

JEEVAN RAVIKUMAR

New Bedford, MA, USA | jeevanravi379@gmail.com | +1 (774) 526 2998 | [LinkedIn](#) | [GitHub](#)

PROFILE

Experienced **Frontend Developer** with over **3 years** of expertise in building responsive, user-focused web applications using **React.js**, **Next.js**, and modern **JavaScript frameworks**. Skilled in performance optimization techniques like **lazy loading** and **code splitting**, improving load times by **30%**. Proficient in **Git**, **Vercel**, and **Sentry** for version control, deployment, and monitoring, with hands-on experience integrating frontend solutions with **Node.js**, **AWS**, and **Azure**. Committed to delivering **WCAG-compliant** designs and seamless user experiences through efficient **CI/CD pipelines**.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** JavaScript, TypeScript, HTML5, CSS
- **Frontend Libraries & Frameworks:** React.js, Next.js, Vue.js, D3.js, Redux, Redux Toolkit
- **Styling Libraries & Frameworks:** MaterialUI, Tailwind CSS, Bootstrap
- **Version Control & CI/CD Tools:** Git, Bitbucket, Vercel, CircleCI
- **Backend Integration:** Node.js (for Backend-for-Frontend tasks)
- **Cloud Services:** AWS, Azure (for frontend deployment and integration)
- **Monitoring & Debugging:** Sentry (for error tracking and performance monitoring)
- **Design Principles:** Responsive Design, Cross-Browser Compatibility, and Accessibility Standards (WCAG)
- **Optimization Techniques:** Code Splitting, Lazy Loading, Performance Tuning for Frontend Applications

WORK EXPERIENCE

Vocadian, Boston, MA | Frontend Software Developer Intern

Oct 2024 – Present

- **Developed UI components for a voice AI-powered B2B SaaS platform** using React Native for mobile and Next.js with TypeScript for the web dashboard.
- **Actively participated in Agile Scrum teams, contributing to sprint planning**, daily stand-ups, and sprint reviews, ensuring timely delivery of features.
- **Managed deployments to production using Vercel** for predictive fatigue risk management solutions, improving the speed of deployment cycles by 15%.
- **Implemented responsive design principles** and ensured cross-browser compatibility, enhancing the user experience across mobile and desktop platforms.
- **Integrated RESTful APIs with Node.js for smooth data exchange** between frontend and backend, improving application performance and scalability.

University of Massachusetts Dartmouth, MA, USA | IT Service Assistant

Mar 2023 – Sep 2024

- **Provided customer service support**, troubleshooting hardware and software issues, achieving a 95% customer satisfaction rate and ensuring timely resolution.
- **Utilized Salesforce ticket tracking system to manage cases**, reducing case resolution time by 30% and improving follow-up accuracy.
- **Communicated technical information effectively to non-technical stakeholders**, leading to a 20% decrease in repeat support requests.

Tvast IT Solutions | Frontend Software Developer

Mar 2020 – Aug 2022

- **Developed 30+ modular and reusable components using TypeScript, React.js, and Next.js**, enhancing scalability and reducing development time by 25%.
- **Optimized state management with Redux Toolkit**, improving application load speed by 20% and boosting maintainability across 8+ projects.
- **Applied performance optimization techniques like code splitting and lazy loading**, reducing load times and boosting user experience.
- **Integrated RESTful APIs to handle 100,000+ data requests daily**, ensuring seamless data flow and reducing error rates by 15%.
- **Managed deployments using CI/CD pipelines**, ensuring smooth and efficient production releases with minimal downtime.
- **Utilized Git for version control**, raised pull requests, and conducted thorough code reviews to maintain code quality.
- **Utilized Sentry to monitor and debug issues** in data processing applications, improving error tracking and enhancing the overall performance of analysis tools.
- **Developed and maintained responsive, user-friendly data dashboards using Material UI**, ensuring optimal performance across devices and enhancing data accessibility.

Backend Developer (Additional Experience)

- **Developed server-side applications using Node.js**, focusing on RESTful APIs, middleware management, and optimizing CRUD operations to improve performance and scalability.
- **Designed and managed relational databases with PostgreSQL and MongoDB**, optimizing database queries, reducing response times by 20%.
- **Implemented secure authentication and authorization mechanisms**, including JWT and OAuth, to ensure secure application access and manage user permissions.

Key Projects and Contributions:

- **Acru - Save Now Buy Later | Micro Savings and Digital Investments App**
 - Improved user engagement by developing dashboards and transaction logs for the admin console using Vue.js, integrating APIs and converting wireframes into functional interfaces, enhancing user experience.
- **Bangladesh National Portal | Official Government Platform for Citizen Services**
 - Enhanced public insight into government initiatives by collaborating with data engineers to build sentiment analysis dashboards in a CMS using React.js, visualizing Twitter and Facebook data and attracting over 188K monthly visitors.
- **Verify Ontrac | Workforce Management and Verification Tool**
 - Streamlined the onboarding process by creating a React.js platform to track new hires and automate background verification, improving efficiency and reducing onboarding time

Moog India Technology Centre Private Limited | Data Analyst Intern

Jul 2019 – Aug 2019

- **Conducted statistical error analysis on aircraft wing electronics amplifier circuits**, identifying and mitigating errors to improve accuracy and reliability of results.
- **Performed Excel-based data analysis, including statistical calculations** and dataset organization to support hypothesis testing and ensure data integrity.
- **Assisted in the preparation of data reports** for stakeholders, improving decision-making and project outcomes.

EDUCATION

University of Massachusetts Dartmouth

Master’s in Data Science

Sep 2022 – Sep 2024

Visvesvaraya Technological University (VTU), India

Bachelor’s in Electronics and Communication Engineering

Aug 2016 - Jun 2020

ACADEMIC PROJECTS

CT Scan Contour Map Visualization

- Developed an interactive CT Scan Contour Map Visualization with D3.js, visualizing pixel intensity data from scans.
- Included dynamic contour plots with adjustable intensity ranges via an interactive brush slider for real-time filtering.
- Applied D3’s geoPath() and contours() functions to create color-coded contour maps, enhancing scan intensity visualization.

Co-Authorship Network Visualization

- Implemented a Network Visualization with D3.js, showing author collaboration via a dynamic force-directed graph.
- Implemented features for users to adjust graph parameters (link strength, collide force, charge force and dynamically control node size based on metrics.

World Energy Consumption Visualized

- Developed an interactive 3D globe to visualize the relationship between global energy consumption and GDP using D3.js and Three.js.
- Created choropleth maps, pareto charts, and stacked area charts to visualize energy consumption trends by country.

Scalable Machine Learning Pipeline for Real Estate Price Prediction

- Developed ML pipeline for house price prediction, including analysis and RESTful APIs.
- Reduced feature dimensionality by 56% via regularization, speeding up model training by 25%.
- Published ML model to private PyPI server and implemented Pytest unit tests for enhanced reliability.
- Orchestrated CI/CD pipeline with Docker containers, reducing time-to-market by 30%.

Movie Revenue Prediction: Sentiment Analysis Integration

- Compared Linear Regression with Random Forest models and improved movie revenue prediction by 8%.
- Extracted sentiment from movie data using NLTK and enabled model accessibility via FastAPI endpoints.
- Developed interactive HTML/CSS webpage for user input and displaying results.

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate – Google, Coursera
 - DP-900: Microsoft Certified: Azure Data Fundamentals – Microsoft
- March 2024
April 2024
