reporting.
- Delivered **25+ executive dashboards** in **Power BI and Tableau**, with **Looker exposure** (semantic/metric layer concepts) to support scalable self-service analytics.
- Created reusable **Alteryx workflows** for data preparation, blending, and validation, reducing manual effort by **35–40%**.
- Used **AI/LLM-assisted workflows** to accelerate insight summarization, trend explanations, improving reporting speed and consistency.
- Automated recurring analytics using **Python, APIs, and scheduled jobs**, saving **15–20 hours per month**.
- Partnered with **engineering, product, and analytics teams** to standardize **30+ KPIs**, align definitions, and improve data quality across platforms.

### Application Development Analyst | Accenture | Hyderabad, India

*August 2021 – July 2023*

- Delivered **50+ dashboards** in **Power BI, Tableau, QlikView, and Qlik Sense**, supporting enterprise reporting across **finance, operations, and supply chain** with **10M+ records**.
- Migrated **30+ dashboards** from QlikView/Qlik Sense (SaaS) to Power BI, converting Set Analysis to DAX and standardizing KPI definitions.
- Wrote and optimized **complex SQL** on **Microsoft SQL Server**, improving **query performance by 20–30%** for high-volume reporting workloads.
- Built **ETL pipelines** using **Python, SSIS, PowerShell**, and **Azure Data Factory**, processing millions of rows daily for scheduled reporting.
- Streamlined reconciliation and recurring preparation using **Alteryx and SQL**, reducing **reporting turnaround time by ~40%**.
- Implemented **Row-Level Security (RLS)** and **role-based access controls** for region- and customer-level reporting governance.
- Managed **ServiceNow incidents and requests**, resolving production failures, access issues, and SLA-driven reporting escalations.
- Supported **IBM On-Demand access** by managing **directory-based** customer permissions for secure and compliant data visibility.
- Performed **data validation, anomaly detection, and root-cause analysis** to maintain trust in production dashboards and reporting pipelines.
- Worked in **Agile delivery (Jira)**, coordinating parallel workstreams with **engineering, QA, and business stakeholders**.

- Analyzed **180K+ records** with SQL, flagging discrepancies that improved audit accuracy and reporting quality across 20+ KPIs.
- Built **Power BI dashboards** with visuals and slicers to track departmental metrics, reducing reliance on manual Excel trackers.
- Automated recurring reporting with **SQL scripts and Excel macros**, saving 10+ analyst hours per week.

TECHNICAL SKILLS

**Data Analysis & Visualization:** Power BI (DAX, Power Query), Tableau, Qlik Sense, QlikView, MS Excel, SSRS, Alteryx

**AI & ML:** LLMs (OpenAI, Gemini, Claude), Fine-Tuning, LangChain, Hugging Face, Generative AI APIs.

**Programming Languages:** Python (Pandas, NumPy, Seaborn), R , SQL (Joins, CTEs, Window Functions)

**Analytics & Modeling:** A/B Testing, Hypothesis Testing, Regression, ARIMA Forecasting, Descriptive & Inferential Statistics

**ETL & Automation:** SSIS, Python Scripts, Excel Macros, FastAPI, Flask

**Databases & Warehousing:** Oracle, MySQL, PostgreSQL, AWS Redshift, Azure SQL Database, Firebase

**Cloud & Big Data:** AWS (S3, Redshift), Azure (Data Factory), Google BigQuery

**Project Tools & Methodologies :**Jira, Confluence, Agile (Scrum), BRD/FRD Documentation, User Stories, SDLC, UAT, Git, Docker.

PROJECTS

- Real Estate Data Analysis & Visualization(R):**
- Analyzed 2001–2021 real estate data using R to uncover regional pricing patterns and build ARIMA forecasts over 240 monthly intervals, guiding simulated portfolio planning.
  - Executed automatic data cleaning and ARIMA forecasting models in R, cutting preparation time by a third and enabling accurate 12-month sales forecasts for portfolio planning.
- Tableau World Bank Economic Indicators Dashboard**
- Built a Tableau dashboard using 20+ years of GDP, inflation, unemployment, and population data.
  - Cleaned and transformed datasets using SQL + Excel; applied forecasting and trend analysis.
  - Identified macroeconomic patterns and country-level insights.
- Real-Time Auction Application (Flutter + Firebase + GCP)**
- Built a real-time auction app with Flutter and Firebase Firestore, enabling scalable live bidding.
  - Implemented Firebase Auth, push notifications, and cloud functions for secure bidding workflows.
  - Designed NoSQL data models optimized for real-time reads/writes.

EDUCATION

Florida Institute of Technology   Melbourne, FL

Master of Science in Computer Information Systems | GPA: 3.9

August 2023 – December 2024

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- Microsoft Certified – Power BI Data Analyst Associate (PL-300)
- Microsoft Certified – Azure Fundamentals (AZ-900)
- Google Data Analytics – Foundations (Coursera)
- Python Programming – GUVI (IITM Research Park)
