PROFILE

Software Development Engineer with 2+ years of experience in full stack development and microservices. Proficient in Python, Java, C++, JavaScript, SQL, React, HTML, and CSS with strong object-oriented programming and problem-solving skills. Skilled in backend development with RESTful APIs, database design, and cloud-native deployments on AWS using Docker, Kubernetes, and CI/CD pipelines (Jenkins, GitHub Actions). Solid foundation in data structures, algorithms, Agile methodologies, Git, and software testing to deliver scalable, high-performance applications.

SKILLS

Programming: Python, Java, C++, JavaScript, SQL, Object-Oriented Programming (OOP)

Web Development: React, HTML, CSS, RESTful APIs, Microservices

Cloud & DevOps: AWS (EC2, Lambda, S3), Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions)

Databases & Tools: MySQL, PostgreSQL, MongoDB, Version Control (Git/GitHub), Linux

Core Competencies: Data Structures, Algorithms, Software Testing, Problem-Solving, Agile/Scrum

Experience

Software Engineer, Community Dreams Foundation – Orlando, FL July 2025 – Present

- Designed and deployed full-stack web applications using React, Node.js, and Python, enhancing accessibility and user engagement for nonprofit programs.
- Built and optimized RESTful APIs and AWS services (EC2, S3, Lambda) to enable scalable data workflows and reporting dashboards.
- Improved CI/CD pipelines with Docker and GitHub Actions, reducing release cycle time by 40% and ensuring reliable deployments.

SOC Research Intern, Rapid7, University of South Florida – Tampa, FL Mar 2025 – May 2025

- Simulated cyberattacks (e.g., Log4Shell) to identify vulnerabilities and validate mitigation strategies across distributed systems.
- Built Splunk dashboards and detection rules aligned with MITRE ATT&CK, improving incident response speed by 45%.
- Automated threat modeling scripts in PowerShell, reducing manual scanning workload and enhancing detection accuracy.

Software Engineer, MindGraph – Hyderabad, IN May 2021 – Aug 2023

- Designed backend services in Python and Node.js and modular React frontends, improving throughput by 30% and reducing frontend bugs by 40%.
- Secured RESTful APIs with JWT authentication and query optimization, reducing API latency from 250ms to 140ms.
- Containerized services using Docker & Kubernetes, achieving 99.9% uptime, and automated CI/CD pipelines with Jenkins and GitHub Actions.
- Optimized relational and NoSQL databases (MySQL, PostgreSQL, MongoDB) through indexing and query tuning, cutting data retrieval time by 35%.
- Collaborated in Agile/Scrum teams, leading code reviews and implementing unit and integration testing (JUnit, PyTest), increasing release quality and reducing post-deployment defects.

Full Stack Developer Intern – Real-Time Monitoring Systems, APSDMA – Tadepalli, IN Jan 2021 – May 2021

- Built a real-time monitoring dashboard with React, Node.js, and GIS APIs, improving disaster data accessibility

by 30%

- Developed REST APIs and telemetry workflows, optimizing data processing latency.
- Deployed on AWS EC2 with CloudWatch alerts, achieving 99.9% uptime during pilot monitoring..

Education

University of South Florida, MS in CyberSecurity

Aug 2023 – May 2025

- GPA: 3.88/4.0

Velagapudi Ramakrishna Krishna Engineering College, BTech in Computer Science and Engineering

Aug 2019 – May 2023

- GPA: 3.33/4.0

Certifications

- CompTIA Cybersecurity Analyst (CySA+) – CompTIA
- CompTIA Security+ (ce) – CompTIA
- Cisco Certified Network Associate (CCNA) Security – Cisco Networking Academy
- PCAP – Certified Associate in Python Programming – Cisco Networking Academy
- NDG Linux Essentials Certification – Cisco Networking Academy
