

Jennica Pesino M.S., CNIM

pesinojv@gmail.com | (707) 315-8502 | Phoenix, AZ | www.linkedin.com/in/jennica-pesino

PROFESSIONAL SUMMARY: Healthcare professional with expertise in surgical neurophysiology at top medical institutions seeking to break into health informatics. Skilled at synthesizing complex clinical and operational data to support patient-centered decision-making and system-level improvements. Experienced working with diverse, interdisciplinary teams in high-acuity settings. Currently pursuing advanced training in health informatics to bridge clinical insight with technology solutions that improve health outcomes at scale.

EDUCATION

Arizona State University (Expected 2025)

Master of Advanced Studies in Health Informatics

Parker University

Master of Science in Neuroscience

James Madison University

Bachelor of Science in Biotechnology

TECHNICAL SKILLS

- Healthcare Data Tools: SQL and SPSS
- Health IT Systems: EPIC, EHR/EMR systems, HIPAA & HITECH compliance
- Clinical Expertise: Medical terminology, neurophysiology modalities, clinical documentation
- Other Tools: Microsoft Office Suite, neuromonitoring software
- Emerging Technologies: AI concepts in healthcare, data privacy and interoperability knowledge

PROFESSIONAL COMPETENCIES

- Data-driven clinical decision support
- Workflow analysis and improvement
- Cross-functional collaboration and communication
- Clinical education and knowledge translation
- Project coordination and change management

EMPLOYMENT HISTORY

Mayo Clinic |Phoenix, AZ|

Surgical Neurophysiologist/IONM Specialist May 2022 - Present:

- Leveraged clinical and workflow data to support surgical outcome tracking and quality improvement efforts.
- Created reports and dashboards to guide team-level operational decisions.
- Acted as charge technologist, managing case assignments and mentoring junior staff.
- Developed educational materials to standardize neurophysiologic monitoring protocols.
- Engaged in interdisciplinary discussions on patient safety and care planning.

University of Maryland Medical Center |Baltimore, MD|
Surgical Neurophysiologist Nov 2019 - Apr 2022:

- Collaborated with physicians and OR teams in a Level 1 trauma center to monitor and interpret intraoperative neurophysiologic data.
- Contributed to clinical decision-making in high-stakes environments by providing real-time data to reduce patient risk.
- Supported continuous improvement through accurate, timely documentation in patient records.

Primary and Urgent Care |Fredericksburg, VA|
Medical Assistant Dec 2018 - Oct 2019:

- Utilized EHR systems for patient intake, documentation, and care coordination.
- Supported population-level care by contributing to chronic disease management workflows and follow-up scheduling.
- Assisted in the optimization of digital workflows to reduce administrative burden on providers.
