

JESWANTH REDDY DWARAM

Omaha, NE - +1(402)320-7104

jeswanthreddyd@gmail.com - www.linkedin.com/in/jeswanth78

Data Engineer with expertise in **building scalable data pipelines, automating ETL workflows, and optimizing data warehouses (Snowflake, AWS, Hadoop, Spark)**. Skilled at extracting, transforming, and validating data from diverse sources including APIs, cloud platforms, and enterprise systems. Strong background in **SQL development, data modeling, and pipeline automation**, with proven success in improving data accessibility and system reliability. Adept at collaborating across functions to deliver **high-quality, analytics-ready datasets**.

TECHNICAL SKILLS

- **Programming:** Python, SQL, R, Java
- **Data Engineering:** Snowflake, AWS (EC2, S3, Lambda), Hadoop, Spark, Kafka, Dell Boomi, API Integrations
- **Data Pipeline & ETL Tools:** SQL-based ETL, Dell Boomi, Airflow, Data Warehousing, Data Modeling
- **Databases:** Snowflake, PostgreSQL, Oracle, MySQL
- **Visualization & BI:** Tableau, Power BI, Excel, SPSS
- **Other Tools:** Postman, JIRA, Git, Splunk, Salesforce, SDLC
- **Machine Learning Tools:** pandas, NumPy, scikit-learn, TensorFlow

PROFESSIONAL EXPERIENCE

- University of Nebraska at Omaha: Graduate Assistant/Data Engineer** **Nov 2023 - May 2025**
- Developed scalable data workflows using **Python** and **SQL**, reducing project timelines by 30% through automated extraction and transformation routines.
 - Designed and executed over 25 data validation test cases using **SQL** and **Excel**, ensuring >95% data accuracy.
 - Built and visualized social network structures employing **Python** and **NetworkX**, enabling actionable analytics for research teams.
 - Coordinated cross-functional collaboration to manage workflow and testing for large datasets.
- Salesforce, Hyderabad, India: Data Engineer** **Nov 2022- Jan 2023**
- Automated data extraction and transformation processes with **SQL** and **Python**, reducing analysis time by 40% and improving accuracy.
 - Integrated product feedback datasets into **Snowflake** and engineered analytical queries for real-time stakeholder insights.
 - Built interactive dashboards using **Tableau** and **Python** to visualize product metrics and drive business decisions.
 - Validated data requirements, sources, and reporting logic using **Postman** and **JIRA** with business and engineering teams.
- Tata Consultancy Services, Hyderabad, India: Data Engineer** **Apr 2021- Nov 2022**
- Engineered and maintained ETL pipelines across enterprise platforms leveraging **Dell Boomi, SQL, and AWS** (EC2, S3, Lambda), boosting efficiency and reliability.
 - Delivered cloud-based data integration solutions via **Dell Boomi** and real-time API pipelines, improved data flow for analytics and operational systems.
 - Modeled and structured datasets in **Snowflake, Hadoop, and Spark** to support scalable reporting and machine learning.
 - Developed internal dashboards using **Power BI** and **Excel** to enhance business visibility.
 - Conducted extensive system testing and validation using **Postman** and **JIRA**, maintaining integration and data quality.
 - Mentored junior analysts on data automation tools and pipeline best practices, driving team knowledge in **ETL** and cloud integration.

EDUCATION

- **University of Nebraska at Omaha, Omaha** **Jul 2023 - May 2025**
Master of Science, Data Science
- **KL University, Vijayawada, India** **Jul 2015 - May 2019**
Bachelor of Technology, Electronics and communication Engineering

AWARDS & INVOLVEMENT

- **On the Spot Award:** Awarded the 'On the Spot Award' at TCS for real-time platform integration. August 2022
- **Data Science club:** Member - UNO Data Science Club & Hackathons
- **Indian Student Association:** Executive Member - ISA UNO; collaborated with sponsors to organize events
