EDUCATION

University of Florida, Herbert Wertheim College of Engineering

December 2025

Bachelor of Science, Computer Science; GPA: 3.67/4.0

SKILLS

Technical Languages: C, C++, C#, Java, JavaScript, Golang, Python, Bash scripting, MATLAB, SQL, SQL Server Reporting Services

Developer Tools/Frameworks: Visual Studio, Visual Studio Code, IntelliJ, Git, GitHub, Gitlab, Spring Boot, PyCharm, Eclipse, Jupyter Notebook, ASP.NET, .NET Aspire, Blazor, Microsoft Azure, React, Angular

Libraries: SFML, Gmail API, NumPy, Scikit Learn, TensorFlow

Operating Systems: Windows, Linux, Ubuntu

PROFESSIONAL EXPERIENCE

Software Engineer Intern

May 2024-July 2024

Publix Super Markets | Lakeland, FL

- Collaborated with senior software engineers on the Supply Chain Store Replenishment Team to update the Meat Department's Production Plan Report, implementing changes projected to significantly increase efficiency and reduce labor and over-production.
- Tested the effectiveness of given SQL queries and interfaces designed with SQL Server Reporting Services to ensure accuracy of the details in the report.

Software Engineer Intern

May 2023-August 2023

Software Control Solutions | Melbourne, FL

- Performed research on controllable hardware products and developed Python and Bash scripts to enable more efficient hardware control throughout the office using webhooks.
- Developed C++ test cases for client hardware using a virtual machine interface, improving reliability and enabling safe validation without relying on physical devices.
- Developed a REST API using the Spring Boot framework, and an email parsing program using Python and the Gmail API to provide information to a firewall to improve network security.

PROJECT EXPERIENCE

Java-based Compiler, Programming Language Concepts Project

September 2024-December 2024

University of Florida | Gainesville, FL

- Developed a Java-based compiler with a partner, applying compiler design principles to simulate end-to-end program translation.
- Implemented lexical analysis, token generation and parsing, and abstract syntax tree construction in Java to enable code execution through IntelliJ's Java virtual machine.
- Developed and executed unit tests for the lexer, parser, interpreter, analyzer, and generator components to ensure accuracy and reliability of compiler functionality.

File Manager, Operating Systems Project

November 2023

University of Florida | Gainesville, FL

- Developed a C++ program to parse WAD file paths, automating directory and file creation within a Linux-based virtual machine.
- Employed the FUSE API to implement a user space daemon to enable mounted file system access through library functions.

GatorChat, Introduction to Software Engineering Project

January 2023-May 2023

University of Florida | Gainesville, FL

- Collaborated with three other team members to develop a Go-based chat app designed for UF students, integrating Angular for the front end to deliver a full-stack solution.
- Developed REST API endpoints and message management features for posting, editing, and deleting messages, enhancing core user functionality.
- Implemented and maintained back-end unit tests, ensuring reliability and stability of API features.
