

Jeevana Kuchala

Data Analyst

jeevana.k@mymailkeeper.com | 346-541-5413 | [LinkedIn](#)

Professional Summary

- Data Analyst with 3+ years of experience delivering data-driven solutions in healthcare and finance, leveraging statistical modeling, predictive analytics, and machine learning to drive business outcomes.
- Proficient in Python, R, SQL, and MATLAB with expertise in data visualization using Tableau, Power BI, and Excel, creating interactive dashboards for real-time insights.
- Skilled in ETL processes and cloud platforms such as AWS, Azure, BigQuery, SSIS, and Snowflake, optimizing data pipelines and improving system efficiency.
- Experienced in database management (SQL Server, MySQL, PostgreSQL, MongoDB) ensuring data integrity and HIPAA compliance.

Skills

- **Language:** Python, R Programming, SQL, MATLAB
- **Visualizations:** Tableau, Power BI, Excel (Advanced), Google Analytics, SAS, Looker Studio, PowerPoint
- **Machine Learning:** Naïve Bayes, Statistical Modeling, Time-series Regression, Predictive analysis, k-means
- **ETL and Cloud:** SSIS, SSAS, Informatica, Snowflake, AWS, Azure, BigQuery, Talend, SAP
- **Packages:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Keras, Ggplot2, XGBoost
- **Database:** SQL Server, MySQL, PostgreSQL, MongoDB, Oracle, NoSQL
- **Tools:** SSMS, Data Build Tool (DBT), Snowflake, JIRA, Agile/Scrum, Git, GitHub, Salesforce CRM
- **Data Skills:** Data Cleaning, Data Wrangling, Data Warehousing, Data Mapping, Data Modeling

Work Experience

UnitedHealth Group, TX

Jan 2024 – Present

Data Analyst

- Developed predictive models using linear and logistic regression to enhance patient outcome predictions, achieving a 55% improvement in diagnostic accuracy and treatment recommendations.
- Designed interactive Power BI dashboards to monitor patient admission trends and treatment effectiveness, increasing operational efficiency for hospital administrators and healthcare providers by 25%.
- Automated data pipelines in Azure Data Factory and AWS Glue, reducing data processing time by 44%, helping real-time analytics.
- Designed time-series models to forecast hospital occupancy trends, optimizing staffing and resource allocation across facilities.
- Implemented advanced data validation techniques in Excel, reducing data entry errors by 50%, improving the accuracy of electronic health records (EHRs), and enhancing patient safety by minimizing administrative mistakes.
- Extracted and analyzed large-scale healthcare datasets from MySQL and Snowflake data warehouses, cutting analysis time by 20%, enabling faster patient risk assessments and comprehensive reporting.
- Ensured data integrity and compliance with HIPAA regulations while working with large-scale healthcare datasets, similar to those managed within Epic environments.
- Facilitated cross-functional meetings with both technical and non-technical teams to gather requirements, prioritize initiatives, and ensure alignment between business goals and data solutions.
- Optimized data extraction processes, reducing query times by 30% through database indexing and performance tuning, enabling faster analysis and more timely decision-making for healthcare teams.

Global FinCorp Group, India

Jun 2020 – Jul 2022

Data Analyst

- Developed customized Tableau dashboards and financial KPIs, enabling leadership teams to monitor profit margins, investment performance, and risk exposure, driving a 40% revenue increase through data-driven insights.
- Utilized Python scripts to automate data extraction, financial calculations, and reporting, reducing manual work by 30% and enhancing data accuracy.
- Built scalable financial data infrastructure using AWS, improving risk assessment, forecasting, and regulatory compliance by 10%.
- Executed SSIS packages for seamless financial data transformation, increasing processing efficiency for portfolio analysis and risk assessment.
- Performed A/B testing on investment strategies, pricing models, and marketing initiatives using statistical analysis, resulting in a 15% boost in financial product optimization.
- Generated financial reporting and visualization capabilities using Matplotlib, effectively communicating stock performance to stakeholders, leading to a 20% improvement in financial adoption insights.
- Improved financial data accessibility for risk analysts, portfolio managers, and financial planners by 30% by optimizing PostgreSQL data extraction and loading processes, enabling more agile and informed decision-making.

Education

Masters in Management Information Systems - University of Houston, Houston, Texas

Bachelors in Electronics and Communication Engineering - BMS College of Engineering, Bangalore, India

Certifications

- Introduction to Data Analysis using Microsoft Excel – Coursera
- Accenture North America – Data Analytics and Visualisation Job Simulation by Forage
