

Name: Jayasurthi Pitchaisavari Chetty

Email: jayasurthichetty@gmail.com | Phone: +1 984-212-3252 | Open for Re-Location

Professional Summary:

Results-driven **Full Stack Java Developer** with **5+ years** of progressive experience designing and developing scalable enterprise applications using **Java (8–17)**, **Spring Boot**, **REST APIs**, **Angular**, and **Microservices**. Specialized in **front-office** trading systems and **Fixed Income E-Trading** platforms, with hands-on experience in implementing **RFQ**, **RUN**, and **Axes** workflows integrated with **MarketAxess**, **TradeWeb**, and **Bloomberg**. Proficient in **multithreaded** and **low-latency** programming, building real-time systems that interface with **FIX**, **ION**, and **KDB+**. Adept at collaborating with **traders**, **quantitative analysts**, and stakeholders to deliver high-availability, scalable, and compliant solutions.

Technical Skills:

- **Languages:** Java (8–17), C#, JavaScript, TypeScript, SQL, PL/SQL, Shell Scripting, Python (basic)
- **Frameworks/Technologies:** Spring Boot, Spring MVC, Hibernate, JPA, Angular (v8+), React.js, JSP, Servlets, Struts
- **Web Services:** RESTful APIs, SOAP, JSON, XML, JAXB, Apache CXF
- **Tools & Platforms:** Docker, Kubernetes, Jenkins, GitHub, Maven, Gradle, JIRA, Harness, Bonsai, WebSphere Liberty
- **Databases:** Oracle, PostgreSQL, MySQL, MongoDB, Cassandra
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Route53, EKS), GCP, Terraform, GitHub Actions, CI/CD pipelines
- **Testing:** JUnit, Jasmine/Karma, Selenium, Mockito, HTTPUnit
- **Others:** Okta, IAM, OpenFGA, RabbitMQ, ActiveMQ, Kafka

Professional Experience:

Client: Federal Reserve Bank of New York | **Domain:** Financial & Banking | **Remote**

Role: Java Software Engineer

Duration: Nov 2023 – Present

- Designed and developed real-time, **high-frequency** trading features for a proprietary **Fixed Income E-Trading** platform encompassing **Credit** and **Rates**.
- Implemented **RFQ**, **RUN**, and **Axes** workflows integrated with **MarketAxess**, **Bloomberg**, and **TradeWeb**.
- Developed **multithreaded**, **low-latency** services using **Java 15**, **Spring Boot**, **Kafka**, and **RabbitMQ**.
- Maintained integrations with **ION**, **FIX Protocol**, and **KDB+** for market connectivity and pricing.

- Collaborated with **traders** and **quantitative analysts** to implement execution logic across multiple **ECNs**.
- Built scalable **microservices** with a focus on **availability**, **compliance**, and **performance**.
- Created and exposed **REST APIs** using **Apache CXF** for internal and third-party integrations.
- Participated in **audit**, **regulatory**, and **compliance** processes.
- Led mentoring for junior developers and contributed to code reusability across **front-office** teams.

Key Achievements:

- Enabled processing of **20K+ transactions/second** through performance tuning.
- Reduced system downtime by **80%** and latency by **35%**.
- Standardized frameworks for reuse across **Fixed Income** desks.

Environment & Tools: Java 15, Spring Boot, Kafka, RabbitMQ, FIX, KDB+, ION, MarketAxess, Apache CXF, Jenkins, JIRA, Git, REST, SOAP

Client: The Cigna Group | **Domain:** Healthcare | **Hybrid**
Role: Java Developer – Data Management
Duration: Oct 2021 – Aug 2023

- Developed and maintained **Java J2EE** web applications to process high-volume healthcare data.
- Created scalable services using **Spring MVC**, **Struts**, and **Hibernate**.
- Built **REST APIs** and integrated third-party systems.
- Optimized complex queries and stored procedures in **Oracle**.
- Participated in **Agile** ceremonies and collaborated with **QA** and **BA** teams.
- Troubleshoot production issues and supported mission-critical services.
- Designed batch jobs with **Autosys** and **shell scripting**.
- Maintained code repositories with **Git**, managed workflows in **JIRA**, and deployed via **CI/CD** pipelines.
- Developed frontend components using **JavaScript**, **HTML5**, **SCSS**, and **AngularJS**.

Key Achievements:

- Improved data pipeline performance by **25%**.
- Cut average ticket resolution time by **40%**.
- Boosted **CI/CD** pipeline success rate from **75% to 98%**.

Environment & Tools: Java 11, Spring MVC, Hibernate, Oracle, Struts, Autosys, AngularJS, Git, JIRA, CI/CD, Shell Scripting, HTML5, CSS3

Client: Target | Domain: Retail & E-Commerce | On-Site

Role: Full Stack Java Developer

Duration: Aug 2019 – Jul 2021

- Led enhancements to **Point of Sale (POS)** systems using **Java 11**, **Spring Boot**, and **React**.
- Migrated monolithic systems to **microservices**, improving scalability.
- Integrated real-time pricing, inventory, and promotions using **REST APIs**.
- Orchestrated containerized deployments via **Docker**, **Kubernetes**, and **AWS EKS**.
- Modernized legacy UI with **React**, **Redux**, and **SCSS**, increasing engagement.
- Implemented **Kafka** messaging for asynchronous order and payment processing.
- Automated test cases using **JUnit**, **Mockito**, and **Cypress**.
- Set up **CI/CD** pipelines with **Jenkins**, **GitHub Actions**, and **Terraform**.
- Designed **PostgreSQL** schemas for transactional data and logs.
- Supported **accessibility compliance** (ADA/508) and maintained system availability at **99.98%**.
- Mentored team members and conducted technical reviews.

Key Achievements:

- Reduced order processing time by **45%**.
- Improved POS uptime across **800+ stores**.
- Doubled front-end performance post-React migration.

Environment & Tools: Java 11, Spring Boot, React.js, Redux, PostgreSQL, Kafka, Jenkins, GitHub Actions, Kubernetes, Docker, AWS, Manhattan OMS, Terraform, JIRA, Cypress, JUnit, Mockito

Education:

- **Bachelor's Degree** – St. Joseph's College of Engineering (**Anna University**)
 - **Master's Degree** – St. Francis College, **Brooklyn, NY, USA**
-

Certifications:

- **AWS Certified Developer – Associate**
- **Oracle Certified Java Programmer (OCJP)**
- **Certified Scrum Master (CSM) – Scrum Alliance**

My Professional Experience Highlights:

- Over **5 years** of full-stack experience in **Java**, **Spring Boot**, and **Angular**.
 - Specializing in **front-office** trading systems and **Fixed Income E-Trading**.
 - Deep knowledge of **IAM**, **RBAC**, and cloud modernization (**AWS**, **GCP**).
 - Demonstrated success improving **system performance**, **security**, and **maintainability**.
 - Strong communicator with a track record of **collaboration**, **leadership**, and **mentoring**.
-
