PROFESSIONAL SUMMARY

Analytical and detail-oriented aspiring Data Analyst with a strong foundation in Excel, Power Query, SQL, and Power BI. Skilled in data cleaning, database management, and statistical analysis to generate actionable insights that support strategic planning and business decisions. Adept at translating complex data into clear visualizations and reports to support communication across teams. Recognized for being a strong team player, and for having a growth mindset and consistent work ethics, with a commitment to continuous learning and data-driven problem-solving.

EDUCATION

Texas A&M University - College Station
Bachelor's, Public Health

August 2020 - May 2025

CERTIFICATIONS

Excel: Power Query (Get & Transform) - MD Anderson Education Center
SQL Essentials - MD Anderson Education Center
HTML/CSS & JavaScript Specialist - Global Career Accelerator

PROFESSIONAL EXPERIENCE

MD Anderson Cancer Center

Remote

Intern of Office of Patient Experience

January 2025 - Present

- Streamlined data cleaning process for two internal workforce surveys by automating monthly updates using Power Query.
- Reduced manual data processing time by 30+ hours per month, improving efficiency and consistency.
- Designed reusable data models that allow for one-click refresh to update cleaned datasets and Power BI visuals.
- Streamlined survey delivery by transitioning patient experience forms to an accessible online format, enhancing outreach and simplifying data collection.
- Used effective written and verbal communication through emails, team meetings, and 1-on-1 meetings

Texas A&M University

College Station, TX, USA

Peer Mentor

March 2023 - December 2024

- Mentored 20+ students, providing guidance on academic planning, course registration, and campus involvement
- Provided leadership and one-on-one mentorship to students struggling with the Texas Success Initiative (TSI), helping them build confidence and improve academic performance
- Cultivated an inclusive and supportive environment by facilitating 30+ meetups and engagement opportunities, promoting connection and community among mentees

PROJECTS

"Facilitator Ratings" Survey Data Project

Remote

- Data Cleaning & Automation:** Cleaned and validated 5,000+ survey responses using Excel and Power Query. Built an automated data pipeline with one-click refresh functionality, improving data accuracy and saving 30+ hours per month in manual processing.
- Interactive Dashboard Creation:** Developed a clean, organized Power BI dashboard to visualize facilitator ratings across multiple concepts. Used slicers, DAX, and visuals such as cards, gauges, bar graphs, and word clouds to provide personalized, at-a-glance insights for each facilitator.
- Collaboration & Learning:** Held weekly check-ins with manager to align goals and share progress. Gained platform expertise through collaboration with coworkers. Recognized for strong initiative, adaptability, and ability to learn new tools quickly while delivering high-impact, data-driven solutions.
