El Centro, CA | (760) 554-0040 | JM3ZA2000@Gmail.com
Military Veteran | **Security Clearance:** Jan 2025 | CompTIA Security + **Certified**

PROFESSIONAL SUMMARY

Highly skilled and dedicated Department of Defense firefighter with 6 years of experience in emergency response and public service. Strong background in training, mentoring, and public safety, combined with a proven record of leadership, performance excellence, and adherence to safety standards. Transitioning into IT with competence in CompTIA certifications, eager to apply problem-solving, technical, and communication skills honed in high-pressure environments. Demonstrates exceptional decision-making abilities, the capacity to direct teams calmly during emergencies, and an unwavering commitment to continuous learning and growth.

PROFESSIONAL EXPERIENCE

United States Air Force | Various Locations
2025

August 2019 - Jan

Crew Chief

- Utilized advanced systems and software to coordinate and direct emergency responses, ensuring efficient deployment of firefighting vehicles and resources, while maintaining real-time communication with team members during critical incidents.
- Managed and maintained firefighting vehicles and equipment using digital tracking systems for inspection, maintenance schedules, and readiness assessments, ensuring operational efficiency and safety during exercises and emergency responses.
- Conducted training sessions using digital platforms and lesson plans, ensuring all crew members were proficient in the use of firefighting equipment, hazardous materials response, and emergency medical procedures, while tracking progress through performance management tools.

Driver Operator

- Leveraged technology to operate firefighting equipment and systems, including pumps, foam generators, and communication devices, ensuring efficient response and effective containment during structural and airfield fire incidents.
- Utilized advanced IT-based systems for hazard and risk assessments during HAZMAT operations, improving response strategies and ensuring safety protocols were met in emergency situations.
- Managed firefighting vehicle operations, utilizing GPS and other vehicle management technologies to enhance route optimization and response time during critical crash-rescue and firefighting missions.

Journeyman

- Utilized specialized IT systems to operate and monitor fire alarm systems, ensuring rapid response and safety in emergency situations, and integrating technological tools for effective firefighting equipment operation.
- Applied knowledge of aircraft cockpit design, ordnance placement, and cabin layouts, using technology-driven solutions to enhance safety protocols and facilitate efficient emergency response procedures.
- Managed communications equipment and maintained operational readiness by troubleshooting and ensuring the functionality of critical systems, contributing to effective coordination during emergency scenarios.

EDUCATION AND CERTIFICATIONS

MyComputerCareer | Live Online
Cyber Warrior Program

Graduation: April 2025

Completed over 400 hours of technical lecture and hands-on lab training

- Practiced monitoring daily backups, antivirus status, shared storage space, and network activity, adjusting network equipment and settings as needed

- Educated on how to implement and maintain system security and configurations of organizations' servers while providing IT support, including planning, software, and hardware configuration to end-users
- Analyzed information to determine, recommend, and plan layout for the type of computers and peripheral equipment modifications to existing systems
- Generated and verified physical security algorithms for software, firmware, and hardware
- Troubleshoot hypothetical incidents by recording detailed information from the "customer" and relaying it to the correct department for further assistance
- Displayed strong judgment in prioritizing workload based on the needs of the business and end-users
- Utilized knowledge of standard network protocols such as TCP/IP, DHCP, and common network devices such as routers, and switches to ensure that internet connectivity was sustained

NCO Training Course | Certificate of Completion Airman Leadership | February 2024

Louis F Garland Fire Academy | Certificate of Completion Firefighter Apprentice Course | July 2019

Central Union High School | High School Diploma | June 2018

TECHNICAL SKILLS

Systems: Windows 10, Mac OS X, iOS, DNS and DHCP, Physical and Logical Security, Network Standards and Protocols, IPS/IDS Intrusion Prevention System and Intrusion Detection System

Hardware: Disassemble and Reassemble desktop PCs, RAM, Hard Drives, Motherboard, Network Interface Cards, and Processors

Software: Microsoft Firewalls, Malware Identification, CIDR

AWARDS

100th CES Below the Zone recipient (promoted 12 months ahead of peers) | 2021

Air Force Achievement Medal for service at RAF Mildenhall | Aug 2019 - Sep 2022

Army Achievement Medals for service at Soto Cano AB, Honduras | Oct 2022 & 2023

Air Force Achievement Medal for service at Soto Cano AB, Honduras | Oct 2022 & 2023
