

JINIL PATEL

SOFTWARE ENGINEER

TN | 615-933-3618 | pateljini00@gmail.com | [LinkedIn](#)

SUMMARY

Software Engineer with 3+ years of experience developing scalable software solutions using Java, Python, and SQL. Skilled in full-stack development with expertise in Angular, ReactJS, Spring MVC, and Django. Designed and implemented solutions that increased system efficiency by 25% and enhanced customer satisfaction by 15%. Proficient in Agile development, database management (MySQL, PostgreSQL), and cloud platforms (AWS, Azure). Focused on delivering high-performance applications aligned with business objectives.

SKILLS

Methodology: SDLC, Agile, Waterfall

Languages: Core Java, Java8, SQL, Python, C++, PHP, GraphQL, REST APIs, Angular 11, TypeScript, Dart

Frameworks: Spring MVC, Django, ReactJS, Spring Boot, Spring Security, Microservices, Struts 2, Node.js, JSF, Hibernate, JPA

IDEs: NetBeans, IntelliJ IDEA, Visual Studio Code

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Web Technologies: HTML5, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML

Application Server: Apache Tomcat, Web Sphere

Cloud Technologies: AWS (EC2, Lambda, S3), Microsoft Azure

Databases: MySQL, PostgreSQL, NoSql

Build /Other tools: UML, MS Visio, Maven, Gradle, Jenkins, Junit

Version Control Tools: Git, GitHub

Operating Systems: Windows, Linux

EDUCATION

Master of Science in Information Technology

Aug 2022 – April 2024

Arizona State university

Bachelor of Technology - Information and Communication Technology

July 2018 – June 2022

Adani Institute of Infrastructure Engineering

EXPERIENCE

ServiceNow, TN | Nov 2023 - Current | Software Engineer

- Led cross-functional Agile teams using JIRA for sprint planning and progress tracking, ensuring the timely delivery of scalable and robust software solutions.
- Built dynamic, responsive front-end applications using Angular 11, HTML5, CSS, and TypeScript, leveraging RxJS for efficient state management and ensuring cross-browser compatibility, which improved user experience.
- Streamlined client-server communication by integrating REST APIs, GraphQL, and JSON with Postman for testing, boosting data retrieval performance by 30%.
- Followed Agile and SDLC methodologies, using Jenkins for continuous integration and deployment, achieving timely sprint milestones and high-quality deliverables.
- Configured and managed Apache Tomcat and WebSphere servers, applying skills in server optimization to achieve 99.9% uptime and improve deployment processes.
- Utilized IntelliJ IDEA and Visual Studio Code for coding and debugging, while managing version control through Git, ensuring clean, maintainable code with regular code reviews.

Infinite Infolab, India | Jan 2020 - July 2022 | Software Engineer

- Executed projects using the Waterfall methodology, managing requirements, design, and deployment phases with tools like MS Project and Excel.
- Developed and optimized back-end services with Python, C++, PHP, and Java 8, leveraging multi-threading and performance profiling to reduce system latency by 40%.
- Designed and implemented microservices architecture using Spring Boot, Spring Security, and Node.js, applying Docker for containerization to enable modular integration and rapid scalability.
- Managed complex database interactions with J2EE technologies (Servlets, JSP, JDBC), utilizing SQL query tuning and stored procedures to enhance secure and efficient data handling.
- Enhanced database performance in PostgreSQL and NoSQL by implementing advanced indexing and optimization techniques, reducing query response times by 50%.
- Deployed cloud-based solutions on AWS (EC2, Lambda, S3), using Terraform for infrastructure automation and pipelines for CI/CD to cut operational costs by 20% and improve system scalability.
