EXPERIENCE

Business Analyst

Florida Power & Light – Miami, FL | 2022 – Present

- Designed and deployed **AI-assisted Python web scraping automation** by leveraging **LLMs to generate functional code**, streamlining external data ingestion.
- Used **LLMs (ChatGPT and similar tools)** to generate optimized **Python and SQL scripts**, accelerating dashboard creation, reporting automation, and ETL workflows.
- Built automation agents to handle **PDF and Excel ingestion** from daily email reports, reducing manual labor and improving response efficiency.
- Engineered **advanced SQL queries** to validate data integrity, accelerating financial reporting pipelines for multi-million-dollar GL transactions.
- Conducted **QA and regression testing** using Qmetry, Jira, and SAP environments, ensuring defect resolution during enterprise software upgrades.
- Developed and maintained **VBA/Excel automations**, reducing manual reporting time by more than **50%** for finance and operations teams.
- Analyzed **GIS datasets** to identify billing anomalies, supporting compliance and revenue protection efforts.
- Maintained **SOX-compliant documentation** and automation pipelines to ensure regulatory integrity.
- Supported cross-functional teams in delivering automated data validation pipelines for **\$100M+ in daily financial postings**.
- Trained internal staff on leveraging **generative AI tools, prompt engineering, SAP, and automation workflows** to improve adoption and efficiency.

Key Achievements:

- Developed **3+ fully AI-driven automation pipelines** using LLMs and prompt engineering.
 - Spearheaded **AI adoption** with internal toolkits, prompt libraries, and staff training.
 - Identified and resolved **25+ critical defects** during SAP upgrade regression testing.
 - Earned **Six Sigma Yellow Belt certification** for process efficiency and quality contributions.
-

AI & DATA PROJECTS

- Leveraged LLMs to generate Python automation scripts for workflows including web scraping, PDF ingestion, and Excel parsing.
 - Built AI-assisted Python pipelines for daily email-to-database automation, eliminating repetitive manual tasks.
 - Applied prompt engineering techniques to improve the accuracy and reliability of generated code.
 - Currently learning Zapier flow integrations with AI tools to scale no-code/low-code automation solutions.
-

Group Fitness Manager

Orangetheory Fitness – Miami Lakes, FL | 2018 – 2022

- Directed a team of coaches while managing CRM systems, improving customer engagement and operational workflows.
- Implemented structured data processes within CRM systems to ensure reporting accuracy and consistency.
- Developed training programs leveraging performance data to improve employee output and client satisfaction.
- Collaborated with leadership to translate business requirements into process improvements, enhancing efficiency and customer retention.

EDUCATION

Florida International University – Associate Degree in Health and Wellness

SKILLS

Python, SQL, VBA, AI Automation, LLM Integration, Prompt Engineering, Zapier, QA Testing, Data Pipelines, ETL, Process Automation, SAP, Jira, Qmetry, Tableau, Excel (Pivot Tables, Advanced Functions), GIS Data Analysis, Project Management, Six Sigma Yellow Belt
