Professional Summary

Strategic and results-oriented Business Analyst and Project Lead with 4+ years of experience delivering transformative solutions across banking, energy, and government sectors. Renowned for leading complex E-Invoicing Data Mart (EIDM) initiatives for top-tier banks, ensuring IRBM compliance through expert SIT/UAT orchestration, backend data validation, and seamless production rollouts. Adept at overseeing change management projects from research through implementation and assessment, managing internal communication, and delivering tailored training and coaching sessions to diverse audiences. A proven bridge between technical and business teams with exceptional defect triage, stakeholder engagement, and user adoption capabilities. Highly praised for proactive problem-solving, polished communication, and the ability to deliver mission-critical outcomes under pressure.

Work Experience

Business Analyst / EIDM Project Lead

Kollect Systems Sdn Bhd – Kuala Lumpur

February 2025 – Present

- Spearheading end-to-end delivery of high-stakes E-Invoicing Data Mart (EIDM) projects for Malaysia's top banking clients, ensuring IRBM compliance and operational excellence.
- Architected robust backend data ingestion pipelines with rigorous data loading, validation, transformation, and staging controls.
- Conducted deep-dive batch file analyses to guarantee precise alignment with Interface Data Definitions (IDDs) and Functional Specifications (FSDs).
- Oversaw transformation rule validation for flawless field mappings and derived data generation.
- Directed UI development reviews to ensure exceptional user experiences that align with business objectives.
- Led SIT and UAT lifecycles from test case design and execution to defect root-cause analysis—delivering faster, higher-quality releases.
- Produced and analyzed exception reports, driving corrective actions to eliminate recurring issues.
- Served as the critical bridge between backend developers and functional stakeholders, facilitating clear communication through documentation and solution workshops.
- Mentored junior analysts, coordinated SIT execution plans, and led defect triage sessions to ensure on-time, high-quality project delivery.

Key Achievements:

- Appointed EIDM Lead Analyst in the first month for exceptional technical depth and stakeholder engagement.
- Reduced SIT defect turnaround times through direct resolution strategies and root-cause analysis.
- Elevated backend-to-UI data translation success, delivering unparalleled data visibility to business teams.
- Commended for leadership, client engagement, and delivering consistently high-quality outputs under demanding timelines.

Current Client-Site Assignment: CIMB – KEiL & EIDM Support (UAT, SIT, Production Environments)

On behalf of Kollect Systems (2025 – Present)

- Embedded on-site at CIMB as the primary liaison for KEiL and EIDM system support, ensuring seamless operations across User Testing (UT), System Integration Testing (SIT), and Production environments.
- Delivered real-time issue resolution, comprehensive bug tracking, and prioritized escalation to internal technical teams for rapid resolution.
- Conducted in-person, hands-on user support, coaching, and training sessions tailored to various audiences including customer management teams and system administrators to drive adoption, confidence, and effective system use.
- Managed ongoing communication and expectations with client stakeholders to ensure alignment, clarity, and buy-in throughout deployment and support cycles.
- Facilitated defect triage meetings, coordinated fix validation, and maintained production stability to minimize business disruptions.
- Maintained detailed issue logs and trackers to support continuous improvement and internal knowledge transfer.

Highlights:

- Recognized by CIMB for responsiveness, problem-solving acumen, and professional client engagement.
- Successfully resolved critical production incidents with minimal operational impact.
- Delivered targeted training that improved end-user operational confidence and reduced recurring support tickets.

Business Analyst

Arise Consulting Sdn Bhd – Kuala Lumpur

November 2022 – January 2025

- Led comprehensive business process modeling projects for PETRONAS (Upstream, Downstream, GHRM, Group Procurement, Governance Assurance Risk) and FELCRA.
- Conducted impactful stakeholder workshops to gather requirements and secure alignment on process transformation goals.
- Authored Level 2 Standard Documents and Method & Convention guides to standardize business processes across diverse divisions.
- Oversaw and led change management initiatives from research and design through implementation and assessment, ensuring smooth adoption of new processes.
- Managed internal communications with stakeholders to align diverse views, build consensus, and secure buy-in for change initiatives.
- Created and delivered coaching and training sessions—including e-learning materials—customized for various audiences such as customer management teams and leadership.
- Effectively translated complex business objectives into clear, actionable training content and workshops that drove consistent understanding and adoption.
- Supported UAT execution and defect management in large-scale transformation initiatives.
- Managed ARIS database libraries for Malaysia Rubber Council (MRC), producing 10+ detailed as-is workflows and cross-reference maps.

Key Achievements:

- Delivered client-approved, high-quality process documentation adopted enterprise-wide at PETRONAS.
- Praised for expertise in ARIS modeling, technical writing, change management leadership, and process standardization.

Sales Executive and Consultant (Part-Time)

Kidocode – Kuala Lumpur

January 2024 – Present

- Conducted over 70+ tailored sales presentations to parents and students, maintaining an impressive 50% closure rate.
- Delivered customized product demonstrations addressing client needs, fostering trust and credibility.
- Contributed to lead conversion optimization and overall customer experience improvements.

User Acceptance Testing (UAT) Tester

Oversea-Chinese Banking Corporation Limited – Singapore

July 2022 – October 2022

- Designed and executed robust test cases for internal banking applications.
- Managed detailed defect tracking, reporting, and regression testing cycles.
- Ensured applications met stringent quality assurance and readiness standards prior to production deployment.

Junior Process Analyst

Arise Consulting Sdn Bhd – Kuala Lumpur

November 2021 – June 2022

- Supported business process modeling initiatives using ARIS Designer for client and internal projects.
- Conducted stakeholder workshops, gathered requirements, and produced clear, precise process documentation.
- Assisted in UAT execution and defect management for process transformation initiatives.

Account Manager

Securemetric Technology Sdn Bhd – Bukit Jalil

February 2021 – October 2021

- Managed sales pipelines for digital signing, PKI, and authentication solutions.
- Conducted client acquisition campaigns, requirements gathering, and tailored solution proposals.
- Surpassed monthly and quarterly sales targets through consultative, relationship-focused selling.

Education
