FULLSTACK SOFTWARE ENGINEER

4 years of experience building scalable web and mobile apps with React, Next.js, and Node.js. Scaled ventures to six-figure revenue, boosted retention 5x, and engineered automation cutting test runtimes by 45%.

EXPERIENCE

Fullstack Software Engineer

QA Wolf

July 2025 - Present, Remote

Fast-growing QA-as-a-service startup founded in 2019, backed by \$36M Series B funding. Provides end-to-end automated test coverage for startups to enterprise clients including Figma.

- Hit 80% automated test coverage within 4 months for client applications by engineering and maintaining scalable Playwright suites in JavaScript.
- Optimized testing infrastructure by parallelizing execution and streamlining CI/CD (GitHub Actions), cutting regression suite runtime by 45%.
- Diagnosed, reproduced and documented complex software defects; accelerated resolution and cut client-reported issues by 30%.
- Designed reusable test libraries for API, UI, and integration testing, establishing standardized best practices across teams.

Fullstack Software Engineer

BigChadGuys

March 2023 - Present, The Woodlands, TX

Independent gaming and digital media studio creating community-driven projects, including the popular Minecraft modpack BigChadGuys Plus. Partnering with Disney, Twitch, and St. Jude to deliver engaging experiences to a global audience.

- Built and maintained core Java applications, shipping regular updates and new features that supported thousands of active users.
- Scaled the BigChadGuys venture to ~\$100K in monthly revenue by combining technical improvements with strong community engagement.
- Enabled tools and workflows that supported content delivery reaching 40M+ views and 25M+ downloads across platforms.
- Collaborated with artists, developers, and writers to ensure product quality, optimize pipelines, and drive creative innovation.

Fullstack Software Engineer

Sock Club

February 2022 - March 2023, Austin, TX

Fast-growing apparel and promotional products company producing 15M+ pairs of U.S.-made socks. Operates a direct-to-consumer subscription brand and a B2B custom division, providing branded products for major clients such as Google, Whataburger, and Slack.

- Led development of a DIY design tool using React and Node.js, driving a 3x revenue increase and 5x boost in user retention.
- Built an internal API to generate 3D-rendered product images, automating workflows and cutting design turnaround time.
- Redesigned the company website with a mobile-first approach, improving performance and accessibility across devices.
- Created and maintained internal tools with design teams, streamlining the intake pipeline and improving collaboration.

PROJECTS

Fullstack Software Engineer

greenlit

February 2025 - Present, The Woodlands, TX

- Built greenlit, a local ride-sharing platform for The Woodlands, featuring seamless booking and real-time driver-rider matching while enabling drivers to retain 80% of fares and lowering rider costs by a competitive margin.
- Developed the web app in React and mobile app in React Native, delivering fast, consistent cross-platform experiences with 99% crash-free sessions and sub-second load times.
- Implemented real-time ride tracking, payment processing, and secure authentication, ensuring reliability and trust for both riders and drivers.
- Integrated advanced analytics and reporting dashboards into greenlit, empowering data-driven decisions and facilitating targeted enhancements based on user behavior patterns and marketplace trends.

EDUCATION

Fullstack Software Development Immersive Course

App Academy | New York City, New York | August 2021

Certificate of Computer Programming

Lone Star College | Houston, Texas | August 2020

SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, Ruby

Frameworks & Libraries: React, Next.js, React Native, Redux, Tailwind CSS, Three.js, Express.js, NestJS, Node.js, Prisma, Ruby on Rails, tRPC

Databases & Cloud: Firebase, MongoDB, Neon, PostgreSQL, Redis, SQLite, Supabase, AWS, Docker, Vercel

Developer Tools & Systems: Git, GitHub Actions, GitLab, Playwright

Web Technologies: HTML5, CSS3
