Education

Texas A&M of Central Texas.....BAAS – Information Technology

Central Texas College.....AA Information Technology, AA Interdisciplinary Studies

Technical Skills

Languages: C#, SQL, C++, JavaScript, TypeScript, Python, HTML/CSS,

Frameworks/Libraries: Playwright, .NET, Selenium, bUnit, React, Node.Js

Technologies & Tools: GitHub, GitLab, Docker, Microsoft SQL Server, CI/CD Pipelines

Methodologies: Agile / Scrum, End-to-End Testing, Unit Testing, Acceptance Testing

Professional Development

Software Test Engineer Intern – *Trideum* September 2024 – September 2025

- Validated **CI/CD pipeline builds**, diagnosing failures and coordinating fixes prior to deployment to production environments
- Collaborated closely with developers and testers within an **Agile/Scrum** environment to plan, execute, and verify testing tasks
- Designed, executed, and maintained **automated unit and UI tests** using Playwright, Selenium, and bUnit
- Supported **software readiness and acceptance testing** by ensuring builds met functional requirements and quality standards
- Identified, documented, and resolved **front-end and back-end** defects across the application's user interface and business logic
- Utilized **GitLab** for version control, pipeline monitoring, and collaborative development workflows
- Maintained **system security compliance (STIG)** through backend configuration validation and system hardening

Chief Operations Officer – TAMUCT's OSCCCT / Coding Warriors November 2024 – December 2025

- Established documentation and technical standards to define workflows, approved methodologies, and milestone tracking throughout the project lifecycle
- Responsible for use of **containerization technologies (Docker)** to support consistent development environments, scalable project delivery, and governed version control practices using **GitHub**
- Evaluated and introduced technology tools to enhance operational efficiency, **providing strategic guidance and hands-on enablement to ensure effective adoption**
- Led cross-functional collaboration efforts to align technical execution with organizational objectives
Directed the development of initial project scaffolding and boilerplate code to promote consistency, scalability, and best practices across team initiatives

Projects

XML / Excel Playwright Reader & Converter - Developed an automated script to read, compare, and validate XML and Excel data sources using Playwright to support QA and validation with these structured data formats.

OSCCCT Website - Made the initialize boilerplate code and contributed to the design and implementation of a client-facing web application using modern JavaScript frameworks, Typescript, and React in a team-setting.
