

Work Experience

CWIE Holdings Inc., CCBill – Software Quality Assurance Analyst

April 2020 - Present

- Managed the post-development testing cycle for issues relating to ensuring encrypted and secure bank transfers, storage of encrypted data, and front end user engagement
- Oversaw and coordinated the testing and release process for 500+ tickets and managed large projects covering 100+ server clusters
- Worked in an Agile environment requiring effective communication and collaboration, often needing to collaborate with stakeholders for project goals.
- Verified data of MySQL databases and Perl scripts, updating and optimizing over 50 test cases for efficient and effective testing
- Utilized A/B testing to evaluate changes to features and functionality
- Used Jira to create, track and manage large projects across multiple different timelines

HFE International – Web Development/Social Media Intern

January 2019 - August 2019

- Updated and maintained company website using WordPress, at times using HTML/CSS/JavaScript/PHP to adjust plug-ins and appearances
- Used Google Analytics to optimize SEO and web presence
- Introduced and updated various social media accounts including LinkedIn, Instagram, Facebook
- Calculated, updated and managed several price variations in QuickBooks and Excel over course of internship
- Created an order form with HTML/CSS/JavaScript/PHP to create a better user experience for customers trying to purchase our products

Education

*Bachelor of Science, Information Science and Technology, Minor in Finance
The University of Arizona, Tucson, AZ*

May 2019

Projects / Certifications

End to End Portfolio Management System

A lightweight portfolio optimizer that automates investing, speculative trading (data ingestion, cleaning and analysis) and ticker data storage using an ETL data pipeline. Uses Pandas, NumPy, and Matplotlib for quantitative analysis

Google Advanced Data Analytics

Gained hands on experience in machine learning fundamentals, data analytics techniques and Python programming to conduct multivariate experiments, A/B testing, and analysis of data distributions

Technical Skills

Coding: Python (Object Oriented Programming, Libraries/Frameworks: Django, Flask, Pandas, Matplotlib, NumPy), SQL (MySQL, PostgreSQL, MariaDB, SQLite3), HTML, CSS, PHP, JavaScript, R

Technologies/Environments: Microsoft Office (Proficient: Excel, Word, PowerPoint, Outlook), Windows 10, Xampp, Linux: Ubuntu 18.04, Debian 9.7, WordPress, Tableau, DigitalOcean, Jira, Jenkins, Postman, SoapUI, Docker

Interests: Golf, cooking, stock/option/crypto trading, quantitative research, baseball, sand volleyball
