Summary

I'm a future-focused full stack developer with a proven track record of leadership, adaptability, and team development. After eight years in the fitness industry — rising from personal trainer to general manager — and earlier leadership roles in fast-paced, hands-on environments, I've cultivated a strong foundation in problem-solving, team management, and performance optimization. Now, I'm channeling that experience into building scalable, user-focused tech solutions. I bring the same drive, discipline, and growth mindset to software development that powered my career progression, and I'm excited to contribute to innovative, impactful tech teams. My background in managing people, driving performance, and adapting quickly to challenges gives me a unique edge in tech environments that value collaboration, accountability, and continuous improvement.

Skills

Skills: Front-End Development, Back-End Development, Full-Stack Application Design, Responsive Web Design, REST API Integration, CRUD Functionality, Version Control, MVC Architecture, Third-Party API Consumption, UI/UX Optimization, DOM Manipulation

Soft Skills: Self-Motivated, Growth-Oriented, Adaptable, Curious, Mission-Driven, Detail-Oriented, Creative Thinker, Initiative-Taker

Professional Experience

Full-stack Software Engineer Immersive | General Assembly | Remote
April 2025 - July 2025

→ Completed a 13-week full-time Software Engineering Immersive program focused on full stack web development, with hands-on experience in JavaScript, React, Node.js, Express.js, MongoDB, and Python. Developed four full stack projects, including one using the MEN stack, one using the MERN stack, and one group collaboration project.

Projects:

MEN Stack | ElevateSelf | [Live app](#) | June 2025

Technology: HTML, JavaScript, CSS, EJS, Mongoose, Express, Node

ElevateSelf is a productivity web app that helps users set goals, break them into tasks, and schedule them on a visual calendar. Built with HTML, CSS, JavaScript, and EJS, it was my first full-stack project using the MEN stack.

MERN Stack | myPR.IO | [Live app](#) | June 2025

Technology: HTML, JavaScript, CSS, Node.js, Express, Mongoose, React

This app was inspired by my 8 years of experience working in the fitness industry as a personal trainer. Over the years, I discovered that the average gym-goer struggles with consistency not because of lack of effort, but due to a lack of support

Sales Manager | Class UFC Gyms | San Antonio, TX | September 2023 – May 2024

Role Description: Promoted Membership Sales and revenue growth

- Managed a team of 7 salesmen from diverse backgrounds
- Improved average membership retention by 30%
- Improved Monthly membership sales by 18%
- Streamlined New member enrollment by creating SOP for sales pipeline
- Oversaw month over month growth in revenue for 5 consecutive months

Personal Training Manager | Crunch Fitness | San Antonio, TX

November 2022 - September 2023

- Led a team of 6 trainers to improve SOP for handling clients, sales, and providing support to clients
- Created SOP for client intake and sales, resulting in 370% training revenue growth.

Regional Personal Training Manager | Anytime Fitness | Toledo Ohio

February 2021 - October 2022

- Managed a team of 5 trainers across 3 Locations
- Facilitated Membership and Personal Training sales

Education

Full-stack Software Engineer Immersive | General Assembly | Remote | April 2025 - July 2025

Full-time immersive program in Software Engineering consisting of 480+ hours of project work, professional training, and mentorship. Executed end-to-end Full Stack Development, Data Analysis and Evaluation, Data Modeling and Forecasting for 4 projects from the Men and MERN Stacks including user research phase through UI design, prototyping, usability testing, iteration, and stakeholder presentation; worked fully remote with teams using Agile methodologies and iterative development.
