-

EXPERIENCE

Missouri Department of Health and Senior Services | Jefferson City, MO

Public Health Program Specialist | April 2025 – Current

- Lead wastewater sample collection efforts from schools and coordinate recruitment of schools for fentanyl wastewater testing through cold calls and outreach initiatives.
- Communicate with school administrators via calls and emails to explain the purpose and public health benefits of the wastewater surveillance project.

- Educated laboratory and data collection staff about public health regulations and policies to ensure compliance and accurate reporting.
- Coordinate with laboratories and other facilities to obtain wastewater sample data; enter and manage this information in state health systems.
- Manage logistics and timelines for the school-based fentanyl wastewater testing project to ensure smooth implementation.
- Facilitate meetings and provide regular updates to stakeholders to promote collaboration and project alignment.
- Analyze data and communicate the finding in actionable and understandable ways.

Tennessee Department of Health | Nashville, TN

Epidemiologist | August 2023 - February 2025

- Analyzed and processed complex Immunization Information System (IIS) data utilizing SAS coding techniques and dynamic Tableau visualizations to monitor trends in federally funded vaccine (Vaccines for Children & Adult Vaccines) usage and ensure compliance with CDC and TDH standards.
- Created dynamic dashboards and visualizations in Tableau to effectively communicate vaccine trends among Infants and Children.
- Collaborated with programmatic leadership to develop and maintain clear, actionable monthly reports that summarize provider level vaccine usage, wastage, and inventory compliance to support programmatic goals and process.
- ACIP Report - Created and developed an new data report to evaluate provider inventory compliance with ACIP vaccine requirements within the TennIIS Inventory. The report identifies providers lacking required/recommended vaccines in their inventory and generates an automated email notifications to non-compliant providers. These emails detail the specific vaccines needed to achieve compliance, ensuring adherence to immunization guidelines.
- Expiration Date Report - Developed and implemented a comprehensive data report to identify vaccines in the TennIIS inventory that are nearing expiration within the next 60 days.
- Wastage Reports - Created a detailed data report to track and analyze vaccine wastage within the TennIIS inventory for each facility. The report identifies wasted vaccines, categorizes the reason for wastage and calculates the associated costs on a monthly basis.
- Acted as a point of contact for internal and external stakeholders to coordinate vaccine response efforts and provide technical assistance in data interpretation and application.

Indiana Department of Health | IN

Intern | February 2023 - May 2023

- Developed trends and analyzed data on smoking during pregnancy and its association with diseases among newborns and infants.

- Monitored and updated the Indiana Tobacco Quitline data dashboard, including data visualizations shared with local partners.
- Created virtual tobacco awareness posters for native English and Spanish speakers to be displayed on state and school websites and available to general public.
- Assisted in presenting monthly tobacco usage trends through detailed PowerPoint presentations, highlighting key patterns, co-morbidity, and associated risk factors. This initiative aimed to develop effective interventions and educational campaigns to address youth tobacco consumption and its public health implications.

Saint Louis University | Saint Louis, MO

Covid-19 Response Team Member | January 2022 - May 2022

- Worked on an integrated team to assist in Covid-19 specimen collection for testing, identified exposed contacts, data entry and relayed appropriate isolation and quarantine guidance for cases and contacts within the university population.
- Utilized SPSS and SAS to analyze data received through consent forms, case reports and contact tracing reports to summarize incidence of Covid-19 and vaccine behavior among the university staff and students.

Vedavathi Dental Clinic | Bangalore, India Junior

Dentist | March 2020 - June 2021

- Provided preventive dental care advice and treated a variety of dental conditions.
- Conducted dental awareness programs by organizing public outreach events.
- Created educational materials, including videos and posters, to raise awareness about oral health.

AECS Maaruti Dental College | Bangalore, India Intern | February

2019 - March 2020

- Participated in a tobacco cessation program, collecting and managing data on usage patterns.
 - Delivered comprehensive dental care and ensured patient comfort.
-
