EDUCATION

Gojan School of Business and Technology

Bachelor of Engineering. in Computer Science and Engineering

Chennai, India

Nov 2020 -May 2024

- **Related Coursework:** Data Structures & Algorithms, Objects Oriented Analysis & Design, Operating Systems, Internet Programming, Machine Learning, Artificial Intelligence, Object-Oriented Programming, Software Engineering

EXPERIENCE

Ivy Global Trading

Junior Data Analyst

Gujarat, India

July 2023 – Sep 2024

- Analyzed sales trends and inventory data using **SQL** and **Python**, and built forecasting models to predict demand which **reduced inventory holding costs by 18%** and improved product availability by **25%**
- Developed a centralized dashboard for sales performance tracking which provided real-time visibility into sales trends, leading to a **15% increase in regional sales** and a **10% boost in team productivity**
- Conducted data analysis on delivery timelines and optimized logistics routes using python, **reducing delivery times by 20%**

IBM

Data Science Intern

Chennai, India

Feb 2023 – May 2023

- Created **Python** Scripts to develop a web-based application providing airlines with real-time satisfaction predictions and actionable insights
- Achieved **90%** accuracy in predictions using **Random Forest** and **Logistic Regression** that helps airlines identify service gaps, optimize customer experiences, and boost customer loyalty
- Strengthened technical expertise in **machine learning**, **data preprocessing**, and **scalable application** design while enhancing teamwork and problem-solving abilities

Besant Technologies

Software Engineering Intern

Chennai, India

Jan 2022 – April 2022

- Developed dynamic user interfaces with **React.js**, implementing state management using **Redux**
- Integrated backend services with **Node.js** and **Firebase**, ensuring enhanced application performance and user experience
- Improved application performance and responsiveness, ensuring optimal user experience

PROJECTS

Chronic Kidney Disease Predictor

- Developed a machine learning model to predict chronic kidney disease with high accuracy using medical data
- Implemented multiple classifiers, including **SVM**, **Decision Tree**, **Random Forest**, **Naive Bayes**, and **K-Nearest Neighbors**, achieving up to **95% accuracy** in predictions

Online Retail Data Clustering

- Analyzed **100,000+ retail transaction records** to identify customer purchasing patterns
- Utilized **Python** and libraries such as **Pandas**, **NumPy**, **Scikit-learn** and **Matplotlib** for data preprocessing and visualization
- Implemented clustering algorithms (**K-Means** and **DBSCAN**) to segment customers into **5+ distinct groups** based on behaviors

SKILLS

Programming: Java, Python, JavaScript, HTML/CSS, MS SQL Server, BigQuery, PostgreSQL, MySQL, MongoDB

Tools: PyCharm, Visual Studio Code, GCP, AWS, Jupyter Notebook, Agile, Tableau, Power BI, Excel, Firebase, Flask

CERTIFICATIONS

[Google Data Analytics Professional Certification](#)

[Edureka AWS Certification](#)
