6. Nathan Bararas – Co-worker at Experior Laboratories

GAPS OF EMPLOYMENT

The large gap is because I did two contract positions, but the programs got cancelled shortly after being hired, thus the job was no longer necessary. Between both of those jobs I was looking for work and learning new skills (MySQL 5.6). The positions mentioned above are not mentioned below since they were too short of the duration to add to the resume. They are at Coty and Astro Aerospace (Northrop Grumman). My latest position (Bank of America) ended due to company reconfiguration in which my boss's team was laid off, including myself.

PROFESSIONAL EXPERIENCE

BARRY'S TICKETS, SIMI VALLEY

JULY 2019 – OCT 19

Pricing Data Analyst

- ❑ Wrote, edited and extracted data from Access queries to perform comparative analysis.
- ❑ Ran daily and weekly macros reports, altered queries to fit new demands.
- ❑ Modified Sublime programming language in order to run a Python query through command prompt to extract sales data through Ticket Flipper into Excel files, then use Macros to show sales history.
- ❑ Constructed a balance sheet template with future projected cash flow.
- ❑ Flagged disparities between Point of Sales and General Ledger numbers, did a root cause analysis and proved the logic behind the differences for the specific account (COGS).

BANK OF AMERICA, SIMI VALLEY

DEC 2018 – FEBRUARY 2019

Data Analyst

- ❑ Created and maintained three tracking systems for the company's personnel and financial allocations, labeling costs and number of people under each management team's branch.
- ❑ Calculated running monthly costs based upon differentials between outputs on daily changes.
- ❑ Corrected incorrect resources within the resource hierarchies in SharePoint and re-aligned the resources to their correct hierarchies.
- ❑ Performed trend analysis on projected budget constraints due to changes in headcount and resource allocation.

EXPERIOR LABS, OXNARD

JULY 2017 – FEBRUARY 2018

Quality Analyst

- ❑ Created and maintained a work progress database that was used to improve deliverables by over a 75% improvement.
- ❑ Constructed an efficiency tracker for upper management to show efficiency of every worker to improve on inefficiencies.
- ❑ Ensured datasheet integrity of most of our projects before customer submission. I also approved or rejected datasheets based upon strict standards.
- ❑ Gave weekly progress reports on current work projects across business sectors. Was a team player and leader in weekly task assignments and job status updates.
- ❑ Branched out and performed technician work for the datasheets, which is the crux of our business.

SEMTECH, CAMARILLO

SEPT 2016 – APRIL 2017

Quality Assurance Analyst

- ❑ Created and maintained quality a compliance database for external customers and a BCP table for our internal use.
- ❑ Lead project based meetings to outline goals, tasks and responsibilities.
- ❑ Achieved projects completion within budget constraints.
- ❑ Networked with outside vendors to ensure quality compliance for the entire company.

JONES LANG LESALLE, THOUSAND OAKS

MAR 2016–JULY 2016

BCP Admin Assistant

- ❑ Analyzed vendors to identify gaps in vendor reporting, usage and spending.
- ❑ Created custom document progress tracker that identified deadlines based upon objectives, whether those objectives are being met and are they being met on a timely fashion.
- ❑ Constructed database tools for performance trackers, training compliance and trend analysis
- ❑ Built a custom program to target areas of concern in order to improve training and compliance metrics. The program uses the trend analysis to project forecasted results.

LIFECARE ASSURANCE, WOODLAND HILLS

NOV 2015 – FEB 2016

Internal Auditor Trainee

- ❑ Assisted with performance of professional internal auditing work by assessing the effectiveness of internal controls, accuracy of financial records and efficiency of operations.
- ❑ Obtained, examined and documented statistical and department information to ensure compliance with company policies and applicable laws and regulations.
- ❑ Identified, developed and documented audit issues and recommendations using independent judgment concerning areas under review.
- ❑ Assisted in identifying and evaluating the organization's risk area and provides input to audit management.
- ❑ Reconciled bank statements and check payments to account to verify if payments were correct.

WORLD DIGITAL EXPERTS, WOODLAND HILLS

MAY 2014 – OCT 2015

Marketing Analyst and Financial Analyst

- ❑ Aided in creating new business venture, including initial set up, designed the marketing plan/advertisements, logo design, developed business plans, market surveys and executed the meeting minutes.
- ❑ Prepared financial and accounting analysis reports, including; financial forecasting, expected monthly revenue streams and expenses, projected break even analysis and key financial ratios.
- ❑ Assisted CEO with market development and research, created advertisement model and a custom built client database using data warehouse model.
- ❑ Managed our cloud based infrastructure for optimization, inputs and implemented an organizational paradigm for ease of access and improve functionality.
- ❑ Attended weekly board meetings, transcribed the meeting minutes, reported on updates and changes in corporate policy.
