SUMMARY

Data Engineer with 3 years of experience designing and maintaining scalable data pipelines across AWS, Azure, and GCP. Strong expertise in **Python, SQL, and Airflow** for building automated ETL/ELT workflows, with hands-on experience in **data modeling, data quality frameworks, and cloud data warehousing (Snowflake, Redshift, BigQuery, Synapse)**. Skilled at integrating structured and semi-structured data from multiple sources into centralized warehouses to support analytics and product use cases. Industry background spans **insurance, healthcare, and startup environments**, with exposure to **real-time data processing (Kafka)** and **modern transformation frameworks like DBT**.

SKILLS

Programming & Data Processing: Python, SQL (advanced), PySpark, Shell Scripting

ETL / ELT Pipelines: Airflow, dbt, SSIS, Azure Data Factory, AWS Glue, DataStage

Cloud & Databases: AWS (S3, Redshift, RDS, Glue), Azure (Data Lake, Synapse), GCP (BigQuery, Dataflow), Snowflake, SQL Server, Oracle, PostgreSQL, MongoDB

Data Modeling & Warehousing: Star Schema, Snowflake Schema, Kimball methodology, Data Vault 2.0

Data Quality & Monitoring: Error handling, data validation frameworks, alerting, audit logs

Real-Time & Streaming: Kafka, event-driven pipelines

Visualization & Reporting: Power BI, Tableau, Looker, SSRS

Other Tools: Git, Jenkins, CI/CD, Agile/SCRUM collaboration

WORK EXPERIENCE

Data Engineer - AI & Analytics | Ryan Specialty, Chicago, IL

November 2024 – Current

- Designed and deployed SSIS packages and ADF pipelines to integrate Salesforce CRM, underwriting, claims, and policy data into SQL Server, Snowflake, and BigQuery for downstream analytics.
- Designed and maintained Airflow and dbt-style pipelines to integrate Salesforce CRM, claims, and policy data into Snowflake and BigQuery for enterprise reporting.
- Developed Python and SQL-based transformations to cleanse, standardize, and validate insurance datasets, improving downstream analytics reliability.
- Built scalable data models (star/snowflake schema) to support underwriting, claims analytics, and executive dashboards.
- Implemented data quality checks, alerts, and monitoring frameworks, ensuring pipeline stability and SLA compliance.
- Partnered with product managers and data analysts to translate business requirements into automated, production-grade pipelines.
- Delivered dashboards in Tableau and Looker to visualize policy, claims, and performance metrics for decision-making.

AWS Data Intern | CHG Healthcare, Utah

April 2024 – October 2024

- Developed SSIS and AWS Glue ETL pipelines to process healthcare vendor data, pharmacy claims, and covered entity eligibility files, aligning workflows with 340B program rules.
- Implemented T-SQL and Python-based validation rules to verify patient eligibility, drug utilization, and pricing accuracy across multiple data sources.
- Designed SSRS and Power BI dashboards to visualize 340B metrics, including drug dispensing trends, inventory reconciliation, and covered entity utilization.
- Produced detailed mapping documents, test cases, and pipeline documentation to provide transparency, support audits, and maintain compliance with federal healthcare regulations.

Analytics Engineer - GCP | DMI, India

August 2021 – July 2023

- Developed end-to-end ELT pipelines in BigQuery and SQL Server to onboard new insurance and financial data sources, including policy and claims data.
- Optimized SQL transformations and data models, reducing query execution times and improving reporting turnaround by ~30%.
- Configured Airflow workflows to schedule, orchestrate, and monitor data processing tasks across multiple systems.
- Implemented real-time data ingestion with Kafka, supporting near real-time reporting for financial operations.
- Designed DBT-like transformations in SQL for insurance metrics, ensuring alignment with industry data standards.
- Delivered interactive Tableau dashboards to visualize claim utilization, premium tracking, and risk exposure.
- Collaborated with architects and compliance teams to ensure data governance, audit readiness, and adherence to insurance regulatory requirements.

EDUCATION

Kent State University

Kent, Ohio

Master of Science, Business Analytics | GPA: 3.8

Coursework: Data Analytics & Visualization (Power BI, Excel, SQL), Business Analytics & Decision Modeling, Database Management & Analytics, Data Mining, Quantitative Management Modeling,

Vignana Bharathi Institute of Technology

Hyd, IN

Bachelor of Technology, Electrical and Electronics Engineering | GPA: 3.7

CERTIFICATIONS

Salesforce Certified Administrator (SCA) (2024) by Salesforce Trailhead

AWS Cloud by AICTE and EduSkills (2021)

AI & ML Certification by AICTE and EduSkills (2022)
