SKILLS

- **Languages:** JavaScript, TypeScript, C#, SQL, HTML, CSS
- **Frameworks/Libraries:** React, Next.js, Node.js, Express.js, Prisma, React Native
- **Tools/Platforms:** Git, PostgreSQL, Docker, AWS, Linux, VS Code, Figma, Slack
- **Competencies:** REST APIs, GraphQL, Mobile-First Design, UX/UI Principles, Responsive Design, Jest, Agile, Debugging
- **Soft Skills:** Collaboration, Communication, Leadership, Mentoring, Adaptability, Problem-Solving, Attention to Detail

EXPERIENCE

Affinity Advisors

Software Developer

March 2024 - November 2024

- Rebuilt the insurance portal's layout for **mobile responsiveness** by restructuring **Flexbox** and converting **PX units** to **REM**
- Designed and implemented the full quote submission flow including custom **React components**, pages, and user interactions
- Integrated **third-party** carrier APIs (Coalition, Cowbell, etc.) using **Express.js** and **Prisma** to return and display real-time quote data
- Improved performance by reducing page load times **20%** and resolving **40+** bugs through frontend optimization and **QA**
- Contributed to **Agile development** via **sprint planning**, stand-ups, and **peer code reviews**; enhanced **UI** with **reusable components** for error handling and stateful feedback

Code Ninjas, Douglasville, GA

Lead Instructor

January 2022 - February 2023

- Taught core **JavaScript** and **C#** concepts to **25+ students** through interactive coding challenges, game development, and hands-on projects
- Reviewed and graded **JavaScript-based assignments**, encouraging students to explore unique logic and creative solutions
- Led **technical walkthroughs** and **program tours** for prospective families; every tour resulted in a successful parent sign-up
- Boosted engagement and course completion through **project-based learning** and **collaboration** on graduation events

Freelancer

Graphic Designer

February 2019 - May 2023

- Designed banners and animations using **Adobe Creative Suite** for **client-facing** digital content
- Applied UX/UI design principles to deliver visually engaging and functional solutions

PROJECTS

Portfolio Version 2 | [GitHub Link](#)

- Migrated **legacy web application** to modern frameworks, improving **maintainability** and **scalability**
- Refactored outdated codebases, reducing technical debt and optimizing performance with **Next.js**, and **TypeScript**
- Integrated modern **UI/UX** practices and optimized for **mobile responsiveness**, reducing page load time by **30%**

Kanri-Mono Data | [GitHub Link](#)

- Developed a **GraphQL** server that handles complex data relationships and query patterns, enabling seamless introspections
- Deployed **Node.js** application with **Express.js** middleware, streamlining API requests
- Strengthened **database management** skills with **PostgreSQL** while mastering API introspections and schemas

EDUCATION

DigitalCrafts, Atlanta, GA

Certificate of Completion in Software Development

July 2023 - November 2023

Full time, Full-stack Web Development boot camp hosted by City of Refuge that encompassed **HTML**, **CSS**, **JavaScript**, **React.js**, and **Bootstrap** while also implementing cutting-edge frameworks and server-side technologies such as **Express.js** and **SQL**.

University of West Georgia, Carrollton, GA - Bachelor's Degree in Computer Science

2018 - 2021

Completed coursework towards Bachelor of Computer Science primarily using **Java** - Computer Science
