

Sai Rahul Jagarlamudi

St. Louis, MO | +1(945)-239-7668 | rahuljagarlamudi.tech@gmail.com | [LinkedIn](#)

Software developer with 3+years of proven expertise in **cloud automation, data engineering, and backend development**, specializing in inbuilding scalable, cloud-native systems using **Python, Java, and AWS**. Successfully led enterprise-scale data migration and optimization of 1.5B+ records into Parquet formats and ensuring high data integrity through comprehensive validation. Experienced in designing and maintaining robust **RESTful APIs** using both **Spring Boot and Django** and developing **dynamic data ingestion pipelines** across structured and semi-structured sources. Adept at provisioning infrastructure using **Terraform**, and working with **Snowflake, PostgreSQL, and MySQL** to support high- performance, analytics-ready environments. Also experienced in designing interactive user interfaces using **Angular** and **React.js**, ensuring seamless integration between back-end systems and front-end applications.

WORK EXPERIENCE

JPMorgan Chase – San Francisco, CA
Software Engineer

2024 Jan - Present

- Led the migration and validation of over **1.5B+ records** and **500GB+ data** from FRB Bank, achieving **100% accuracy** with zero data loss.
- Built **scalable serverless data pipelines** using **AWS Glue, Lambda, and Athena**, enabling on-demand querying and reducing ETL load times.
- Developed Python-based automation scripts for **data ingestion, validation, and Parquet optimization**, improving performance and storage efficiency.
- Designed a **metadata-driven batch processing system** for large transaction files, enhancing flexibility and maintainability across ingestion workflows.
- Engineered infrastructure as code using **Terraform** and automated **AWS S3 file operations** with Boto3 to streamline cloud deployment and data access.
- Collaborated with analytics teams and leveraged **Snowflake and SQL** for post-migration validation, ensuring reliable business reporting and regulatory compliance.

L&T Technology Services – Chennai, TN
Junior Software Developer

2020 Nov – 2022 Dec

- Built a healthcare ingestion platform **processing 1M+ records/month with Spring Boot and Java**.
- Automated data validation workflows, **reducing manual efforts by 85%**.
- Integrated PostgreSQL and MySQL to enhance query performance and reduce **latency by 30%**.
- Improved system reliability through SLF4J logging, Java Mail alerts, and schema validation.
- Collaborated with cross-functional teams to ensure pipeline adaptability to evolving EHR standards.
- Recognized with **a team excellence award for** impactful contributions to backend automation and ingestion systems.

SKILLS

- **Languages & Frameworks:** Python, Java, CSS, Spring Boot, Django, Java Script, React, Git (GitHub),
- **Cloud & DevOps:** AWS (Lambda, S3, Glue, Athena), GCP, Terraform, Docker, CI/CD.
- **Data & Databases:** Snowflake, PostgreSQL, SQL, MongoDB.
- **Testing & Monitoring:** Pytest, JUnit, Mockito, Postman, SLF4J.

EDUCATION

Webster University - Master of Science, Cybersecurity Operations

Jan 2023 - June 2024

St. Louis, MO
