Skills

C++
Python
R
Lua
Teamwork
Time Management
Organization
Communication
Problem-Solving
Self-Motivation/Initiative
Determination
Dependability/Reliability
Multitasking
Advanced Math Proficiency
Enthusiastic about Math and Data Analysis
Adaptability
Attention to Detail
Critical Thinking

Profile

Computer Science and Information Security graduate with a strong foundation in programming and cybersecurity. Self-driven and adaptable, with a fast learning curve and a proactive attitude toward feedback. Excellent time management skills in high-pressure environments. Seeking an entry-level role in software engineering, game development, cybersecurity, data analysis, or technical support, with a strong interest in leveraging modern AI tools and innovative technologies.

Education

B.S. in Computer Science & Information Security, John Jay College of Criminal Justice, New York City

AUG 2021 – JUN 2025

GPA - 3.925 | Summa Cum Laude | Relevant Coursework - Object-Oriented Programming, Computer Architecture, Cryptography & Cryptanalysis, Advanced Data Structures, Programming Languages, Operating Systems, Computer Algorithms, Computer Networking, Computer Security & Forensics, Network Security & Forensics, Discrete Structures, Calculus I, Probability & Statistics, Databases and Data Mining, Linear Algebra, Ethics & Information Technology, Capstone Experience in Cybersecurity I, Capstone Experience in Cybersecurity II

Projects

Capstone Diplomacy Lab Project - Cybersecurity: What Role Do We Play in Staying Secure?, John Jay College

Analyzed and researched a range of cybersecurity tools and practices to evaluate their effectiveness in promoting personal and organizational security. Collaborated with a 4-person team; worked independently on assigned sections and co-designed a final presentation poster. Took the lead in delivering the full group presentation alongside one teammate after two members were absent, demonstrating strong communication and leadership under pressure.

Tools/Skills - OpenSSL, technical research, public speaking, teamwork, poster design, written communication.

Capstone Project - Creating a User Management System with Authentication and Access Control, John Jay College

Developing a secure user management system that allows users to create, store, and evaluate passwords based on strength, complexity, and common vulnerabilities. Implemented password hashing using bcrypt. Researched password habits and attack trends. Built password strength analysis features that provide users with actionable feedback and recommendations for improvement. Presented project progress in four separate academic reviews with data visualization and code. Collaborated with a 4-person team and originated the concept.

Tools/Skills - Python, bcrypt, password cracking research, technical writing, data visualization, team leadership.

Network Security Project - Comparative Analysis of ACL and Firewall Defense Mechanisms for IoT Networks, John Jay College

Designed and executed a Cisco Packet Tracer simulation to compare Access Control Lists (ACLs) and firewall configurations in mitigating DDoS and botnet attacks on small-scale IoT networks. Evaluated defense mechanisms based on detection rates, latency, and throughput metrics under varying flood attack intensities. Divided workload among team members, contributing to experiment design, data analysis, and report writing. Collaborated with a 3-person team.

Tools/Skills - Cisco Packet Tracer, ACL configuration, firewall setup, network simulation, attack mitigation strategies, teamwork.

pwn.college Cybersecurity Training

AUG 2024 – MAY 2025

Completed extensive hands-on labs in Linux security, exploitation, reverse engineering, and CTF-style challenges. Developed strong skills in debugging, privilege escalation, and scripting solutions. Demonstrated persistence, problem-solving, and security-oriented thinking.

Roblox Game Development (Personal Project)

OCT 2025 – OCT 2025

Designed and built a full interactive game in Roblox using Lua scripting. Implemented player mechanics, UI elements, competitive gameplay systems, and interactive features. Learned Lua independently and applied coding best practices. Focused on user experience, testing, and iterative improvement.

Experience

Receptionist, Nail Define & SPA, Doylestown, Pennsylvania

FEB 2021 – AUG 2021

Customer service | Efficiently managed multiple tasks | Maintained focus and productivity in a fast-paced setting | Quickly learned new procedures | Demonstrated strong time management | Maintained open, professional communication with management to clarify tasks and proactively address issues or customer concerns

Certifications or Awards

Regents Advanced Designation, Aviation Career & Technical Education High School

Awarded for completing advanced academic coursework with high standards

Career & Technical Endorsement, University of the State of New York & New York State Education Department

Officially recognized on high school diploma for technical proficiency and career readiness

Latin Honors (Summa Cum Laude), John Jay College of Criminal Justice

Highest distinction awarded to students whose cumulative GPA is at least 3.9

Dean's List Achiever, John Jay College of Criminal Justice

2021 – 2025

Recognized for academic excellence by making the Dean's List every semester

Extracurriculars/Leadership/Volunteering

Women in Aviation Club

2019 – 2021

Participated in STEM outreach and aviation-focused workshop promoting diversity and career awareness

Varsity Basketball

2017 – 2018

Developed teamwork, discipline, and strong time management skills while balancing academics and rigorous daily practice sessions
