PROJECTS

Active Learning and Engagement Repository—Senior Capstone ☑

Sep 2024 - Jun 2025

Oregon State University | Corvallis, OR

- Built a full-stack Next.js application prototype enabling professors to share and discover active-learning resources; owned search and rating features using TypeScript, React, and MySQL.
- Designed and deployed a relational schema on AWS RDS and integrated S3 for asset storage, ensuring 100% referential integrity and eliminating data duplication issues.
- Delivered 25+ CRUD endpoints with robust error handling and input validation to support reliable instructor workflows. Simplified CRUD operations, enabling teammates to build new features ~30% faster.
- Led sprint planning/reviews and stakeholder syncs for a 5 - member team; managed backlog, clarified requirements, and unblocked teammates to maintain on - time delivery across 10 bi-weekly sprints.
- Reviewed and tested pull requests, reducing merge defects and improving throughput of teammate contributions.

Course Management RESTful API—Course Project ☑

May 2024 - Jun 2024

Oregon State University | Corvallis, OR

- Developed and containerized a RESTful API Microservice with 15+ endpoints supporting CRUD operations, pagination, and robust error handling [Express.js, Node.js, MySQL, Redis, Docker, Redis, Sequelize, Postman].
- Implemented JWT-based authentication, securing student and instructor data access.
- Configured Redis rate limiting to safeguard endpoints from misuse and ensure stable performance under load.
