SUMMARY

Full stack-minded data science professional with federal and private-sector experience, including internship work at PG&E. Skilled in Python, SQL, JavaScript/React, and scalable pipeline development with strong exposure to cloud platforms and Generative AI applications. Background includes SAP S/4 HANA transition support, SQL querying of ADMS/SCADA systems, and building dashboards to improve operational reporting. Passionate about building secure, user-focused applications that integrate data pipelines, APIs, and intuitive user interfaces to accelerate business innovation.

WORK EXPERIENCE

Operational Support Technician – Federal Bureau of Investigation, San Francisco, CA

Jul 2025 – Present

Supported secure case management systems and digital evidence workflows, ensuring data accuracy and compliance.

Coordinated background checks, credentialing, and records management using internal platforms.

Maintained operational databases and reporting systems to streamline investigative support.

Project Analyst Intern – Pacific Gas & Electric (PG&E), Oakland, CA

May 2024 – Aug 2024

Assisted with SAP S/4 HANA data migration and built dashboards that improved reporting accuracy by 25%.

Queried and transformed operational data from ADMS and SCADA systems using SQL to align with business processes.

Supported cross-functional teams by developing reporting tools that improved KPI visibility and accelerated decision-making.

IT Support Technician – GR Proofing, Walnut Creek, CA

Jan 2016 – Nov 2023

Solely managed IT infrastructure, ensuring system uptime, cybersecurity, and network reliability.

Implemented process improvements and upgrades, reducing downtime by 30% and boosting productivity.

Supported end users and led vendor coordination for hardware/software systems.

EDUCATION

Saint Mary's College of California, Moraga, CA

B.S. in Data Science, May 2025

Machine Learning, AI, Statistical Analysis, Programming, Data Visualization, Data Cleaning and Processing, Web Development

Diablo Valley College, Pleasant Hill, CA

A.S. in Computer Information Systems, May 2022

Programming Languages, Database Management, Systems Analysis, Network Fundamentals, Cybersecurity, Web Development

SKILLS

Languages/Frameworks: Python, R, SQL, C++, JavaScript/TypeScript, ReactJS, HTML, CSS

AI/ML & Data: Scikit-learn, TensorFlow, PyTorch, XGBoost, LangChain, Pandas, NumPy, Matplotlib, Seaborn

Databases: PostgreSQL, Vector Databases, Relational Databases

Cloud & Tools: AWS Cloud Foundations, Git/GitHub, SAP S/4 HANA, SCADA/ADMS systems

Techniques: Generative AI, NLP, Regression, Classification, Clustering, PCA, Time Series
