

Jerine Joseph (CSM)

Technical Scrum Master / Agilist

Professional Experience

Oct 2016 -
present

Scrum Master / Agile Consultant

Employer: Computer Sciences Corporation **Client:** Sammons Financial Group

Working as a Scrum Master / Agile Consultant during an Enterprise level Agile Transformation for this client and formed 3 distributed teams and facilitated them to continuously deliver Business Value. Helped Life IT Services run the Day 2 Program with the below Teams:

- **Team #1 - Accelerated Death Benefit Endorsement (ADBE) Quote Feature Project:**

This team incrementally shipped out ADBE Quote Feature delivering across 4 major releases (in 5 months). This Project involved multiple Technology stacks and Legacy components in CyberLife, Mainframe Systems, DB2, Java API (REST and SOAP based Web Services), dot NET UI & MS SQL Server Database.

Feedback from Business : *"Saves up to a week in obtaining the quote values from Actuaries. Much quicker turn around time to Customer (time reduced from 7 days to less than a day for the ADBE Quote to reach the Policy holders)!!"*

- **Team #2 - Day 2 Gaps Remediation Project:**

This Project focuses on Day 2 Functions across currently Marketed Products to discover gaps and deliver 18 major features enabling Business to process Policy requests.

Feedback from Business : *"Delighted to see the Day 2 Team deliver high priority features first and still being flexible to address re-prioritized work items. My PC Team enjoys these quality features delivered in the past releases and looking forward for more to come. Would love to continue working with this team during the entire Day 2 Program!!"*

- **Team #3 - CyberLife Automation Project:**

This Project was initiated to automate and orchestrate Main Frame components to enable multiple Agile teams in their continuous delivery cycle. This team built automation framework using Selenium & Jenkins scripts.

Major responsibilities include:

- Co-ordinate & facilitate Scrum Rituals – Daily Scrum Stand ups, Planning & Commit Sessions, Backlog Grooming and Retrospectives
- Work closely with Business Stakeholders and coach Product Owner & Business Analyst to build a comprehensive Backlog from scratch.
- Road Map Planning for new Features & Agile Projects.
- Induct new teams with no experience in Agile Methodology and coach them to evolve into a self-organized, high performing Agile Team.
- Bridge the Steering Committee, Product Owner Advisory Group and the team's Release Plans and Roadmaps.

Summary

- **Passionate Agilist & Certified Scrum Master with 6.5 years of IT exposure.**
- **4+ years of experience with Scrum & Kanban flavors in Agile Methodology.**
- **Capable of building self-organizing Scrum teams to deliver Product Features, SaaS and Web development Projects on schedule and on budget.**
- **Worked with Clients like Thomson Reuters, PayPal & Sammons**
- **Facilitated distributed Scrum teams across domains & Tech stacks to enable delivery with measurable continuous improvement.**
- **Effective Servant Leader as Agile Coach & Technical Lead**
- **Good Exposure to Agile Program Management.**

Scrum Master / APM

Employer: Computer Sciences Corporation Client: PayPal Inc., (San Jose, CA)

As a Scrum Master – responsible for incrementally releasing Payments and Risk Services with distributed teams at Offshore and Onsite. This Program supports 6 major services (implemented REST API’s) with SLA’s maintained at Response time of 300 to 500ms.

Major responsibilities include:

- Coordinate release activities across scrum teams within a specific delivery group.
- Collaborate with the team on transformation maturity metrics shared by Agile Transformation Team and set improvement milestones.
- Facilitate and lead Program level meetings: Release Planning, Scrum of Scrums, with a clear agenda, involving key stakeholders - focused on goals and key outcomes.
- Work closely with the CPO (Chief Product Owner), Architect and various leads to ensure alignment across domains.
- Identify dependencies/impacted teams before initiating Release activities and ensure that the impacted team’s velocity is clearly stated before release planning activity begins.
- Maintain and share Stakeholder matrix with user stories and POCs to track cross-domain dependencies.
- Facilitate and participate in the Scrum of Scrums meeting to assess the progress and status of every delivery team against a specific timeline.
- Create and maintain Metrics and Reports to track - Burndown Charts, Team Velocity, Sprints and Release Progress.
- Collaborate with multiple product owners and provide visibility on ongoing and next in line priority work.
- Report on KPIs/Metrics, also highlighting overall program status, issues and risks.
- Engage senior stakeholders to help remove major impediments or roadblocks.
- Co-ordinate release activities across domains and handle dependencies early in the execution cycle.
